## PMI Project Management Office Certified Professional Sample Questions (Q48-Q53):

### NEW QUESTION # 48

A manufacturing company is in the process of establishing its PMO, and the PMO professional leading it recognizes that securing executive sponsorship and ongoing support is crucial for the PMO's success and mandate.

How should the PMO professional effectively secure and maintain executive sponsorship for the PMO?

- A. Ensure the PMO follows the newest PMO models, providing a comprehensive set of strategic services that should be implemented to guarantee long-term success and gain executive sponsorship.
- B. Emphasize that the PMO is using recommended best practices and frameworks, showcasing its operational excellence to win executive support.
- C. Rely on the company's leadership to naturally recognize the PMO's value over time without needing to actively seek out sponsorship or support, assuming the results will speak for themselves.
- D. Align the PMO's objectives and services with the company's strategic goals and focus on delivering quick wins to ensure initial attention and support.

### Answer: D

Explanation:

Securing and maintaining executive sponsorship requires the PMO to be strategically aligned with the organization's goals and to demonstrate tangible value quickly. Aligning objectives and services with strategic priorities ensures relevance and builds credibility with executives. Delivering quick wins fosters trust and reinforces the PMO's positive impact.

Passive reliance on leadership recognition (Option A) risks neglect. Emphasizing best practices alone (Option B) without alignment or demonstrated value is insufficient. Implementing comprehensive models (Option D) may overwhelm resources and delay results. PMI-PMOCP stresses that executive engagement is strengthened through strategic alignment and early value delivery.

### NEW QUESTION # 49

An enterprise organization recently initiated a new project. A PMO professional made sure that all pertinent project documentation was prepared and that all project management procedures were carried out in accordance with the accepted practices.

What source should the PMO professional use to identify stakeholders?

- A. The job descriptions and the amount of experience required for potential stakeholders.
- B. The necessary management approaches and measures needed to properly include stakeholders.
- C. The information about the project's stakeholders that is included in the business documentation.
- D. The plan for managing communications to gather information about project stakeholders.

### Answer: D

Explanation:

The communications management plan is the primary source that identifies stakeholders, their information needs, and communication strategies. PMI-PMOCP emphasizes the importance of using this plan to understand who stakeholders are, how to engage them, and tailor communication accordingly.

Job descriptions (option B) or business documentation (option C) may provide limited stakeholder insight but lack engagement and communication context. Management approaches (option D) describe strategies but are not primary identification sources.

### NEW QUESTION # 50

Over the past 5 years, the enterprise PMO (EPMO) has grown and consistently exceeds expectations. It receives excellent customer feedback, with customers regularly sharing their successes across the organization, increasing the PMO's influence. The CEO has tasked the PMO professional with advancing the organization's digital transformation in project management to the next level.

How should the PMO professional elevate the digital transformation culture in project management?

- A. Conduct a benchmark analysis to identify emerging digital technologies.
- B. Analyze the needs of different PMO customers to understand which digital solutions could be required.
- **C. Identify the most engaged PMO customers and invite them to experiment with new digital initiatives.**
- D. Prepare a roadmap of new digital initiatives to be implemented in the upcoming years.

**Answer: C**

Explanation:

Driving digital transformation effectively starts with engaging the most engaged customers to pilot and experiment with new digital initiatives, creating early success stories and advocates. This approach helps build momentum, gathers practical feedback, and drives adoption.

Benchmarking (Option B), needs analysis (Option C), and roadmapping (Option D) are important but typically follow the initial experimental phase.

#### **NEW QUESTION # 51**

An organization is going through a transformation process that will impact its processes and employee job descriptions. The PMO professional needs to ensure continuous improvement of the organization's PMO in these turbulent times.

What should the PMO professional do in this situation?

- A. Survey senior management and other PMO stakeholders to evaluate their satisfaction with PMO.
- B. Regularly review the internal project management methodologies, processes, and tools.
- C. Ask senior management to be involved in defining job descriptions for the project managers.
- **D. Continuously reassess which PMO functions are in scope according to the new organizational changes.**

**Answer: D**

Explanation:

During organizational transformations, the PMO professional must continuously reassess the scope and functions of the PMO to ensure it remains aligned with evolving organizational structures and priorities. This dynamic adjustment enables the PMO to stay relevant and contribute effectively to change initiatives.

While reviewing methodologies and surveying stakeholders are important, focusing on the PMO's scope ensures its services and role evolve appropriately. Engaging senior management in job descriptions (Option A) is less direct to PMO continuous improvement.

#### **NEW QUESTION # 52**

A new portfolio management tool was introduced as the organization took on more projects. A few months later, the PMO professional observes that the organization is paying for more functionality than the project teams are using.

What should the PMO professional do first?

- A. Review the tool specification to ensure it fits the initial user requirements.
- B. Schedule weekly reviews of tool usage and remove unnecessary functionalities.
- C. Arrange additional training sessions to ensure the adoption of all features.
- **D. Survey end users to understand the tool's usage patterns.**

## Answer: D

Explanation:

Understanding actual tool usage patterns via end-user surveys is critical before making decisions about training, feature removal, or specification review. This approach gathers data to diagnose adoption barriers or misalignments.

Training (Option A), reviews (Option B), and specification checks (Option C) are appropriate later but depend on understanding user behavior.

PMI-PMOCP Lifecycle Management recommends data-driven analysis to optimize tool deployment.
