

[2026] CWNP CWDP-305 Questions: Fosters Your Exam Passing Skills

BONUS!!! Download part of PassCollection CWDP-305 dumps for free: https://drive.google.com/open?id=1TiCnPG0CTGndTe9i974nMPDfWCHMO_2

The Certified Wireless Design Professional (CWDP-305) certification exam is one of the top-rated and career-oriented certificates that are designed to validate an CWNP professional's skills and knowledge level. These Certified Wireless Design Professional (CWDP-305) practice questions have been inspiring those who want to prove their expertise with the industrial-recognized credential. By cracking it you can gain several personal and professional benefits.

Besides CWNP CWDP-305 exam is popular, Cisco, IBM, HP and so on are also accepted by many people. If you want to get CWDP-305 certificate, PassCollection dumps can help you to realize your dream. Not having confidence to pass the exam, you give up taking the exam. You can absolutely achieve your goal by PassCollection test dumps. After you obtain CWDP-305 certificate, you can also attend other certification exams in IT industry. PassCollection questions and answers are at your hand, all exams are not a problem.

PassCollection brings the perfect CWDP-305 PDF Questions that ensure your Certified Wireless Design Professional CWDP-305 exam success on the first attempt. We have introduced three formats of our Certified Wireless Design Professional CWDP-305 Exam product. These formats are Certified Wireless Design Professional CWDP-305 web-based practice exam, CWDP-305 desktop practice test software, and CWDP-305 PDF Dumps.

CWNP CWDP-305 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Define Specifications for the WLAN: This section of the exam measures the skills of a Wireless Network Planner and focuses on gathering business and technical requirements needed for designing wireless LANs. It includes understanding user needs, regulatory and safety constraints, and environmental factors. Candidates are expected to identify critical elements such as coverage, capacity, security, and device compatibility, and to analyse existing infrastructure and documentation to ensure a successful design strategy.

Topic 2	<ul style="list-style-type: none"> • Design the WLAN: This section of the exam measures the skills of a WLAN Design Engineer and covers the process of selecting configurations, architecture types, and wireless components to meet business and technical requirements. It includes using design software, selecting access points and antennas, and applying methodologies such as predictive or measured design. Candidates must demonstrate the ability to produce effective documentation and configure features like QoS, roaming security, and network services for different types of client devices and applications.
Topic 3	<ul style="list-style-type: none"> • Deploy the WLAN: This section of the exam measures the skills of a WLAN Implementation Specialist and involves overseeing the deployment phase of wireless networks. It focuses on understanding deployment procedures for various WLAN architectures, configuring supporting infrastructure, and verifying proper installation. The section also addresses physical installation checks, documentation handover, and quality assurance practices during ongoing installations.
Topic 4	<ul style="list-style-type: none"> • Validate and Optimize the WLAN: This section of the exam measures the skills of a WLAN Optimization Specialist and assesses the ability to test, validate, and fine-tune wireless networks post-deployment. Key tasks include RF validation surveys, performance testing, troubleshooting connectivity and security issues, and applying appropriate physical or RF adjustments. It also involves client testing and final project handover, including documentation, knowledge transfer, and meetings to ensure long-term WLAN success.

CWNP Certified Wireless Design Professional Sample Questions (Q60-Q65):

NEW QUESTION # 60

When installing APs on high ceilings, what should be the most common PPE to be used?

- A. Clean suits, gloves and jacket
- B. Clean suits, masks and glasses
- **C. Hardhat, high visibility vest and body belt**
- D. Glasses, gloves and jacket

Answer: C

NEW QUESTION # 61

One of your customers plans on providing wireless coverage to a warehouse facility. After performing an initial walkthrough, you collect the following information:

The central part of the warehouse is between 400 and 600 feet (122 to 183 meters) from the warehouse switches mounted on the walls.

#The warehouse storage is composed of metallic racks with varying inventory levels and contents, from electronics and plastic toys to food pallets and juice bottles.

#Workers need basic data coverage from their working location, and are not highly mobile. They usually work from one single aisle, and their laptop is on a cart with wheels.

What would be your one recommendation to provide coverage to the central area of the warehouse?

- A. Position APs along the walls, and equip the APs with Yagi antennas to cover the central area.
- B. Equip workers laptops with a directional antenna and install APs less than 328 feet (100m) away from the switch.
- **C. In this case, extend the cable length just beyond 328 feet (100 m) and position APs as close as possible to the central area of the warehouse.**
- D. Install APs for client access in the central area and use a mesh backhaul link to connect to the DS.

Answer: C

NEW QUESTION # 62

Which one of the following options is a dedicated throughput testing application, usable on both the WLAN and LAN?

- A. Wirestart
- B. NLTSH

- C. iPert
- D. WLAN scanner

Answer: C

NEW QUESTION # 63

Main Topic: Protocol and Spectrum Analysis

Question:

A high power radio system transmits at 40,000 Watts. What is this power in dBm? Solve this without a calculator.

- A. 46 dBm
- B. 66 dBm
- C. 76 dBm
- D. 56 dBm

Answer: C

NEW QUESTION # 64

Main Topic: Advanced Site Surveys

Question:

You have been tasked with performing safety and operations training for outdoor bridge link installation. The antennas are to be installed on a 70-foot tower on one end and the rooftop of an office building on the other end.

What might be required for the tower installation?

- A. Special antennas that avoid reflections on the tower poles.
- B. APs that are designed to operate above 70 feet.
- C. Special RF cables that will not create loss incurred by the metal tower construction.
- D. Hiring a certified tower installer.

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

Installing antennas on a 70-foot tower involves working at significant heights, which presents safety risks and requires specialized skills. Therefore:

A: Hiring a certified tower installer: It is essential to employ professionals who are certified and trained in tower climbing and installation to ensure compliance with safety regulations and standards, such as those set by OSHA and ANSI.

B: Special antennas that avoid reflections on the tower poles: While antenna placement is important, standard antennas can be used with proper installation techniques to minimize reflections.

C: APs that are designed to operate above 70 feet: Access points are designed to operate within specific environmental conditions, but the height of installation does not typically necessitate special APs.

D: Special RF cables that will not create loss incurred by the metal tower construction: Standard RF cables are designed to function effectively in various installations; however, proper cable selection and installation practices are important to minimize signal loss.
