SAP Certified Associate - Validating Business Transformation Sample

Questions (Q30-Q35):

NEW QUESTION # 30

What is the primary purpose of the Application Landscape Report in SAP LeanIX?

- A. Understand integration dependencies and their current status
- B. Understand application data quality
- C. Identify active applications affected by the transformation
- D. Visualize data flow between systems

Answer: A,C

Explanation:

The Application Landscape Report in SAP LeanIX provides a consolidated view of all applications within the IT environment. It highlights which applications are active, which are impacted by transformation plans, and how they align with business capabilities. Additionally, it displays integration dependencies, helping stakeholders understand the connections between applications and the interfaces that may be influenced by change. While other reports focus on data quality or specialized views, this report centers on active applications and key integration relationships.

NEW QUESTION # 31

Which SAP LeanIX product helps organizations understand their current application landscape?

- A. SAP LeanIX Architecture and Road Map Planning
- B. SAP LeanIX Application Portfolio Management
- C. SAP LeanIX Landscape Management
- D. SAP LeanIX Onboarding Tracker

Answer: B

Explanation:

Application Portfolio Management (APM) is the LeanIX product specifically designed to help organizations analyze their current application landscape. It provides an inventory of applications, lifecycle information, ownership details, technology stacks, and relationships to business capabilities. APM allows companies to evaluate redundancy, risks, and optimization opportunities. Other LeanIX modules support planning or governance but do not focus primarily on understanding the existing application portfolio.
