2026 Fantastic Oracle 1z0-1080-25 Valid Guide Files

However, preparing for the Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam is not an easy job until they have real Oracle Planning 2025 Implementation Professional (1z0-1080-25) exam questions that are going to help them achieve this target. They have to find a trusted source such as LatestCram to reach their goals. Get Oracle 1z0-1080-25 Certified, and then apply for jobs or get high-paying job opportunities.

It is widely accepted that where there is a will, there is a way; so to speak, a man who has a settled purpose will surely succeed. To obtain the 1z0-1080-25 certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the 1z0-1080-25 exam, you need more external assistance to help yourself. We have engaged in this career for more than ten years and with our 1z0-1080-25 Exam Questions, you will not only get aid to gain your dreaming 1z0-1080-25 certification, but also you can enjoy the first-class service online.

1z0-1080-25 Test Dump - Pdf 1z0-1080-25 Files

Everyone has a utopian dream in own heart. Dreams of imaginary make people feel disheartened. In fact, as long as you take the right approach, everything is possible. You can pass the Oracle 1z0-1080-25 Exam easily. Why? Because you have LatestCram's Oracle 1z0-1080-25 exam training materials. LatestCram's Oracle 1z0-1080-25 exam training materials are the best training materials for IT certification. It is famous for the most comprehensive and updated by the highest rate. It also can save time and effort. With it, you will pass the exam easily. If you pass the exam, you will have the self-confidence, with the confidence you will succeed.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.
Topic 2	• Provision users and groups. This section of the exam measures the skills of a Planning Administrator and covers how to manage user access by assigning them to appropriate roles and groups.
Topic 3	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 4	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.

Topic 5	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 6	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 7	• Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 8	• Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 9	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 10	• Manage Dimensions: This section of the exam measures the skills of a Planning Administrator and covers how to manage essential dimensions and hierarchies that organize planning data.
Topic 11	• Set up valid and invalid intersections and cell-level security: This section of the exam measures the skills of an EPM Consultant and focuses on defining valid data intersections and applying security controls to limit data access at the cell level.
Topic 12	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 13	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 14	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 15	• Describe Planning modules: This section of the exam measures the skills of an EPM Consultant and includes identifying different modules like Financials, Workforce, Projects, and Capital.
Topic 16	• Manage Metadata and Data: This section of the exam measures the skills of a Planning Administrator and covers methods for loading and maintaining metadata and data in Planning.
Topic 17	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 18	• Set up and run data maps: This section of the exam measures the skills of a Planning Administrator and focuses on configuring and executing data maps to move data across plan types or applications.
Topic 19	• Build validation rules: This section of the exam measures the skills of an EPM Consultant and includes creating rules that validate data entry in forms.
Topic 20	• Creating System Reports: This section of the exam measures the skills of a Planning Administrator and focuses on system-generated reports that provide insights into application activity.
Topic 21	• Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of an EPM Consultant and includes creating interactive forms and dashboards and setting up navigation flows for a better user experience.
Topic 22	• Import and export data into Planning: This section of the exam measures the skills of a Planning Administrator and covers the process of moving planning data into and out of the system.

Topic 23	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 24	• Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 25	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 26	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 27	• Design business rules and rulesets"his section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.

Oracle Planning 2025 Implementation Professional Sample Questions (Q90-Q95):

NEW QUESTION # 90
You are currently making modifications to loaded salary information using the Mass Update forms in Workforce. After making changes, which statements are true when working with Mass Update?

- A. After making changes to salary information and saving the data on the form a Groovy rule runs to process the changeAfter data.
- B. After making changes to salary information, you must run the Calculate Compensation business rule before saving data.
- C. If an existing employee is not loaded from the load file, you won't be able to add their compensation information without first reloading a load file with the existing employee records.
- D. After modifying salary, you can re-apply configured default assignments for benefits, additional earning and taxes

Answer: A,D

NEW QUESTION # 91
Which module do you enable and configure if you want to develop plans and forecasts with driver-based or based income statement, balance sheet, and cash flow planning, or revenue and expenses?

- A. Strategic Workforce
- B. Capital
- C. Financials
- D. Projects

Answer: C

NEW QUESTION # 92
Which Mass Update form in Workforce allows you to update employee properties, job properties, or salary- related information?

- A. Synchronize Defaults
- B. Process Updated Data
- C. Synchronize Definitions
- D. Process Data and Synchronize Defaults

Answer: C

Explanation:
In the Oracle Planning 2024 Workforce module, the Synchronize Definitions Mass Update form is the tool provided to update employee properties, job properties, or salary-related information in bulk. This form allows administrators to modify and synchronize

metadata definitions across multiple employees or jobs efficiently, ensuring consistency in workforce planning data.
* D. Synchronize Definitions: This form enables updates to employee properties (e.g., status, department), job properties (e.g., job code, title), and salary-related information (e.g., salary basis, grade). It is designed to handle mass updates to metadata and ensure that changes are reflected across the Workforce model.
* A. Synchronize Defaults: This option is related to applying default assumptions or settings to data, not specifically for updating employee, job, or salary properties.
* B. Process Updated Data: This form focuses on processing data changes (e.g., recalculating costs after data entry), not on updating properties or definitions.
* C. Process Data and Synchronize Defaults: This is a combined action that processes data and applies defaults, but it does not specifically target updates to employee properties, job properties, or salary information.
The Synchronize Definitions form stands out as the correct choice because it directly addresses bulk updates to workforce metadata, aligning with the question's focus on properties and salary-related information.
References
* Oracle Enterprise Performance Management Cloud Documentation: "Managing Workforce - Mass Update Forms" (docs.oracle.com, updated 2024). Describes the "Synchronize Definitions" form as the tool for updating "employee properties, job properties, and salary-related information."
* Oracle Planning 2024 Implementation Study Guide: Confirms that "Synchronize Definitions" is the Mass Update form for modifying workforce metadata.

