

2025 Workday Latest Workday-Prism-Analytics Exam Simulator - Workday Pro Prism Analytics Exam Realistic Latest Practice Questions 100% Pass

BONUS!!! Download part of Dumpexams Workday-Prism-Analytics dumps for free: <https://drive.google.com/open?id=1dOh5QTWqOY0z8t7rL92LjlgZsxeLbZ9x>

Dumpexams is the door to success. Dumpexams Workday Workday-Prism-Analytics Test Questions are very similar to the actual test. At the same time, our Dumpexams Workday Workday-Prism-Analytics test questions and test answers are studied, based on the same syllabus. And we are also constantly upgrading our training materials. So, pass rate is 100% and high quality guarantee!

As the labor market becomes more competitive, a lot of people, of course including students, company employees, etc., and all want to get Workday-Prism-Analytics authentication in a very short time, this has developed into an inevitable trend. Each of them is eager to have a strong proof to highlight their abilities, so they have the opportunity to change their current status, including getting a better job, have higher pay, and get a higher quality of material, etc. It is not easy to qualify for a qualifying exam in such a short period of time. Our company's Workday-Prism-Analytics learning material is very good at helping customers pass the exam and obtain a certificate in a short time, and now I'm going to show you our Workday-Prism-Analytics Learning materials.

>> Latest Workday-Prism-Analytics Exam Simulator <<

Latest Workday-Prism-Analytics Exam Simulator - Workday Workday-Prism-Analytics Latest Practice Questions: Workday Pro Prism Analytics Exam Pass Certify

If a person fails despite proper Workday Pro Prism Analytics Exam Workday-Prism-Analytics test preparation and using Workday-Prism-Analytics practice exam material, Dumpexams provides a money-back guarantee. If a person fails despite proper Workday Pro Prism Analytics Exam Workday-Prism-Analytics test preparation and using Workday-Prism-Analytics practice exam material, Dumpexams provides a money-back guarantee. Dumpexams offers three months of free updates if the Workday Pro Prism Analytics Exam exam content changes after the purchase of Workday Pro Prism Analytics Exam valid dumps. Dumpexams wants to save your time and money, so the authentic and accurate Workday Pro Prism Analytics Exam Workday-Prism-Analytics Exam Questions help candidates to pass their Workday-Prism-Analytics certification test on their very first attempt.

Workday Pro Prism Analytics Exam Sample Questions (Q10-Q15):

NEW QUESTION # 10

You want to create a Prism calculated field to change the field type to date data using the TO_DATE function.

The field from Workday is numeric data and you will use the Manage Fields stage to prepare the data for use in the function. What will you need to change about the field in the Manage Fields stage?

- A. Input Type
- B. Output Type
- C. Input Name

- D. Output Name

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, the TO_DATE function in a calculated field is used to convert a string or compatible data type into a date. However, in this scenario, the field from Workday is numeric, and the TO_DATE function typically requires a string input (e.g., a numeric value like 20230101 needs to be converted to a string like "20230101" before applying TO_DATE). According to the official Workday Prism Analytics study path documents, to prepare the numeric field for use with the TO_DATE function, you must first use a Manage Fields stage to change the field's Output Type to Text. The Manage Fields stage allows you to modify the field's properties, and changing the Output Type from Numeric to Text converts the numeric values into a string format that the TO_DATE function can then process (e.g., TO_DATE ([Field_Name], "YYYYMMDD")).

The other options are not relevant:

* B. Output Name: Changing the Output Name renames the field but does not address the field type compatibility required for the TO_DATE function.

* C. Input Type: The Manage Fields stage does not modify an "Input Type"; it adjusts the Output Type to transform the field as it moves through the pipeline.

* D. Input Name: There is no "Input Name" property in the Manage Fields stage; this option is not applicable.

By changing the Output Type to Text in the Manage Fields stage, the numeric field is converted to a string, making it compatible with the TO_DATE function for creating a date field in the calculated field.

