

2025 Updated NSE8_812: Fortinet NSE 8 - Written Exam (NSE8_812) Latest Braindumps Pdf

2025 Latest Pass4cram NSE8_812 PDF Dumps and NSE8_812 Exam Engine Free Share: https://drive.google.com/open?id=1abKRxj0-se4e7f_2uLR3PSxZZQNAbBX

During your transitional phrase to the ultimate aim, our NSE8_812 study engine as well as these updates is referential. Those NSE8_812 training materials can secede you from tremendous materials with least time and quickest pace based on your own drive and practice to win. Those updates of our NSE8_812 Exam Questions will be sent to you accordingly for one year freely. And we make sure that you can pass the exam.

If you want to pass your exam and get your certification, we can make sure that our Fortinet Network Security Expert guide questions will be your ideal choice. Our company will provide you with professional team, high quality service and reasonable price. In order to help customers solve problems, our company always insist on putting them first and providing valued service. We deeply believe that our NSE8_812 question torrent will help you pass the exam and get your certification successfully in a short time. Maybe you cannot wait to understand our NSE8_812 Guide questions; we can promise that our products have a higher quality when compared with other study materials. At the moment I am willing to show our NSE8_812 guide torrents to you, and I can make a bet that you will be fond of our products if you understand it.

NSE8_812 Valid Test Objectives - NSE8_812 Exam Overview

In the learning process, many people are blind and inefficient for without valid NSE8_812 exam torrent and they often overlook some important knowledge points which may occupy a large proportion in the Fortinet NSE8_812 exam, and such a situation eventually lead them to fail the exam. While we can provide absolutely high quality guarantee for our Fortinet NSE 8 - Written Exam (NSE8_812) NSE8_812 practice materials, for all of our learning materials are finalized after being approved by industry experts.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q65-Q70):

NEW QUESTION # 65

A customer's cybersecurity department needs to implement security for the traffic between two VPCs in AWS, but these belong to different departments within the company. The company uses a single region for all their VPCs.

Which two actions will achieve this requirement while keeping separate management of each department's VPC? (Choose two.)

- A. Create an IAM account for the cybersecurity department to manage both existing VPC, create a FortiGate HA Cluster on each VPC and IPSEC VPN to force traffic between the VPCs through the FortiGate clusters
- B. Create a VPC with a FortiGate auto-scaling group with a Transit Gateway attached to the three VPC to force routing through the FortiGate cluster
- C. Migrate all the instances to the same VPC and create IAM accounts for each department, then implement a new subnet for a FortiGate auto-scaling group and use routing tables to force the traffic through the FortiGate cluster.
- D. Create a transit VPC with a FortiGate HA cluster, connect to the other two using VPC peering, and use routing tables to force traffic through the FortiGate cluster.

Answer: B,D

Explanation:

To implement security for the traffic between two VPCs in AWS, while keeping separate management of each department's VPC, two possible actions are:

* Create a transit VPC with a FortiGate HA cluster, connect to the other two using VPC peering, and use routing tables to force traffic through the FortiGate cluster. This option allows the cybersecurity department to manage the transit VPC and apply security policies on the FortiGate cluster, while the other departments can manage their own VPCs and instances. The VPC peering connections enable direct communication between the VPCs without using public IPs or gateways. The routing tables can be configured to direct all inter-VPC traffic to the transit VPC.

* Create a VPC with a FortiGate auto-scaling group with a Transit Gateway attached to the three VPCs to force routing through the FortiGate cluster. This option also allows the cybersecurity department to manage the security VPC and apply security policies on the FortiGate cluster, while the other departments can manage their own VPCs and instances. The Transit Gateway acts as a network hub that connects multiple VPCs and on-premises networks. The routing tables can be configured to direct all inter-VPC traffic to the security VPC. References: <https://docs.fortinet.com/document/fortigate-public-cloud/7.2.0/aws-administration-guide/506140/connecting-a-local-fortigate-to-an-aws-vpc-vpn>

<https://docs.fortinet.com/document/fortigate-public-cloud/7.0.0/sd-wan-architecture-for-enterprise/166334/sd-wan-configuration>

NEW QUESTION # 66

You must configure an environment with dual-homed servers connected to a pair of FortiSwitch units using an MLAG.

Multicast traffic is expected in this environment, and you should ensure unnecessary traffic is pruned from links that do not have a multicast listener.

