Examcollection HPE0-S59 Vce - HPE0-S59 Pass4sure Study Materials

Will you feel nervous in the exam? If you do, just try us HPE0-S59 study materials, we will release your nerves as well build up your confidence for the exam. HPE0-S59 Soft test engine can stimulate the real exam environment, so that you can know the procedure of the real exam, and your nervous will be relieved. In addition, HPE0-S59 Study Materials are high quality, and they can help you pass the exam. They also contain both questions and answers, you can have a quickly check after practicing.

HP HPE0-S59 (HPE Compute Solutions) Certification Exam is a widely recognized certification exam designed for IT professionals who are responsible for managing and implementing HPE compute solutions in enterprises. HPE0-S59 exam is designed to test the knowledge and skills of candidates on various topics related to HPE compute solutions, such as installation, configuration, management, troubleshooting, and optimization.

HP HPE0-S59 Certification Exam is designed to test the candidate's knowledge and skills in HPE Compute Solutions. HPE Compute Solutions certification is aimed at IT professionals who work in enterprise data centers, cloud environments, and other complex computing environments. HPE0-S59 exam is particularly important for those who want to demonstrate their expertise in HPE Compute Solutions and advance their careers in this field.

HPE Compute Solutions Sample Questions (Q140-Q145):

NEW QUESTION # 140

Your customer added a new Ethernet network in HPE Oneview that is used to manage their HPE Synergy platform.

When the customer tries to connect one of the compute nodes to this network through the server profile, this network is not available.

What must be done to fix this issue?

- A. To make this network available to use in the server profile, the customer must enable the Smart Link feature within network definition.
- B. Check the Logical Enclosure settings and verify if the maximum number of networks allowed for this LE is reached.
- C. Check within the server profile which server hardware is used and perform the Refresh operation on this compute node to get the latest adapter information.
- **D. The newly created network must be added to the uplink set within the LIG, and Logical interconnect configuration must be updated from the LIG.**

Answer: D

Explanation:

When a new Ethernet network is created in HPE OneView and is not available in the server profile, it is typically because the network has not been added to the uplink set within the Logical Interconnect Group (LIG). To resolve this issue, the network must be included in the uplink set configuration, and then the logical interconnect configuration must be updated from the LIG to propagate the changes.

NEW QUESTION # 141

Which statement about an HPE Oneview support dump is true?

- A. Appliance support dump by default contains a logical enclosure support dump
- **B. Support dump is a binary file that can be opened only in a dedicated application**
- C. Preview support dump is available only when creating an appliance support dump
- D. Support dump can be created if HPE Virtual Connect modules are installed in the frame

Answer: B

NEW QUESTION # 142

Hotspot Question

Click the port on the Frame Link Module which is used to include an HPE Synergy frame in the management ring.

Answer:

Explanation:

Explanation:

The port labeled "MGMT" (Management) in the upper right section of the HPE Frame Link Module (FLM) is the correct port used to include an HPE Synergy frame in the management ring.

This port is crucial for linking the frame into the management network of the Synergy infrastructure.

NEW QUESTION # 143

An HPE partner is working with a customer, who says that they lack a large enough IT staff to stay ahead of help desk requests. What should you explain that OpsRamp provides?

- A. An overview of HPE solutions, support contracts, and registered support cases
- B. Automated generation of cases in HPE support
- C. AI-powered help in reducing alert noise and identifying root causes
- D. Unified provisioning of server and storage resources in a hybrid environment

Answer: C

Explanation:

OpsRamp uses AI-driven analytics to correlate events, reduce alert noise, and identify root causes, helping organizations with limited IT staff manage incidents more efficiently.

NEW QUESTION # 144

Your customer plans to expand an existing nPar based on a single HPE Superdome Flex chassis. Which statement about workload availability during expansion is true?

- A. Powered nPar can be expanded only if HPE Superdome Flex 280 is used

- B. HPE Superdome Flex does not support expansion of powered on nPars
- C. Online expansion is available only if RMC is used for management.
- D. Powered nPar can be expanded if it does not use HPE Persistent Memory

Answer: D

Explanation:

HPE Superdome Flex allows for the expansion of powered-on nPars (nPartitions), but this capability is subject to certain conditions. One of these conditions is that the nPar does not use HPE Persistent Memory.

Expanding an nPar with Persistent Memory typically requires a shutdown to reconfigure the memory settings safely.

NEW QUESTION # 145
