300-535 Exam Dumps - Achieve Better Results

All points of questions are correlated with the newest and essential knowledge. The second one of 300-535 test guide is emphasis on difficult and hard-to-understand points. Experts left notes for your reference, and we believe with their notes things will be easier. In addition, the new supplementary will be sent to your mailbox if you place order this time with beneficial discounts at intervals. So our 300-535 Exam Questions mean more intellectual choice than other practice materials.

Cisco Automating and Programming Cisco Collaboration Solutions Sample Questions (Q28-Q33):

NEW QUESTION # 28

```
#!/usr/bin/env python

from ydk.models.openconfig.openconfig_interfaces import Interfaces
from ydk.errors import YError

def read_interfaces(crud_service, provider):

    intf_f = Interfaces()

    try:
        interfaces = crud_service.read(provider, intf_f)
        for interface in interfaces.interface:
            print(interface.name)
    except YError:
        print('An error occurred.')
```

Refer to the exhibit. When YDK is used to interact with Cisco routers, what is the purpose of passing `intf_f` into the `crud_service.read()` method?

- A. The `Interfaces()` class acts as a NETCONF filter, which limits the data returned to that of the `openconfig:interfaces` YANG model.
- **B. It passes default values into the `crud_service`, which reconfigures all interfaces to their default configurations.**
- C. It provides the data types of the `openconfig:interfaces` model to the router for dynamic configuration of the interfaces.
- D. It locks the interfaces from modification by other active NETCONF sessions.

Answer: B

Explanation:

Section: Automation and Orchestration Platforms

NEW QUESTION # 29

Refer to the exhibit.

```
#!/usr/bin/env python

from ydk.models.openconfig.openconfig_interfaces import Interfaces
from ydk.errors import YError

def read_interfaces(crud_service, provider):

    intf_f = Interfaces()

    try:
        interfaces = crud_service.read(provider, intf_f)
        for interface in interfaces.interface:
            print(interface.name)
    except YError:
        print('An error occurred.')
```

When YDK is used to interact with Cisco routers, what is the purpose of passing `intf_f` into the `crud_service.read()` method?

- A. The Interfaces() class acts as a NETCONF filter, which limits the data returned to that of the openconfig:interfaces YANG model.
- **B. It passes default values into the crud_service, which reconfigures all interfaces to their default configurations.**
- C. It provides the data types of the openconfig:interfaces model to the router for dynamic configuration of the interfaces.
- D. It locks the interfaces from modification by other active NETCONF sessions.

Answer: B

NEW QUESTION # 30

Refer to the exhibit. An engineer is using telemetry data to gather monitoring information from the network devices. During testing, the configuration worked with no issues. When it was applied to the live environment, the dial-out telemetry streams are not being sent. Which step is missing to configure a Cisco IOS XR router for telemetry streams dial-out?

```
RP/0/RP0/CPU0:Router#sh run telemetry model-driven
Tue Feb 27 04:50:19.309 UTC

telemetry model-driven
 sensor-group 1
  sensor-path Cisco-IOS-XR-plat-chas-invmgr-oper:platform-inventory/racks/rack
  !

 sensor-group mdt
  sensor-path Cisco-IOS-XR-telemetry-model-driven-oper:telemetry-model-driven
  !

 sensor-group generic
  sensor-path Cisco-IOS-XR-infra-statsd-oper:infra-statistics/interfaces/interface/latest/generic-counters
  !

 sensor-group if-oper
  sensor-path Cisco-IOS-XR-pfi-im-cmd-oper:interfaces/interface-xr/interface
  !

 subscription mdt
  sensor-group-id mdt sample-interval 10000
  !

 subscription generic
  sensor-group-id generic sample-interval 10000
  !

 subscription if-oper
  sensor-group-id if-oper sample-interval 10000
  destination-id test
  !
!
```

- A. subscription activation
- **B. destination-group configuration**
- C. destination-group activation
- D. subscription configuration

Answer: B

Explanation:

The configuration in the exhibit shows sensor-groups and subscriptions, but for telemetry dial-out to function, you must also configure a destination-group (to define where to send the telemetry data). The subscriptions reference the destination-group (e.g., destination-id test), but the actual destination-group configuration is missing. Without it, the router does not know where to send the telemetry data streams.

