Reliable ISO-IEC-27001-Foundation Test Braindumps - Realistic ISO/IEC 27001 (2022) Foundation Exam Latest Mock Test Pass Guaranteed

The value of professional qualification has been shown to rise with time. For the advancement of your profession, exams like the

APMG-International exam given by APMG-International are crucial. Candidates aim to pass the ISO/IEC 27001 (2022) Foundation Exam exam on their first attempt. With APMG-International ISO-IEC-27001-Foundation Exam Questions, applicants may study for and pass their desired certification exam on the first attempt. You may use ITdumpsfree's top ISO-IEC-27001-Foundation study resources to prepare for the ISO/IEC 27001 (2022) Foundation Exam exam. The APMG-International ISO-IEC-27001-Foundation exam questions offered by ITdumpsfree are dependable and trustworthy sources of preparation.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 2	<ul style="list-style-type: none">Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 3	<ul style="list-style-type: none">Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 4	<ul style="list-style-type: none">Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 5	<ul style="list-style-type: none">Security Breaches: Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which statement describes a purpose of monitoring, measurement, analysis and evaluation according to ISO /IEC 27001?

- **A. To evaluate information security performance**
- B. To track the use of outsourced processes
- C. To monitor the use of information assets
- D. To ensure that employees and contractors are competent

Answer: A

Explanation:

Clause 9.1 requires:

"The organization shall evaluate the information security performance and the effectiveness of the information security management system." This is the central purpose of monitoring, measurement, analysis, and evaluation. Competence (B) is covered under Clause 7.2. Monitoring use of assets (C) and outsourced processes (D) may be done, but they are not the formal purpose described in the standard. Instead, performance evaluation ensures the ISMS continues to meet intended outcomes and supports continual improvement.

Thus, the verified purpose is A: To evaluate information security performance.

NEW QUESTION # 20

Which ISMS documentation is part of the minimum scope of documented information required to be managed and controlled?

- **A. Records of management decisions related to continual improvement**
- B. The budget assigned to operate the ISMS and its related allocations
- C. Third party information security awareness materials
- D. A statement of correspondence between other ISO standards and the ISMS

Answer: A

Explanation:

Clause 7.5 (Documented Information) specifies that organizations must maintain documentation necessary for the effectiveness of the ISMS. Additionally, Clause 9.3 (Management Review) requires "records of decisions related to continual improvement opportunities" as an output of management review. This is a core requirement and forms part of the documented information that must be retained and controlled. Third-party materials (B), budgets (C), and cross-reference statements to other ISO standards (D) are not required by ISO/IEC 27001. Only documents that directly demonstrate compliance, decision-making, and continual improvement are mandated. Therefore, the verified minimum required documentation includes records of management review decisions related to continual improvement, confirming answer: A.

NEW QUESTION # 21

Which activity is an operational planning and control requirement?

- A. Scheduling of second party audits
- **B. Review the consequences of unintended changes**
- C. Perform information security risk assessments at planned intervals
- D. Document information security objectives

Answer: B

Explanation:

Clause 8.1 (Operational planning and control) requires organizations to:

"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).

Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

NEW QUESTION # 22

Which item is required to be considered when defining the scope and boundaries of the information security management system?

- A. The regular activities necessary to maintain and improve the ISMS
- **B. The dependencies between activities performed by the organization**
- C. The lessons learned from the information security experiences of other organizations
- D. The level of quality to which the ISMS must adhere

Answer: B

Explanation:

Clause 4.3 (Determining the scope of the ISMS) requires consideration of:

"the external and internal issues referred to in 4.1; the requirements referred to in 4.2; and interfaces and dependencies between activities performed by the organization, and those that are performed by other organizations." This confirms that dependencies between activities are a required factor when defining scope. Options B (quality levels), C (lessons learned), and D (regular activities for improvement) are not scope requirements, though they may be relevant in planning or improvement processes.

Thus, the verified answer is A: Dependencies between activities performed by the organization.

NEW QUESTION # 23

Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- **A. ISO/IEC 27013**
- B. None of the above
- C. ISO 9001
- D. ISO/IEC 27003

Answer: A

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach. While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.
