

Salesforce Plat-Admn-301 VCE Dumps & Testking IT echter Test von Plat-Admn-301

Nachdem Sie die Demo unserer Salesforce Plat-Admn-301 probiert haben, werden Sie sicherlich getrost sein. Sie brauchen nicht mehr Sorge darum machen, wie die Prüfungsunterlagen der Salesforce Plat-Admn-301 nachzusuchen. Außerdem brauchen Sie nicht bei der Vorbereitung darum sorgen, dass die Unterlagen veraltet sind, weil wir Ihnen einjährigen Aktualisierungsdienst gratis anbieten. Sofort nach der Aktualisierung der Salesforce Plat-Admn-301 Prüfungssoftware geben wir Ihnen Bescheid. Deshalb können Sie immer die neuesten Prüfungsunterlagen benutzen. Sie dürfen sich ohne Sorge auf die Prüfung konzentriert vorbereiten.

Salesforce Plat-Admn-301 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Data and Analytics Management: This section of the exam measures skills of Salesforce Data Analyst and covers data quality assessment, data enrichment, and duplicate management. It explains how to choose appropriate reporting and analytics tools for advanced requirements, including custom report types, snapshots, formulas, joined reports, and dashboard configurations. It also covers methods for connecting external data sources using big objects, external objects, data warehouses, data lakes, and Salesforce Connect. Finally, it describes the suitable tools and methods for importing data, including Data Loader, Data Import Wizard, and external IDs.
Thema 2	• Environment Management and Deployment: This section of the exam measures skills of Salesforce Administrator and covers moving metadata between environments using tools such as sandboxes, change sets, and managed or unmanaged AppExchange packages. It explains the capabilities and best practices related to deploying changes through change sets to ensure smooth and controlled migrations.

Thema 3	• Cloud Applications: This section of the exam measures skills of Salesforce Consultant and covers the standard Salesforce capabilities that support sales and service operations. It includes features such as products, price books, schedules, orders, quotes, and the tools that help with forecasting and territory management. The section also describes how to create Salesforce Knowledge articles, manage entitlements, support service workflows, and enable interactions through chat, case feed, Omni-Channel, console apps, and Experience Cloud sites. It also introduces the broader Salesforce suite that extends core platform functionality.

Plat-Admn-301 Der beste Partner bei Ihrer Vorbereitung der Salesforce Certified Platform Administrator II

Ich glaube, egal in welcher Branche erwarten alle Beschäftigte eine gute Berufsaussichten. In der konkurrenzfähigen IT-Branche gilt es auch. Die Fachleute in der IT-Branche erwarten eine gute Beförderungsmöglichkeit. Viele IT-Fachleute sind sich klar, dass die Salesforce Plat-Admn-301 Zertifizierungsprüfung Ihren Traum verwirklichen kann. Und Fast2test ist solch eine Website, die Ihnen zum Bestehen der Salesforce Plat-Admn-301 Zertifizierungsprüfung verhilft.

Salesforce Certified Platform Administrator II Plat-Admn-301 Prüfungsfragen mit Lösungen (Q164-Q169):

164. Frage

Cloud Kicks wants to force its users to set a value for a custom called Tier by answering a series of questions.

What two functions should the administrator use to ensure that users cannot bypass answering these questions in order to determine their Tier value.

Choose 2 answers

- A. Use a screen flow to ask the question.
- B. Make the field Read Only on the page layout.
- C. Set up a list view for the list of questions.
- D. Set up a restriction rule on the field.

Antwort: A,B

Begründung:

Making the field Read Only on the page layout prevents users from manually entering or editing the field value on the record page. This ensures that users cannot bypass answering the questions in order to determine their Tier value. Using a screen flow to ask the questions allows administrators to create an interactive user interface that guides users through a series of screens based on their inputs and logic. A screen flow can be used to ask questions and set the field value based on the answers

165. Frage

Cloud Kicks has a very large knowledge base in Salesforce, Service reps are having a hard time finding the most relevant articles because there are too many search results.

What should the administrator do to help service reps quickly narrow down the number of articles?

- A. Activate and configure Einstein Search.
- B. Delete and remove old Knowledge articles.
- C. Implement and configure Data Categories.
- D. Update Knowledge to auto-search the case's subject.

Antwort: C

Begründung:

Data Categories are a way to organize and classify knowledge articles into a hierarchical structure based on topics or criteria. Data Categories can help service reps quickly narrow down the number of articles by filtering or browsing by category. Data Categories can also be used to control the visibility and access of articles for different users or roles.

166. Frage

AW Computing (AVVC) has customers in multiple countries. AWC would like to set up advanced currency management for its system.

Which two considerations should AWC be aware of prior to implementing this change to the existing system?

