## Oracle 1Z0-1126-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.</li> </ul>

## Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q67-Q72):

### NEW QUESTION # 67

When developing OGL content, you want the development environment to be as close as possible to which environment?

- A. Production environment
- B. Other application environment
- C. Testing environment
- D. UAT environment

**Answer: A**

Explanation:

The development environment should mirror Production to ensure content accuracy and functionality in the live system. Testing (option A) and UAT (option D) are separate phases, and other applications (option B) are irrelevant.

### NEW QUESTION # 68

What are recommended agenda items for the OGL kickoff?

- A. Start developing content, deploy OGL in production, and define Hypercare solutions

- B. Get an overview of the OGL cloud service and implementation process, identify key roles and responsibilities, and review the training plan and digital learning assignments.
- C. Focus on business outcomes, leverage best practices, and continuously improve.

**Answer: B**

Explanation:

The OGL kickoff agenda typically includes an overview of the cloud service and implementation process, identifying roles and responsibilities, and reviewing the training plan. These set the foundation for the project. Option A involves later-stage activities, and option C is too vague for a kickoff focus.

#### NEW QUESTION # 69

For which type of activity are testing statuses (e.g., Ready for test, Not required, Published) and notes/comments the two best practices?

- A. Documentation
- B. Planning
- C. OGL kickoff

**Answer: B**

Explanation:

Testing statuses and notes/comments are best practices in Planning (option A), as they track progress and provide context for testing phases. OGL kickoff (option B) focuses on initiation, not testing details, while Documentation (option C) records outcomes, not active tracking. Planning leverages these practices to coordinate and monitor testing effectively, ensuring readiness and clarity.

#### NEW QUESTION # 70

Which OGL analytics dashboard provides a summary of guide activity for a specified time period, by type as well as summarizing user engagement metrics?

- A. Content dashboard
- B. Activity dashboard
- C. Feedback dashboard
- D. Users dashboard

**Answer: B**

Explanation:

The Activity dashboard in OGL is tailored to provide a comprehensive summary of guide activity over a specified period, breaking it down by guide type (e.g., Process Guides, Smart Tips) and including user engagement metrics such as views, completions, or interactions. This dashboard is crucial for understanding how content is being used in practice, offering insights into both frequency and effectiveness. The Users dashboard (option A) focuses on login and user-specific data, the Feedback dashboard (option B) highlights user opinions, and the Content dashboard (option D) details content availability, not usage. The Activity dashboard's dual focus on type-specific activity and engagement metrics makes it the ideal tool for tracking performance trends and identifying areas for improvement, aligning perfectly with the question's requirements.

#### NEW QUESTION # 71

When creating custom content, how will you capture requirements and communicate them?

- A. By providing an outline with text and screenshots
- B. By importing guides from the Use Case library
- C. By transmitting instructions through an Instant Messenger application
- D. By sending a templated email to all end users

**Answer: A**

Explanation:

Capturing and communicating requirements for custom content in OGL involves creating a detailed outline with text and screenshots.

This method ensures clarity and specificity, allowing stakeholders to visualize and validate the content. Templated emails (option A) lack detail, importing Use Case guides (option B) is a starting point but not requirement capture, and Instant Messenger (option C) is informal and insufficient. The outline approach aligns with OGL best practices for documentation.
