Study Your Microsoft AZ-104 Exam with Pass-Sure AZ-104 Latest Study Materials: Microsoft Azure Administrator Efficiently

While Microsoft Azure Administrator (AZ-104) exam preparing for the Microsoft Azure Administrator (AZ-104) exam, candidates have to pay extra money when Microsoft introduces new changes. With TestSimulate you can save money in this scenario as up to 365 days of free updates are available. You can also download a free demo to understand everything about TestSimulate AZ-104 Exam Material before buying. While there are many AZ-104 exam question preparation guides available online, it's crucial to be vigilant while making purchases due to the prevalence of online scams. TestSimulate offers Microsoft AZ-104 exam questions for the best exam preparation experience.

Microsoft AZ-104 certification exam is an excellent opportunity for IT professionals to enhance their knowledge and skills in Azure administration. Microsoft Azure Administrator certification provides validation of their skills and knowledge of Azure services and helps them stand out in the job market. With thorough preparation and dedication, candidates can ace the exam and earn the Microsoft Certified: Azure Administrator Associate certification.

The AZ-104 certification exam is a great way for professionals to demonstrate their Azure administration skills and knowledge. It is an industry-recognized certification that can help candidates advance their careers in the Azure administration field. Microsoft Azure Administrator certification exam is also a stepping stone for other Microsoft Azure certifications, such as the Azure Solutions Architect and Azure DevOps Engineer certifications.

Microsoft AZ-104 Certification Exam is designed to test your knowledge and skills in managing Azure resources, implementing and managing storage and data, configuring and managing virtual networks, and monitoring and optimizing Azure solutions. AZ-104 exam is intended for individuals who have experience in implementing, managing, and monitoring Azure solutions, as well as those who have a basic understanding of cloud computing concepts and technologies.

Microsoft Azure Administrator Sample Questions (Q370-Q375):

NEW QUESTION # 370

You have an Azure subscription named AZPT1 that contains the resources shown in the following table:

You create a new Azure subscription named AZPT2.

You need to identify which resources can be moved to AZPT2.

Which resources should you identify?

- A. RVAULT1 only
- **B. VM1, storage1, VNET1, VM1Managed, and RVAULT1**
- C. VM1, storage1, VNET1, and VM1Managed only
- D. VM1 and VM1Managed only

Answer: B

Explanation:

Section: [none]

Explanation:

You can move a VM and its associated resources to a different subscription by using the Azure portal.

You can now move an Azure Recovery Service (ASR) Vault to either a new resource group within the current subscription or to a new subscription.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/move-resource-group-and-subscription>

NEW QUESTION # 371

You plan to deploy an Azure container instance by using the following Azure Resource Manager template.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the template.

Answer:

Explanation:

Explanation

Box 1: can connect to the container from any device

In the policy "osType": "window" refer that it will create a container in a container group that runs Windows but it won't block access depending on device type.

Box 2: the container will restart automatically

Docker provides restart policies to control whether your containers start automatically when they exit, or when Docker restarts.

Restart policies ensure that linked containers are started in the correct order. Docker recommends that you use restart policies, and avoid using process managers to start containers.

on-failure : Restart the container if it exits due to an error, which manifests as a non-zero exit code.

As the flag is mentioned as "on-failure" in the policy, so it will restart automatically

Reference:

<https://docs.microsoft.com/en-us/cli/azure/container?view=azure-cli-latest>

<https://docs.docker.com/config/containers/start-containers-automatically/>

NEW QUESTION # 372

You have an Azure subscription named Subscription1 that contains the storage accounts shown in the following table:

You plan to use the Azure Import/Export service to export data from Subscription1.

You need to identify which storage account can be used to export the data.

What should you identify?

- A. storage1
- B. storage3
- C. storage4
- D. storage2

Answer: C

Explanation:

Explanation

Azure Import/Export service supports the following of storage accounts:

* Standard General Purpose v2 storage accounts (recommended for most scenarios)

* Blob Storage accounts

* General Purpose v1 storage accounts (both Classic or Azure Resource Manager deployments), Azure Import/Export service supports the following storage types:

* Import supports Azure Blob storage and Azure File storage

* Export supports Azure Blob storage

Reference:

<https://docs.microsoft.com/en-us/azure/storage/common/storage-import-export-requirements>

NEW QUESTION # 373

You have an Azure subscription that contains the Azure virtual machines shown in the following table.

You configure the network interfaces of the virtual machines to use the settings shown in the following table

From the settings of VNET1, you configure the DNS servers shown in the following exhibit.

The virtual machines can successfully connect to the DNS server that has an IP address of 192.168.10.15 and the DNS server that has an IP address of 193.77.134.10.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer:

Explanation:

Explanation:

Box 1: Yes

You can specify DNS server IP addresses in the VNet settings. The setting is applied as the default DNS server(s) for all VMs in the VNet.

Box 2: No

You can set DNS servers per VM or cloud service to override the default network settings.

Box 3: Yes

You can set DNS servers per VM or cloud service to override the default network settings.

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-network/virtual-networks-faq#name-resolution-dns>

NEW QUESTION # 374

You plan to create an Azure Storage account in the Azure region of East US 2.

You need to create a storage account that meets the following requirements:

* Replicates synchronously

* Remains available if a single data center in the region fails

How should you configure the storage account? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation:

□ Box 1: Zone-redundant storage (ZRS)

Zone-redundant storage (ZRS) replicates your data synchronously across three storage clusters in a single region.

LRS would not remain available if a data center in the region fails

GRS and RA GRS use asynchronous replication.

Box 2: StorageV2 (general purpose V2)

ZRS only support GPv2.