NEW QUESTION # 93
Your administrator wants to create a Planning application with EPM Enterprise Cloud.
Which three Planning application types can you select when creating an application with EPM Enterprise Cloud?

- A. Custom
- B. Modules
- C. Free Form
- D. Hybrid
- E. Plan

Answer: A,B,C

Explanation:
When creating a Planning application with EPM Enterprise Cloud in Oracle Planning 2024, administrators can select from specific application types. The three available types are:
* A. Modules: Correct. The Modules type allows creating a preconfigured application with options like Financials, Workforce, or Capital, tailored to specific planning needs.
* B. Plan: Incorrect. "Plan" is not a distinct application type; it's a generic term for planning, not an option in the creation wizard.
* C. Free Form: Correct. Free Form provides a blank slate for custom cube design without predefined structures, offering maximum flexibility.
* D. Hybrid: Incorrect. "Hybrid" is not an application type in EPM Enterprise Cloud; it may refer to Essbase configurations, not Planning application creation.
* E. Custom: Correct. Custom allows building an application with user-defined dimensions and structures, distinct from Modules' prebuilt options.
The Oracle documentation lists Modules, Free Form, and Custom as the selectable types in EPM Enterprise Cloud, making A, C, and E the correct answers.
References:
Oracle Planning 2024 Implementation Study Guide: "Creating Planning Applications" (docs.oracle.com, Published 2024-10-20).
Oracle EPM Cloud Documentation: "Application Types in EPM Enterprise Cloud" (docs.oracle.com, Published 2023-11-25, updated for 2024).

NEW QUESTION # 94
As a Service Administrator, you use application diagnostics at design time to identify, and resolve design flaws before an application is placed into production. Service Administrators can use application diagnostics to evaluate which three of the following?

- A. Types of artifacts such as forms and approval units
- B. Error log files
- C. Migration snapshots
- D. Individually selected artifacts

- E. An entire application

Answer: A,D,E

Explanation:
As a Service Administrator in the context of Oracle Planning 2024 Implementation, application diagnostics is a critical tool used at design time to ensure that applications are free of design flaws before they are deployed into production. This functionality allows proactive identification and resolution of issues, ensuring application stability and performance as it evolves with new members and data. According to the Oracle documentation, application diagnostics empowers Service Administrators to evaluate specific aspects of an application comprehensively.
* D. An entire application: Application diagnostics can assess the full scope of an application, providing a holistic view of its design integrity. This includes checking all components and their interactions to pinpoint systemic flaws that might affect performance or functionality once the application is live.
* C. Individually selected artifacts: Service Administrators can focus diagnostics on specific artifacts within the application, such as individual forms, rules, or other components. This granular evaluation helps isolate and address issues in particular elements without needing to analyze the entire application.
* E. Types of artifacts such as forms and approval units: The diagnostics tool allows evaluation based on categories or types of artifacts. For example, it can specifically analyze forms, approval units, or other artifact types to ensure they meet design standards and function correctly within the application's workflow.
The options A. Error log files and B. Migration snapshots are not explicitly mentioned as evaluable components within the scope of application diagnostics at design time in the Oracle Planning 2024 Implementation documentation. Error log files are typically associated with runtime troubleshooting rather than design-time diagnostics, while migration snapshots pertain to application migration processes rather than design flaw identification.
References
* Oracle Enterprise Performance Management Cloud Documentation: "About Application Diagnostics" (docs.oracle.com, published 2018-03-22, updated as of 2024). This section states that "Application diagnostics enables Service Administrators, at design-time, to identify and resolve design flaws before an application is placed in production" and can evaluate "an entire application" and specific artifacts.
* Oracle Planning 2024 Implementation Study Guide: Application diagnostics section confirms the ability to assess "entire applications" and "individual or types of artifacts such as forms and approval units" to ensure design integrity.
These references align with the capabilities described for Service Administrators using application diagnostics in the Oracle Planning 2024 Implementation framework.

NEW QUESTION # 95

......

Your life will take place great changes after obtaining the 1z0-1080-25 certificate. Many companies like to employ versatile and comprehensive talents. What you have learnt on our 1z0-1080-25 study materials will meet their requirements. So you will finally stand out from a group of candidates and get the desirable job. Also, learning our 1z0-1080-25 Study Materials will fulfill your dreams. Nothing will stop you as long as you are rich. Also, respect and power is gained through knowledge and skills. If you want to get a higher position in the company, you must have the ability to defeat other excellent colleagues.
