Which feature is needed to split Order Products into different Invoice runs?

- A. Order by Group
- B. Order by Quote Line Group
- C. Invoice Batch
- **D. Invoice Group**

**Answer: D**

Explanation:

The question:

Which feature is needed to split Order Products into different Invoice Runs?

In Salesforce Billing, the feature that controls how order products are separated into different invoice runs is Invoice Group.

✓ Why Invoice Group is the correct answer: The Invoice Group field on:

Order Product

Order

Invoice

is used to:

Separate order products into different invoices within the same invoice run, or Ensure specific order products are invoiced in different invoice runs entirely.

The Billing Engine evaluates Invoice Group when generating invoices:

Order Products with different Invoice Group values → will be generated on different invoices or different invoice runs, depending on the configuration.

This is the official Salesforce Billing mechanism for splitting invoice generation.
