CFA Institute Sustainable Investing Certificate (CFA-SIC) Exam Sample Questions (Q594-Q599):

NEW QUESTION # 594

Leased assets of a company contribute to:

- A. Scope 3 emissions.
- B. Scope 2 emissions.
- C. Scope 1 emissions.

Answer: A

Explanation:

GHG emissions are categorized into three scopes:

Scope 1: Direct emissions from a company's owned facilities and vehicles.

Scope 2: Indirect emissions from purchased electricity, heating, or cooling.

Scope 3: Indirect emissions from the value chain, including leased assets, supply chain, employee commuting, and business travel.

Why C (Scope 3) is correct:

Leased assets are not directly owned but still contribute to a company's carbon footprint.

Why not A or B?

A (Scope 1) applies to owned assets, not leased ones.

B (Scope 2) applies to purchased electricity, not leased buildings or vehicles.

NEW QUESTION # 595

Compared to other ESG strategies, fully integrated ESG strategies tend to feature:

- A. more concentrated positions.
- B. similarly concentrated positions.
- C. less concentrated positions.

Answer: A

Explanation:

Fully integrated ESG strategies tend to have more concentrated positions as they focus on companies with strong ESG practices, often limiting the investment universe to a smaller selection of high-performing companies. (ESGTextBook[PallasCatFin], Chapter 8, Page 451)

NEW QUESTION # 596

In addition to reporting on sustainability matters that are financially material to a company's business value, double materiality also requires the company to report the impact of:

- A. ESG risks to the company
- B. The company on the environment and people
- C. Upcoming regulation on its industry

Answer: B

Explanation:

Double materiality means a company must report not only how ESG risks impact financial performance but also how the company's activities impact society and the environment.

For example, under the EU Corporate Sustainability Reporting Directive (CSRD), companies must disclose:

* Financial materiality(how ESG issues affect financial performance)
* Impact materiality(how the company affects the environment and society) References:
European Commission's CSRD & Double Materiality Framework
Global Reporting Initiative (GRI) Standards
Principles for Responsible Investment (PRI) ESG Reporting Guidelines

NEW QUESTION # 597

ESG disclosure among listed companies can be required by:

- A. stock exchanges only.
- **B. both stock exchanges and security regulators.**
- C. security regulators only.

Answer: B

Explanation:

ESG disclosure rules are increasingly enforced by both stock exchanges (listing rules, ESG reporting frameworks) and security regulators (mandatory sustainability disclosure standards like the EU SFDR and CSRD). CFA materials emphasize that this dual regulatory approach is becoming more common to ensure comprehensive sustainability transparency.

NEW QUESTION # 598

An analyst derives correlations to determine how ESG factors might impact financial performance over time and then weights those factors appropriately within the portfolio. This approach is best described as:

- **A. Systematic**
- B. Algorithmic
- C. Thematic

Answer: A

Explanation:

The systematic approach involves deriving correlations between ESG factors and financial performance, then weighting those factors accordingly within the portfolio. This method is quantitative and aims to integrate ESG factors into the overall risk and return analysis.