NEW QUESTION # 31

Which option is the appropriate method for CBWFQ WRED implementation in Cisco IOS XR?

- A.

```
configure
policy-map POLICY_1
class CLASS1
weighted random-detect default
commit
```
- B.

```
configure
interface pos 0/0/0/0
random-detect default
commit
```
- C.

```
configure
policy-map POLICY_1
class CLASS1
wred default
commit
```
- D.

```
configure
policy-map POLICY_1
class CLASS1
random-detect default
commit
```

Answer: D

NEW QUESTION # 32

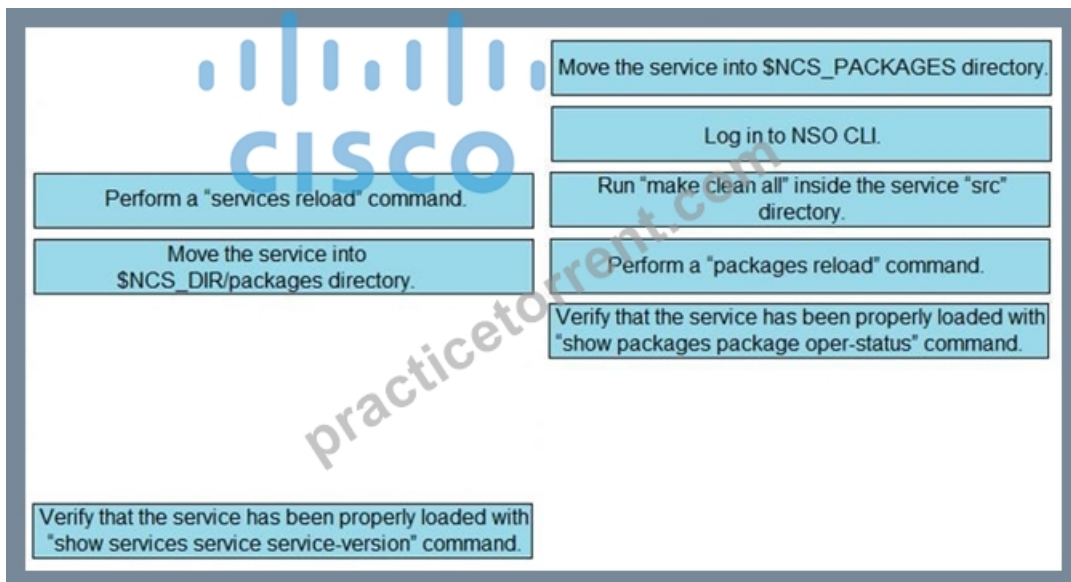

Drag and Drop Question

Drag and drop the steps from the left into the correct order on the right to deploy an already created service into NSO. Not all options are used.

Log in to NSO CLI.	
Verify that the service has been properly loaded with "show packages package oper-status" command.	
Perform a "services reload" command.	
Move the service into \$NCS_DIR/packages directory.	
Perform a "packages reload" command.	
Move the service into \$NCS_PACKAGES directory.	
Run "make clean all" inside the service "src" directory.	
Verify that the service has been properly loaded with "show services service service-version" command.	

Answer:

Explanation:

NEW QUESTION # 33

.....

Our passing rate is very high to reach 99% and our 300-535 exam torrent also boost high hit rate. Our 300-535 study questions are compiled by authorized experts and approved by professionals with years of experiences. They are compiled according to the latest development conditions in the theory and practice and the questions and answers are based on real exam. Our study materials can improve your confidence for real exam and will help you remember the exam questions and answers that you will take part in. You can choose the version which suits you mostly. Our Automating and Programming Cisco Collaboration Solutions exam torrents simplify the important information and seize the focus to make you master the 300-535 Test Torrent in a short time.