In which two ways must you configure the `igmps-flood-traffic` and `igmps-flood-report` settings? (Choose two.)

- A. disable on the ISL and FortiLink trunks
- B. disable on ICL trunks
- C. enable on the ISL and FortiLink trunks
- D. enable on ICL trunks

Answer: B,C

Explanation:

To ensure that unnecessary multicast traffic is pruned from links that do not have a multicast listener, you must disable IGMP flood traffic on the ICL trunks and enable IGMP flood reports on the ISL and FortiLink trunks.

Disabling IGMP flood traffic will prevent the FortiSwitch units from flooding multicast traffic to all ports on the ICL trunks. This will help to reduce unnecessary multicast traffic on the network.

Enabling IGMP flood reports will allow the FortiSwitch units to learn which ports are interested in receiving multicast traffic. This will help the FortiSwitch units to prune multicast traffic from links that do not have a multicast listener.

NEW QUESTION # 67

A customer with a FortiDDoS 200F protecting their fibre optic internet connection from incoming traffic sees that all the traffic was dropped by the device even though they were not under a DoS attack. The traffic flow was restored after it was rebooted using the GUI. Which two options will prevent this situation in the future? (Choose two)

- A. Replace with a FortiDDoS 1500F
- B. Move the internet connection from the SFP interfaces to the LC interfaces
- C. Create an HA setup with a second FortiDDoS 200F
- D. Change the Adaptive Mode.

Answer: A,C

Explanation:

B is correct because creating an HA setup with a second FortiDDoS 200F will provide redundancy in case one of the devices fails. This will prevent all traffic from being dropped in the event of a failure.

D is correct because the FortiDDoS 1500F has a larger throughput capacity than the FortiDDoS 200F. This means that it will be less likely to drop traffic even under heavy load.

The other options are incorrect. Option A is incorrect because changing the Adaptive Mode will not prevent the device from dropping traffic. Option C is incorrect because moving the internet connection from the SFP interfaces to the LC interfaces will not change the throughput capacity of the device.

NEW QUESTION # 68

Refer to the exhibit containing the configuration snippets from the FortiGate. Customer requirements:

```
config vpn ssl settings
    set https-redirect enable
    set servercert "FortiGateLE"
    set tunnel-ip-pools "SSLVPN_TUNNEL_ADDR1"
    set tunnel-ipv6-pools "SSLVPN_TUNNEL_IPv6_ADDR1"
    set port 443
    set source-interface "port1"
    set source-address "all"
    set source-address6 "all"
    set default-portal "no-access"
end

config system global
    set admin-port 80
end

config vpn certificate local
    edit "FortiGateLE"
        set password ENC <redacted>
        set range global
        set enroll-protocol acme2
        set acme-domain "datacenter.acmecorp.com"
        set acme-email "administrator@acmecorp.com"
    next
end

config system acme
    set interface "port1"
```

```

config accounts
    edit "ACME-.letsencrypt.org-0000"
        set status "valid"
        set ca_url "https://acme-
v02.api.letsencrypt.org/directory"
        set email "administrator@acmecorp.com"
    end
end

config firewall address
    edit "h-fortigate_public"
        set subnet 129.11.1.100 255.255.255.255
    next
end

config firewall vip
    edit "fortimail_secure_web_admin"
        set mappedip "10.100.1.5"
        set extintf "port1"
        set portforward enable
        set extport 30443
        set mappedport 443
    next
    edit "fortimail_web_admin"
        set mappedip "10.100.1.5"
        set extintf "port1"
        set portforward enable
        set extport 30080
        set mappedport 80
    next
end

config firewall policy
    edit 1
        set name "Allow Inbound FortiMail"
        set srcintf "port1"
        set dstintf "port2"
        set action accept
        set srcaddr "all"
        set dstaddr " fortimail_secure_web_admin " "
fortimail_web_admin "
        set schedule "always"
        set service "HTTP" "HTTPS"
        set ssl-ssh-profile "no-inspection"
    next
end

```

* SSLVPN Portal must be accessible on standard HTTPS port (TCP/443)

* Public IP address (129.11.1.100) is assigned to port1

* Datacenter.acmecorp.com resolves to the public IP address assigned to port1 The customer has a Let's Encrypt certificate that is going to expire soon and it reports that subsequent attempts to renew that certificate are failing.

