

Free PDF 2026 CSI CSC2: Perfect Brain Canadian Securities Course Exam2 Exam

The Formula Finder is a list of formulas in the CSC text listed by chapter.
Note! This information will NOT be provided with the final examination. You are expected to memorize the formulas before the exam.

Chapter 4

GDP Expenditure Approach $GDP = C + I + G + (X - M)$

Where:
 C = consumer expenditures
 I = business spending and investment
 G = government spending
 X - M = the amount of exports (X) and imports (M) that consumers and businesses buy during the period

Key Words: Gross Domestic Product

Inflation Rate $Inflation\ Rate = \frac{CPI\ Current\ Period - CPI\ Previous\ Period}{CPI\ Previous\ Period} \times 100$

Key Words: inflation

Chapter 7

Present Value (PV) $PV = \frac{FV}{(1+r)^n}$

Key words: income stream, coupon payment, worth

Present Value of an Annuity (APV) $APV = C \left[\frac{1 - \frac{1}{(1+r)^n}}{r} \right]$

Where:
 APV = Present value of the series of coupon payments
 C = Payment (the value of one coupon payment)
 r = Discount rate per period
 n = Number of compounding periods

Key words: income stream, coupon payment, worth

CSI Canadian Securities Course Exam2 Sample Questions (Q27-Q32):

NEW QUESTION # 27

What risk of investing in split shares is specific to a preferred shareholder?

- A. Reinvestment
- B. Leverage
- C. Volatility
- **D. Dividend cuts**

Answer: D

NEW QUESTION # 28

Which ratio, when showing a decreasing trend, suggests declining operating efficiency?

- **A. Return on common equity**
- B. Debt/equity
- C. Dividend payout
- D. Price-earnings

Answer: A

NEW QUESTION # 29

Siobhan designed an equity portfolio with a beta of 1.2. What is the expected return on the portfolio if the overall stock market return was 7.9%? (Round to the nearest decimal.)

- A. 6.3%
- B. 7.9%
- C. 9.5%
- D. 6.6%

Answer: C

NEW QUESTION # 30

What is a key feature of index-linked GICs?

- A. Redemptions can occur annually on the annual anniversary date.
- B. They guarantee a positive return regardless of market direction.
- C. They are currently regulated by National Instrument 81-102.
- D. They are insured by the CDIC

Answer: D

Explanation:

Key Features of Index-Linked GICs:

* What Are Index-Linked GICs? Index-Linked Guaranteed Investment Certificates (GICs) are fixed-term investments where returns are tied to the performance of a specific index (e.g., S&P/TSX). They offer principal protection but do not guarantee a fixed return.

* Key Feature: CDIC Insurance A notable feature of index-linked GICs is that they are insured by the Canada Deposit Insurance Corporation (CDIC) up to the applicable limits, as they qualify as GICs under CDIC guidelines. This ensures the safety of the investor's principal.

Explanation of Each Option:

* Option A (They are currently regulated by National Instrument 81-102):

* Incorrect. Index-linked GICs are not regulated under National Instrument 81-102, which governs mutual funds and other securities, not GICs.

* Option B (Redemptions can occur annually on the annual anniversary date):

* Incorrect. Index-linked GICs are typically non-redeemable before maturity unless specifically structured otherwise. Most index-linked GICs require investors to hold the investment until the end of the term.

* Option C (They guarantee a positive return regardless of market direction):

* Incorrect. While index-linked GICs guarantee the return of principal, they do not guarantee a positive return. If the linked index performs poorly, the return could be zero.

* Option D (They are insured by the CDIC):

* Correct. Index-linked GICs are covered by CDIC insurance up to its coverage limits, providing investors with principal protection even in the event of issuer default.

References to Canadian Securities Course Exam 2 Study Materials:

* Volume 2, Chapter 23 - Market-Linked Guaranteed Investment Certificates

* Discusses the structure, features, and benefits of index-linked GICs, including CDIC coverage.

* Volume 2, Chapter 17 - Overview of Managed Products

* Provides context on how GICs compare to other managed products.

NEW QUESTION # 31

What is the normal shape of a yield curve?

- A. Humped
- B. Upward slops
- C. inverted
- D. Downward slope

Answer: B

Explanation:

The normal shape of a yield curve is an upward slope, indicating that longer-term bonds offer higher yields than shorter-term bonds. This reflects the additional risk and time value of money associated with longer maturities.

* A. Downward slope: This could describe a yield curve during unusual circumstances, such as a period of market uncertainty or deflation.

* B. Inverted: An inverted yield curve, where shorter-term yields exceed longer-term yields, is a rare occurrence and often signals economic recession.

* D. Humped: A humped curve is rare and occurs when intermediate-term yields exceed both short-term and long-term yields.

Reference: CSC Volume 1, Chapter 7, "The Yield Curve - Normal Shape" discusses the upward-sloping yield curve as the standard in normal market conditions.

NEW QUESTION # 32

.....

The CSC2 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content.
