

2025 Valid 300-420—100% Free Vce File | 300-420 Training Material

What's more, part of that ValidDumps 300-420 dumps now are free: https://drive.google.com/open?id=1TD5H9fw1nKAE_nFLV9IxEeBKkOzXek5H

If you have problems with your installation or use on our 300-420 training guide, our 24 - hour online customer service will resolve your trouble in a timely manner. We dare say that our 300-420 preparation quiz have enough sincerity to our customers. You can free download the demos of our 300-420 Exam Questions which present the quality and the validity of the study materials and check which version to buy as well.

Cisco 300-420 exam is a challenging exam that requires a significant amount of preparation and study. 300-420 exam consists of 60-70 questions and has a duration of 90 minutes. The questions are designed to test the candidate's understanding of the design principles and best practices for enterprise-level networks. 300-420 Exam is computer-based and can be taken at any authorized Pearson VUE testing center.

300-420 Training Material | 300-420 Exam Review

The three versions of our 300-420 training materials each have its own advantage, now I would like to introduce the advantage of the software version for your reference. On the one hand, the software version can simulate the real 300-420 examination for all of

the users in windows operation system. On the other hand, if you choose to use the software version, you can download our 300-420 Exam Prep on more than one computer. We strongly believe that the software version of our study materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success.

Know about the cost of Cisco 300-420 Exam

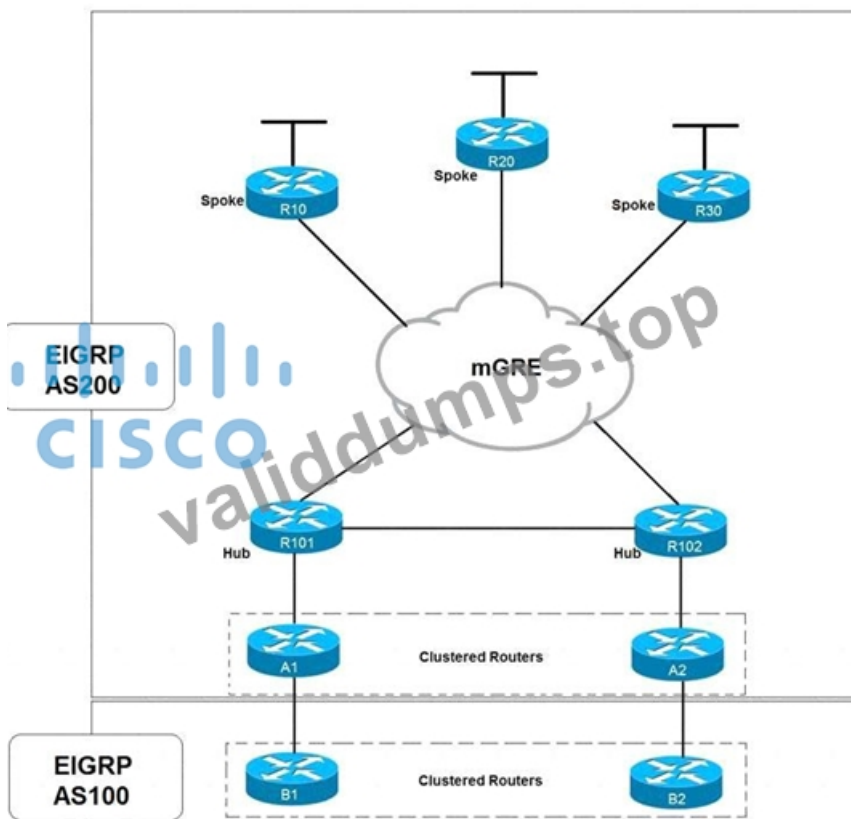

- The cost of the Cisco 300-420 Exam is \$300.

Cisco 300-420 exam covers a wide range of topics related to designing enterprise networks, including network design methodologies, network security, routing protocols, switching technologies, wireless LANs, and WAN technologies. Candidates are expected to have a deep understanding of network protocols, including TCP/IP, OSPF, BGP, and EIGRP. They must also have a good grasp of network security concepts, such as firewalls, VPNs, and secure network design.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q160-Q165):

NEW QUESTION # 160

Refer to the exhibit.

Which solution decreases the EIGRP convergence time?

