Answer:

Explanation:

Explanation

Azure Synapse Analytics

NEW QUESTION # 386
Hotspot Question
Select the answer that correctly completes the sentence.

Answer:

Explanation:

Explanation:

An Azure virtual machine scale set can automatically increase or decrease the number of VM instances that run your application. This automated and elastic behavior reduces the management overhead to monitor and optimize the performance of your application. Also: Azure elasticity as a service is referred to a cloud service that enables in automatically scaling Azure hosted resources in par with the demand and configured parameters. It provides Azure Administrators with the ability to auto scale Azure infrastructure and resources as and when needed.
