website.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q296-Q301):

NEW QUESTION # 296

Which CLI command displays the physical media that are connected to ethernet1/8?

- A. > show system state filter-pretty sys.sl.p8.phy
- B. > show interface ethernet1/8
- C. > show system state filter-pretty sys.si. p8. stats
- D. > show system state filter-pretty sys.sl.p8.med

Answer: A

Explanation:

The CLI command "show system state filter-pretty sys.sl.p8.phy" is used to display detailed physical layer information, which would include the physical media connected to a specific interface such as ethernet1/8.

This command is designed to filter the output to show relevant physical layer information for the specified interface.

For more information on Palo Alto Networks CLI commands and their outputs, refer to the "PAN-OS CLI Reference Guide".

NEW QUESTION # 297

A company wants to use their Active Directory groups to simplify their Security policy creation from Panorama.

Which configuration is necessary to retrieve groups from Panorama?

- A. Configure a group mapping profile to retrieve the groups in the target template.
- B. Configure a master device within the device groups.
- C. Configure an LDAP Server profile and enable the User-ID service on the management interface.
- D. Configure a Data Redistribution Agent to receive IP User Mappings from User-ID agents.

Answer: B

NEW QUESTION # 299

What would allow a network security administrator to authenticate and identify a user with a new BYOD-type device that is not joined to the corporate domain'?

- A. a Security policy with 'unknown' selected in the Source User field

- B. a Security policy with 'known-user' selected in the Source User field
- C. an Authentication policy with 'unknown' selected in the Source User field
- D. an Authentication policy with 'known-user' selected in the Source User field

Answer: A

NEW QUESTION # 300

An administrator is using Panorama and multiple Palo Alto Networks NGFWs. After upgrading all devices to the latest PAN-OS software, the administrator enables log forwarding from the firewalls to Panorama. Pre-existing logs from the firewalls are not appearing in Panorama.

Which action would enable the firewalls to send their pre-existing logs to Panorama?

- A. Use the ACC to consolidate the logs
- B. Export the log database
- **C. Use the `scp logdb export` command**
- D. Use the import option to pull logs.

Answer: C

Explanation:

commands:

request logdb