NEW QUESTION # 11

You are asked to produce a Prism data source, which is going to be used in a matrix report that should display the minimum, maximum, total, average, and the median purchase order amount by location and month. What should you do to achieve the desired result?

- **A. Publish your detail data and build the summarizations in the matrix report.**
- B. Publish your detail data and build the summarizations in the advanced report.
- C. Add two Group By stages to your derived dataset.
- D. Add a Group By stage to your derived dataset.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a matrix report in Workday is designed to display summarized data in a grid format, with built-in capabilities to calculate aggregations like minimum, maximum, total, average, and median. According to the official Workday Prism Analytics study path documents, to produce a Prism data source for a matrix report that needs to display the minimum, maximum, total, average, and median purchase order amount by location and month, you should publish your detail data and build the summarizations in the matrix report (option A).

Publishing the detail data (i.e., the raw purchase order data with fields like location, month, and amount) as a Prism data source allows the matrix report to access the granular data. The matrix report can then apply the required aggregations (MIN, MAX, SUM, AVG, MEDIAN) directly, grouping by location and month as specified in the report configuration. This approach leverages Workday's reporting capabilities, reducing the need for additional transformations in Prism and ensuring flexibility for future reporting needs.

The other options are less efficient:

* B. Add a Group By stage to your derived dataset: A Group By stage in the derived dataset can compute some aggregations (e.g., SUM, AVG), but Prism does not natively support calculating the median in a Group By stage, and it would require multiple stages or calculated fields to compute all metrics, making it less practical than using the matrix report.

* C. Publish your detail data and build the summarizations in the advanced report: While an advanced report can perform some summarizations, it is not as well-suited as a matrix report for displaying multiple aggregations (like median) in a grid format by location and month.

* D. Add two Group By stages to your derived dataset: Using two Group By stages is unnecessary and still does not address the limitation of calculating the median in Prism, making this approach overly complex.

Publishing the detail data and letting the matrix report handle the summarizations is the most efficient and effective way to meet the

requirements.

Workday Prism Analytics Training Guide, Module: Integrating Prism with Workday Reports, Subtopic: Leveraging Matrix Reports for Aggregations

NEW QUESTION # 12

The final derived dataset in a Prism pipeline is complete and ready to publish. What should be done prior to publishing?

- A. Create a table without the Enable for Analysis checkbox selected.
- B. Add a Group By stage to the final derived dataset to add summary calculations.
- C. Create a derived dataset with the PDS suffix.
- **D. Edit the Dataset API Name to reflect in the name of the Prism data source.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, before publishing a derived dataset as a Prism data source (PDS), it's important to ensure that the dataset is properly configured for downstream use. According to the official Workday Prism Analytics study path documents, one key step to take prior to publishing is to edit the Dataset API Name to reflect in the name of the Prism data source (option D). The Dataset API Name determines the name of the published Prism data source, which is used in reporting, discovery boards, and integrations. Setting a meaningful and descriptive API name (e.g., "Expense_Reports_by_Location") ensures that the data source is easily identifiable and aligns with naming conventions, improving usability and manageability in the Workday ecosystem. This step is a best practice to avoid confusion and ensure clarity for report writers and analysts.

The other options are not required or relevant:

* A. Add a Group By stage to the final derived dataset to add summary calculations: Adding a Group By stage is not mandatory unless the use case specifically requires summarizations, which is not indicated here.

* B. Create a table without the Enable for Analysis checkbox selected: Creating a new table is unnecessary, as the dataset is already complete, and the "Enable for Analysis" checkbox is relevant for real-time updates, not a requirement for publishing a derived dataset.

* C. Create a derived dataset with the PDS suffix: Creating a new dataset is not needed, as the final derived dataset is already prepared, and adding a "PDS" suffix is not a required step for publishing.

Editing the Dataset API Name ensures the Prism data source has a clear and meaningful name, facilitating its use in reporting and analytics.

NEW QUESTION # 13

What task or report should you access to view a Prism data source?