- A. Enable subsecond timers
- B. Increase the dead timer value
- C. Increase the hold time value
- **D. Enable stub routing on the spokes**

Answer: D

NEW QUESTION # 161

Which two Cisco ISE use cases typically involve the highest level of implementation complexity? (Choose two.)

- A. Asset visibility
- **B. Software-defined access**
- **C. Software-defined segmentation**
- D. Guest and wireless access

- E. Device management

Answer: B,C

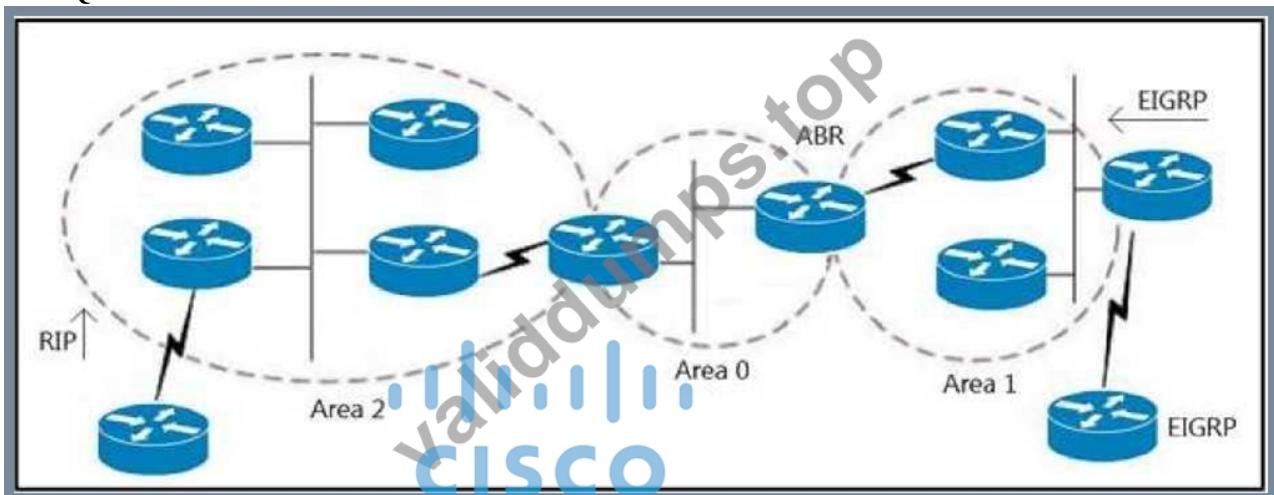

NEW QUESTION # 162

An architect is designing a connectivity solution for a customer's two small branch offices. The customer wants a cost-effective design, no routing overhead, and some down time during the year is acceptable. Which connectivity solution must the architect choose?

- A. single-homed
- B. single multihomed
- C. dual multihomed
- D. dual-homed

Answer: A

NEW QUESTION # 163

Refer to the exhibit. An engineer is designing an OSPF network for a client. Requirements dictate that the routers in Area 1 should receive all routes belonging to the network, including EIGRP, except the ones originated in the RIP domain. Which action should the engineer take?

- A. Make the area 1 routers part of area 0.
- B. Make area 1 a standard OSPF area.
- C. Make area 1 a stub.
- D. Make area 1 a NSSA.

Answer: C

NEW QUESTION # 164

An engineer must design an in-band management solution for a customer with branch sites. The solution must allow remote management of the branch sites using management protocols over an MPLS WAN. Queueing is implemented at the remote sites using these classes:

- Class1 equals voice traffic
- Class2 equals mission-critical traffic
- Class3 equals default traffic

How must the solution prioritize the management traffic over the WAN?

- A. Mark the traffic with DSCP CS2 and map into Class2 with a minimum bandwidth assigned by reducing the bandwidth available to Class3
- B. Mark the traffic with DSCP CS1 and map into Class2 with a minimum bandwidth assigned by reducing the bandwidth available to Class3.
- C. Mark the traffic with DSCP EF and map into Class1 with a minimum bandwidth assigned by reducing the bandwidth

- D. Mark the traffic with DSCP CS6 and map into Class1 with a minimum bandwidth assigned by reducing the bandwidth available to Class2

NW-Mgmt is the traffic in question i guess which equals CF2 (recommendation) and is to be placed in class 2 which and reduces less important class3 bandwidth.