Choose 2 answers

- A. When a currency is added to an organization's List of supported currencies, it cannot be deleted.
- B. Historical trend reports will only use the last dated exchange rate.
- C. Opportunities will only display sales in the customer's localized currency.
- D. Once enabled, advanced currency management cannot be disabled.

Antwort: A,D

Begründung:

When a currency is added to an organization's list of supported currencies, it cannot be deleted and once enabled, advanced currency management cannot be disabled are two considerations that AW Computing should be aware of prior to implementing this change to the existing system. Adding a currency to an organization's list of supported currencies is an irreversible action that allows users to enter and view amounts in that currency for standard and custom objects that have currency fields. Enabling advanced currency management is also an irreversible action that allows administrators to define dated exchange rates for opportunities and opportunity products based on close dates or product dates instead of using static conversion rates.

167. Frage

AW Computing has a new requirement from its security team where audit information relating to an account must be recorded in a new custom object called Audit. Audit records need to be preserved for 10 years and only accessible by the audit team.

What relationship should be used to relate the Audit object to the Account object?

- A. Self
- B. Lookup
- C. Master-Detail
- D. Many-To-Many

Antwort: B

Begründung:

In this scenario, a Lookup relationship is the most appropriate choice for relating the Audit custom object to the Account object. This relationship allows for flexibility, especially when it comes to data retention and access control requirements, as outlined by AW Computing's security team.

* Lookup Relationship:

* A Lookup relationship links two objects, allowing records from the custom Audit object to be associated with the Account object. Unlike a Master-Detail relationship, it offers greater flexibility in terms of record ownership, sharing, and visibility controls, which is particularly useful for sensitive data.

* The Lookup relationship will enable administrators to set specific permissions, ensuring that only the audit team has access to the records, as required.

* Additionally, records in the Lookup relationship are independent. Therefore, if the Account record is deleted, the Audit record can persist, aligning with the need to retain Audit records for 10 years.

* Preservation and Access Control:

* Given the 10-year retention requirement, the independence of records under a Lookup relationship is ideal. It ensures that Audit records are not automatically deleted when an associated Account record is removed.

* Access to Audit records can be restricted to the audit team by setting up custom sharing rules or permissions, which is achievable through the Lookup relationship's flexible sharing model.

Incorrect options:

* Master-Detail: In a Master-Detail relationship, the detail (child) records are dependent on the master (parent) record. Deleting an Account would automatically delete any associated Audit records, which would conflict with the retention requirement.

* Many-To-Many: This type of relationship involves a junction object to associate multiple records from both sides. It is not necessary in this case, as the requirement is a one-to-many relationship from Account to Audit records.

* Self: A self-relationship would allow records within the Audit object to be related to each other. This does not apply to linking the Audit object to the Account object.

In conclusion, the Lookup relationship provides the necessary flexibility for data preservation and access control, making it the

optimal choice for this requirement.

Reference: Salesforce documentation recommends using Lookup relationships when objects need to remain independent or when additional flexibility for sharing and retention is required.

168. Frage

Which two tools should an administrator use to required data to be entered in a field and improve data quality on a record in Salesorce?

Choose 2 answers

- A. Workflow Rules
- B. validation Rules
- C. Page Layouts
- D. Dashboards

Antwort: B,C

Begründung:

Validation rules and page layouts are two tools that can be used to require data to be entered in a field and improve data quality on a record in Salesforce. Validation rules are a way to enforce data quality and integrity by checking the values of fields before a record is saved and displaying an error message if the values do not meet the specified criteria. Page layouts are a way to control the layout and organization of fields, buttons, related lists, and other components on a record page. Page layouts can also make fields required so that users must enter a value before saving a record.

169. Frage

.....

Niemand will ein ganz ein leichtes Leben führen und in einer niedrigen Position wenig Gehalt beziehen. Eines Tages wird man vielleicht gekündigt oder in die Rente treten. Dieses Leben ist wirklich langweilig. Wollen Sie nicht ein vielfältiges Leben führen? Das macht nichts. Heute sage ich Ihnen eine Abkürzung zum Erfolg, nämlich, die Salesforce Plat-Admn-301 Zertifizierungsprüfung zu bestehen. Mit dem Zertifikat können Sie ein besseres Leben führen und ein exzellenter IT-Expert werden und von anderen akzeptiert werden. Die Schulungsunterlagen zur Salesforce Plat-Admn-301 Zertifizierungsprüfung von Fast2test können ganz leicht Ihren Traum verwirklichen. Zögern Sie noch? Schicken Sie doch schnell Schulungsunterlagen zur Salesforce Plat-Admn-301 Zertifizierungsprüfung von Fast2test in den Warenkorb.