- A. Edit Dataset Transformations task
- B. Edit Data Source Security task
- **C. View Prism Data Source report**
- D. View Dataset Details report

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Prism data source represents the published dataset that is available for reporting and analytics within the Workday ecosystem. According to the official Workday Prism Analytics study path documents, the "View Prism Data Source" report is the specific task or report designed to allow users to view the details of a Prism data source. This report provides comprehensive information about the data source, including its metadata, structure, and associated attributes, enabling users to understand the data available for reporting purposes.

The other options do not serve this purpose. The "Edit Dataset Transformations task" is used to modify the transformation logic applied to a dataset, not to view a data source. The "Edit Data Source Security task" focuses on managing security settings for a

data source, such as access permissions, rather than viewing its contents. Similarly, the "View Dataset Details report" provides information about a dataset (including its metadata and sample rows) but does not specifically address the published Prism data source, which is a distinct entity created after a dataset is published.

The "View Prism Data Source" report is the correct choice as it directly aligns with the need to inspect the properties and structure of a Prism data source, ensuring users can verify its suitability for reporting or integration with Workday reports.

NEW QUESTION # 14

A Prism data administrator combined data from multiple sources down to a final derived dataset, including current worker data.

There is a new requirement to append historical worker data to the dataset in a uniform layout. The historical worker data includes some, but not all, fields that align with the current worker data.

Using current worker data as the primary pipeline, how can the historical worker data points be brought in?

- A. Add a Union stage.
- B. Add a Join stage with an Inner Join.
- C. Add a Join stage with a Right Outer Join.
- D. Add a Join stage with a Left Outer Join.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, when the goal is to append data from one dataset to another in a uniform layout, such as combining current worker data with historical worker data, a Union stage is the appropriate transformation. According to the official Workday Prism Analytics study path documents, a Union stage is used to append rows from one pipeline to another, stacking the data vertically while aligning fields based on their names and types. In this scenario, the current worker data (primary pipeline) and historical worker data (secondary pipeline) share some fields, and a Union stage will combine the rows from both datasets into a single dataset. Fields that exist in one pipeline but not the other will have NULL values for the rows where they are not present, ensuring a uniform layout without losing data.

The other options are not suitable for this requirement:

* A. Add a Join stage with a Right Outer Join: A Right Outer Join would include all rows from the historical worker data and only matching rows from the current worker data, which does not align with the goal of appending all data in a uniform layout.

* C. Add a Join stage with a Left Outer Join: A Left Outer Join would include all rows from the current worker data and matching rows from the historical worker data, but this is not an append operation; it's a matching operation based on a join condition, which isn't specified here.

* D. Add a Join stage with an Inner Join: An Inner Join would only include rows where matches exist between the two datasets, potentially excluding non-matching historical or current worker data, which does not meet the requirement to append all data.

The Union stage is the correct approach to append historical worker data to the current worker data, ensuring all rows are included in a uniform layout, with NULLs filling in for missing fields.

NEW QUESTION # 15

.....

Workday Certified professionals are often more sought after than their non-certified counterparts and are more likely to earn higher salaries and promotions. Moreover, cracking the Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) exam helps to ensure that you stay up to date with the latest trends and developments in the industry, making you more valuable assets to your organization.

Workday-Prism-Analytics Latest Practice Questions: <https://www.dumpexams.com/Workday-Prism-Analytics-real-answers.html>

Moreover our Workday-Prism-Analytics test guides provide customers with supplement service-mock test, which can totally inspire

We can meet all your requirements and solve all your problems by our Workday-Prism-Analytics certification guide, Unlike with most iPhone plans, activating an iPad with a cellular data plan does not require signing a long-term service contract.

Moreover our Workday-Prism-Analytics test guides provide customers with supplement service-mock test, which can totally inspire them to study hard and check for defects during their learning process.

If you just fix your eyes on the questions and answers of our Workday Workday-Prism-Analytics Guide and make sure that you've learnt them all, your goal is just at hand, And our Workday-Prism-Analytics learning questions are well-written to be understood by the customers all over the world.