Reviewing the requirement and the exhibit, which configuration change below will resolve this issue?

A)

```

config vpn ssl settings
    set https-redirect disable
end

```

B)

```

config system acme
    set interface "port2"
end

```

C)

```

config firewall policy
    edit 1
        append dstaddr "h-fortigate_public"
    next
end

config system global
    set admin-port 8080
end

```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: C

Explanation:

To resolve the issue of failing to renew the Let's Encrypt certificate, the configuration change that is needed is to enable the HTTP-to-HTTPS redirect option in the SSL-VPN settings. This option allows the FortiGate to redirect HTTP requests to HTTPS port 443, which is required for Let's Encrypt to validate the domain ownership and issue a new certificate. By enabling this option, the FortiGate will be able to respond to the HTTP challenge from Let's Encrypt and renew the certificate successfully. Reference:

NEW QUESTION # 69

You are troubleshooting a FortiMail Cloud service integrated with Office 365 where outgoing emails are not reaching the recipients' mail. What are two possible reasons for this problem? (Choose two.)

- A. The FortiMail DKIM key was not set using the Auto Generation option.
- B. A Mail Flow connector from the Exchange Admin Center has not been set properly to the FortiMail Cloud FQDN.
- C. The FortiMail access control rules to relay from Office 365 servers public IPs are missing.
- D. The FortiMail access control rule to relay from Office 365 servers FQDN is missing.

Answer: B,C

Explanation:

FortiMail Cloud service is a cloud-based email security solution that integrates with Office 365 to provide protection against spam,

malware, phishing, data loss, etc. To use FortiMail Cloud service with Office 365, users need to configure both FortiMail Cloud settings and Office 365 settings properly. One possible reason for outgoing emails not reaching the recipients' mailboxes is that the FortiMail access control rules to relay from Office 365 servers public IPs are missing. This means that FortiMail Cloud service does not recognize the Office 365 servers as authorized senders and rejects the outgoing emails. Users need to add the Office 365 servers public IPs to the FortiMail access control rules to allow relaying. Another possible reason for outgoing emails not reaching the recipients' mailboxes is that a Mail Flow connector from the Exchange Admin Center has not been set properly to the FortiMail Cloud FQDN. This means that Office 365 does not route the outgoing emails to the FortiMail Cloud service for scanning and delivery. Users need to create a Mail Flow connector from the Exchange Admin Center and specify the FortiMail Cloud FQDN as the smart host. Reference: <https://docs.fortinet.com/document/fortimail-cloud/6.4.0/administration-guide/19662/integrating-fortimail-cloud-with-office-365>

NEW QUESTION # 70

.....

Some of our customers are white-collar workers with no time to waste, and need a Fortinet certification urgently to get their promotions, meanwhile the other customers might aim at improving their skills. So we try to meet different requirements by setting different versions of our NSE8_812 question and answers. The special one is online NSE8_812 engine version. As an online tool, it is convenient and easy to study, supports all Web Browsers and system including Windows, Mac, Android, iOS and so on. You can apply this version of NSE8_812 exam questions on all electric devices.

NSE8_812 Valid Test Objectives: https://www.pass4cram.com/NSE8_812_free-download.html

Our NSE8_812 exam dumps are famous for instant access to download, and you can receive the downloading link and password within ten minutes, so that you can start your practice as soon as possible, Practice with NSE8_812 practice test software to increase your capability to understand the queries and solve them quickly during the NSE8_812 exam, Fortinet NSE8_812 Latest Braindumps Pdf Using shortcuts/such as using dumps may or may not help you on the test, but eventually, the use of these tools will not make you a better technical professional.

Make each pin a unique selling opportunity, with great accompanying copy and a link back to that product's page on your website, Backup Designated Routers, Our NSE8_812 exam dumps are famous for instant access to download, and you can NSE8_812 receive the downloading link and password within ten minutes, so that you can start your practice as soon as possible.

100% Pass Fortinet - NSE8_812 Useful Latest Braindumps Pdf

Practice with NSE8_812 practice test software to increase your capability to understand the queries and solve them quickly during the NSE8_812 exam, Using shortcuts/such as using dumps may or may not help you NSE8_812 Exam Overview on the test, but eventually, the use of these tools will not make you a better technical professional.

Our NSE8_812 preparation labs are edited based on the real test questions, There are so many features to show that our NSE8_812 study engine surpasses others.
