2025 Unparalleled Nokia 4A0-113: Valid Nokia OSPF Routing Protocol Exam Exam Experience

BONUS!!! Download part of Prep4cram 4A0-113 dumps for free: https://drive.google.com/open?id=1W0Ot8l7wu9UJFmHq8Qku0k0xh5bP3ryr

If you want to 4A0-113 practice testing the product of Prep4cram, feel free to try a free demo and overcome your doubts. A full refund offer according to terms and conditions is also available if you don't clear the Nokia OSPF Routing Protocol Exam (4A0-113) practice test after using the Nokia OSPF Routing Protocol Exam (4A0-113) exam product. Purchase Prep4cram best 4A0-113 study material today and get these stunning offers.

Nokia 4A0-113 Exam is targeted at IT professionals working on Nokia IP networks, which include service providers, system integrators, and network engineers. 4A0-113 exam aims to assess the knowledge and skills needed to configure and manage OSPF routing protocols, including understanding of the protocol's functionality, packet formats, and configuration options. Additionally, the exam covers OSPF network design, monitoring, and troubleshooting, which are essential skills for network engineers and system administrators.

Hot Valid 4A0-113 Exam Experience 100% Pass | Latest 4A0-113 Reliable Exam Sample: Nokia OSPF Routing Protocol Exam

We strongly recommend the 4A0-113 exam questions compiled by our company. On one hand, our 4A0-113 test material owns the best quality. When it comes to the 4A0-113 study materials selling in the market, qualities are patchy. But our 4A0-113 test material has been recognized by multitude of customers, which possess of the top-class quality, can help you pass exam successfully. On the other hand, our 4A0-113 Latest Dumps are designed by the most experienced experts, thus it can not only teach you knowledge, but also show you the method of learning in the most brief and efficient ways.

Nokia 4A0-113 Certification Exam is designed to test a candidate's knowledge and skills in implementing and troubleshooting the Open Shortest Path First (OSPF) routing protocol using Nokia equipment. OSPF is a widely used routing protocol in enterprise and service provider networks, and mastering this technology is essential for professionals working with Nokia routers and switches.

Nokia OSPF Routing Protocol Exam Sample Questions (Q79-Q84):

NEW QUESTION # 79
From the list below select the statements that describe the behavior of link state information aging. (Choose 2)

- A. The age is incremented or decremented only as it is held in the topological database and not as it is flooded router to

router.
- B. The age for newly created link state information is set to 0 for OSPF and 1200 for IS-IS
- C. The age is incremented or decremented as it is flooded from router to router and as it is held in the topological database.
- D. The age for newly created link state information is set to 1200 for OSPF and 0 for IS-IS

Answer: B,C

NEW QUESTION # 80
Which of the following types of networks are supported on a Nokia 7750 SR for OSPF? Choose two answers.

- A. Point-to-multipoint
- B. Non-broadcast multi-access
- C. Point-to-point
- D. Broadcast

Answer: C,D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
From Nokia 7750 SR OS Routing Protocols Guide (OSPF Interface Types and Network Types):
"Nokia 7750 SR OS supports the broadcast and point-to-point network types for OSPF. Non-broadcast and point-to-multipoint are not supported." A (Correct): Broadcast networks - e.g., Ethernet LANs.
C (Correct): Point-to-point networks - e.g., serial links, direct router-to-router connections.
Incorrect options:
B: NBMA is not supported natively.
D: Point-to-multipoint is not supported.
-

NEW QUESTION # 81
What is the source IP address in an OSPF update?

- A. The unicast IP address of the interface the update is sent on
- B. 224.0.0.6
- C. The system address of the router.
- D. 224.0.0.5

Answer: A

NEW QUESTION # 82
Which of the following statements best describes the function of an OSPF Type 4 LSA?

- A. A Type 4 LSA is originated by an ABR to describe a route to an ASBR to routers outside the area.
- B. A Type 4 LSA is originated by an ABR that is connected to a stub area. The LSA is injected into the stub area to provide routing information.
- C. A Type 4 LSA is originated by an ASBR to describe a route to itself to routers outside the area.
- D. A Type 4 LSA is originated by an ABR that is connected to a stub area. The LSA is injected into the backbone area to provide routing information.

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
From Nokia 7750 SR OS Routing Protocols Guide (OSPF ASBR Summary LSA):
Type 4 LSAs (ASBR Summary LSAs) are originated by ABRs.
They inform routers in other areas about how to reach the ASBR (not about external prefixes, but about the ASBR's router ID).
Thus, correct answer: A.
-

NEW QUESTION # 83
An OSPF ASBR must have at least one interface in the backbone area (area 0)

- A. False
- B. True

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
From Nokia 7750 SR OS Routing Protocols Guide (OSPF ASBR Behavior):
An ASBR can exist in any OSPF area - including stub or NSSA areas.
There is no requirement that an ASBR be directly connected to area 0.
Thus, correct answer: B (False).
