D-DS-FN-23 VCE Exam Guide & D-DS-FN-23 Latest Practice Questions & D-DS-FN-23 Online Exam Simulator

Our valid D-DS-FN-23 exam dumps will provide you with free dumps demo with accurate answers that based on the real exam. These D-DS-FN-23 real questions and answers contain the latest knowledge points and the requirement of the certification exam.

High quality and accurate of D-DS-FN-23 Pass Guide will be 100% guarantee to clear your test and get the certification with less time and effort.

EMC D-DS-FN-23 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Initial Analysis of the Data: This section of the exam measures the skills of a Data Science Enthusiast and focuses on the first steps in analyzing data. It explains how basic R commands are used for exploration, discusses important statistical measures and visualizations, and describes hypothesis testing techniques for evaluating models.
Topic 2	<ul style="list-style-type: none">Advanced Analytics for Big Data - Technology and Tools: This section of the exam measures the skills of a Data Science Enthusiast and addresses the technological challenges associated with Big Data. It introduces tools and technologies such as MapReduce, Hadoop, the Hadoop ecosystem, in-database analytics, SQL essentials, and advanced SQL techniques like window functions and MADlib.
Topic 3	<ul style="list-style-type: none">Data Analytics Lifecycle: This section of the exam measures the skills of an Entry-Level Data Analyst and explains the purpose and phases of the data analytics lifecycle. It includes understanding key activities and roles involved in the discovery, data preparation, model planning, and model building phases to successfully manage analytics projects.

EMC Dell Data Science Foundations Sample Questions (Q98-Q103):

NEW QUESTION # 98

In a Logistic Regression, the coefficient for "age" equals -3.

What is the correct interpretation of the Logistic Regression coefficient, holding all other variables constant?

- A. For every 1 unit increase in age, the dependent variable is multiplied by -3
- B. For every 1 unit increase in age, the dependent variable is reduced by 3 units
- C. When age decreases by 3 units, the odds of response are multiplied by $e(-3)$ or 0.05
- D. When age increases by 1 unit, the odds of response are multiplied by $e(-3)$ or 0.05

Answer: D

NEW QUESTION # 99

You have been assigned to perform a study of the daily revenue effect of a pricing model of online transactions. All data currently available to you has been loaded into your analytics database. This includes revenue data, pricing data, and online transaction data. You discover that all data comes in different levels of granularity. The transaction data has timestamps consisting of day, hour, minutes, and seconds. Pricing is stored at the daily level and revenue data is only reported monthly.

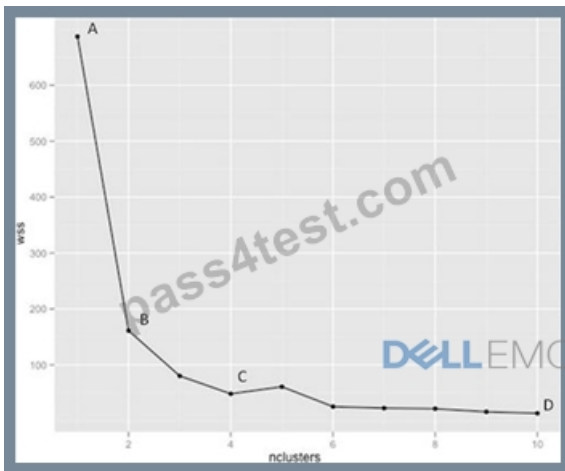

What is the next step?

- A. Aggregate all data to the monthly level in order to create a monthly revenue model.
- B. Report back to the business owner that the current data model does not support the business question.
- C. Disregard revenue as the key reason in the pricing model and create a daily model based on pricing and transactions only.
- D. Interpolate a daily model for revenue from the monthly revenue data.

Answer: B

NEW QUESTION # 100

The graph represents the plot of WSS as a function of K for a K-means clustering analysis you performed.

Which point in the graph represents the most optimal value of K?

- A. B
- **B. C**
- C. D
- D. A

Answer: B

NEW QUESTION # 101

What characterizes the Hadoop Distributed File System?

- A. Master/ slave system designed to run on custom designed hardware
- B. Peer to peer system designed to run on commodity hardware
- **C. Master/ slave system designed to run on commodity hardware**
- D. Peer to peer system designed to run on custom designed hardware

Answer: C

Explanation:

The Hadoop Distributed File System (HDFS) is a master/slave system designed to run on commodity hardware, meaning it can efficiently store large volumes of data across inexpensive, off-the-shelf hardware.

NEW QUESTION # 102

Which two analytical methods can be used for dealing with categorical variables with a large number of levels?

- A. Logistic Regression and ARMA
- B. Naïve Bayesian and Linear Regression
- **C. Naïve Bayesian and Decision Tree**
- D. Linear Regression and Association Rules

Answer: C

NEW QUESTION # 103

.....

There is no doubt that we all dream of working for top companies around the globe. Some people make it through but some keep on thinking about how to break that glass. If you are among those who belong to the latter category, you should start the preparations for the Dell Data Science Foundations (D-DS-FN-23) certification exam to improve your knowledge, expertise and crack even the toughest interview easily.
