The PrepAwayPDF wants to win the trust of HCIP-Security V4.0 H12-725_V4.0 exam candidates at any cost. To achieve this objective the PrepAwayPDF is offering H12-725_V4.0 exam passing money-back guarantee. Now your investment with PrepAwayPDF is secured from any risk. If you fail the HCIP-Security V4.0 H12-725_V4.0 Exam despite using PMI Dumps, you can claim your paid amount. Thanks and best of luck in your exam and career!

Huawei H12-725_V4.0 Certification Exam consists of multiple-choice questions, and it is designed to test the candidate's knowledge and skills in a variety of security domains, including firewall technology, intrusion prevention, VPN technology, and security management. H12-725_V4.0 exam is divided into two parts: a written exam and a lab exam. The written exam covers the theoretical aspects of security technologies and solutions, while the lab exam focuses on the practical skills required to implement and manage security solutions in Huawei enterprise networks.

PrepAwayPDF Huawei H12-725_V4.0 Exam Dumps and Practice Test Software

For candidates who are going to pay for H12-725_V4.0 test materials online, they may care more about the money safety. We apply the international recognition third party for payment, and if you pay for H12-725_V4.0 exam materials, we can ensure the safety of your money and account. Besides, the third party will also protect your interests. The pass rate for H12-725_V4.0 testing materials is 98.75%, and we can guarantee you that you can pass the exam just one time. We are pass guarantee and money back guarantee if you fail to pass the exam, and the refund will be returned to your payment account.

Huawei H12-725_V4.0 (HCIP-Security V4.0) Certification Exam is a professional-level certification exam that tests the knowledge and skills of IT professionals in the field of network security. H12-725_V4.0 exam is designed to validate the ability of candidates to plan, design, implement, operate, and troubleshoot secure network infrastructures using Huawei security products and technologies.

Huawei HCIP-Security V4.0 Sample Questions (Q19-Q24):

NEW QUESTION # 19

If a Portal authentication user goes offline but neither the access device nor the RADIUS server detects this event, many problems may occur. To prevent this from occurring, the access device needs to detect a user logout immediately, delete the user entry, and instruct the RADIUS server to stop accounting.

Which of the following can trigger a Portal user logout?(Select All that Apply)

- A. The user initiates a logout request.
- B. The Portal server logs out the user.
- C. The access device logs out the user.
- D. The authentication server logs out the user.

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed Explanation:

- * Portal authentication requires active session monitoring.
- * User logout can be triggered by multiple methods:
 - * A. Portal server logout# The Portal system forcefully logs out a user.
 - * B. Authentication server logout# The authentication system revokes access.
 - * C. User-initiated logout# The user manually logs out via a Portal page.
 - * D. Access device logout# If the firewall detects inactivity, it can remove the session.
- * Why are all options correct?
- * Each method can trigger a user logout in Portal authentication.

HCIP-Security References:

- * Huawei HCIP-Security Guide # Portal Authentication Logout Mechanisms

NEW QUESTION # 20

In the figure, enterprise A and enterprise B need to communicate securely, and an IPsec tunnel is established between firewall A and firewall B. Which of the following security protocols and encapsulation modes can meet the requirements of this scenario?

- A. AH; tunnel mode
- B. AH+ESP; transport mode
- C. ESP; transport mode
- **D. ESP; tunnel mode**

Answer: D

NEW QUESTION # 21

When gateways are connected using GRE over IPsec, the IPsec encapsulation mode must be tunnel mode.

- **A. TRUE**
- B. FALSE

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

- * GRE over IPsec is used to tunnel non-IP traffic, multicast, and dynamic routing protocol over IPsec VPN.
- * Tunnel mode is required because:
 - * Transport mode only encrypts the payload, but GRE needs the entire original IP packet encrypted.
 - * Tunnel mode encrypts the entire packet (original + GRE headers), ensuring full encapsulation.
- * Why is this statement true?
- * GRE over IPsec must use tunnel mode to fully encapsulate and protect packets.

HCIP-Security References:

- * Huawei HCIP-Security Guide # GRE over IPsec Configuration

NEW QUESTION # 22

On a WLAN where the WAC has Portal authentication configured, VLAN authorization can be implemented with no additional configuration required. After Portal authentication is complete, the WAC forwards STA traffic based on the authorized VLANs.

- **A. FALSE**
- B. TRUE

Answer: A

Explanation:

Comprehensive and Detailed Explanation:

- * VLAN authorization in Portal authentication requires additional configuration.
- * To assign VLANs dynamically:

- * RADIUS must return VLAN attributes after authentication.
 - * The WAC (Wireless Access Controller) must be configured to support dynamic VLAN assignment.
 - * Why is this statement false?
 - * VLAN authorization requires RADIUS attributes and WAC configuration-it is not automatic.
- HCIP-Security References:
- * Huawei HCIP-Security Guide # WLAN & Portal Authentication

NEW QUESTION # 23

Which of the following statements is false about Eth-Trunk?(Select All that Apply)

- A. An Eth-Trunk must have at least one active link.
- B. An Eth-Trunk interface can be a Layer 2 or Layer 3 interface.
- C. An Eth-Trunk interface is a logical interface.
- **D. An Eth-Trunk must have at least two member links.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

- * Eth-Trunk can be created with just one member link; it is not mandatory to have two links.
- * At least one active link is required for the Eth-Trunk to function.
- * Eth-Trunk is a logical interface that can work at Layer 2 or Layer 3.
- * Why is A false?
- * While multiple links are recommended, an Eth-Trunk can work with just one active link.
