SAP Certified Associate - Solution Transformation Consultant with SAP Cloud ALM Sample Questions (Q12-Q17):

NEW QUESTION # 12

During test preparation, to which of the following can you assign testers?

- A. Test activities
- B. Test plan
- C. Test case

Answer: C

Explanation:

In SAP Cloud ALM, testers are assigned directly to the Test case during the test preparation phase. This allows for clear accountability and role assignment for executing specific test cases.

NEW QUESTION # 13

What are the key capabilities of SAP Cloud ALM?

Note: There are 3 correct answers to this question.

- A. Perform collaborative process analysis and mining
- B. Design and plan the to-be application landscape
- C. Detect and resolve problems during operations
- D. Manage SAP service results and follow-up activities
- E. Support implementation of all SAP solutions

Answer: A,C,E

Explanation:

Key capabilities of SAP Cloud ALM include:

Collaborative process analysis and mining: Supports process analysis across teams.

Support for implementing all SAP solutions: Facilitates the implementation of various SAP solutions.

Detect and resolve problems during operations: Provides tools for problem detection and resolution in live systems.

NEW QUESTION # 14

For which SAP solutions does SAP Cloud ALM support deployment management?

Note: There are 2 correct answers to this question.

- A. SAP S/4HANA Cloud, Public Edition
- B. SAP Ariba
- C. SAP SuccessFactors
- D. SAP S/4HANA

Answer: A,D

Explanation:

SAP Cloud ALM provides deployment management for several SAP solutions, particularly those that benefit from cloud-based management:

SAP S/4HANA: SAP Cloud ALM supports deployment management for the on-premise version of SAP S/4HANA, enabling smoother deployment processes.

SAP S/4HANA Cloud, Public Edition: The cloud version also enjoys deployment management support for seamless upgrades and deployment tracking.

NEW QUESTION # 15

For which of the following scenarios can you use Tricentis Test Automation for SAP integrated with SAP Cloud ALM?

- A. Testing and validating non-SAP solutions
- B. Automation of productive business processes
- C. Change Impact Analysis
- D. Testing and validating business processes in SAP solutions

Answer: D

Explanation:

Tricentis Test Automation for SAP, when integrated with SAP Cloud ALM, is primarily used for testing and validating business processes in SAP solutions. It helps ensure that business processes are functioning correctly after system changes, upgrades, or new implementations.
