Do you want to pass your HCIP-Storage V5.5 exam? If so, NewPassLeader is the ideal place to begin. NewPassLeader provides comprehensive H13-624_V5.5 exam questions preparation in two simple formats: a pdf file format and an Huawei H13-624_V5.5 online practice test engine. If you fail your HCIP-Storage V5.5 (H13-624_V5.5) Exam, you can obtain a full refund and a 20% discount! Continue reading to discover more about the essential aspects of these excellent H13-624_V5.5 exam questions.

Huawei H13-624_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Huawei Intelligent Storage Products and Features: This section of the exam measures the skills of a Storage Administrator and focuses on Huawei's intelligent storage solutions. It includes understanding product models, management interfaces, and advanced features like storage tuning and data protection. Candidates will explore how to manage system operations, optimize resource usage, and apply Huawei-specific technologies for secure and high-performance storage deployment.

Topic 2	<ul style="list-style-type: none"> • Basic Storage Technologies: This section of the exam measures the skills of a Storage Engineer and includes fundamental knowledge of storage systems. It covers key concepts such as intelligent storage architecture, RAID levels, storage networking, and widely used data protocols. The section also introduces the structure and function of SAN and NAS environments. A strong grasp of these basic technologies helps professionals support large-scale data infrastructure with efficiency and stability.
Topic 3	<ul style="list-style-type: none"> • Storage System O&M Management: This section of the exam measures the skills of a Storage Operations Specialist and covers the daily operational management of Huawei storage systems. It emphasizes practical abilities in system monitoring, troubleshooting, fault handling, and health checks. The goal is to ensure smooth, reliable operations and reduce risks through proactive maintenance and efficient use of Huawei's O&M tools.
Topic 4	<ul style="list-style-type: none"> • Storage Technology Trends: This section of the exam measures skills of a Data Center Specialist and covers the latest advancements in the storage industry. It focuses on emerging technologies that are shaping intelligent storage development, including trends like AI integration, green computing, and cloud-oriented storage evolution. Candidates are expected to understand how these trends influence storage planning and deployment in modern IT environments.

H13-624_V5.5 Detailed Study Plan, H13-624_V5.5 Practice Mock

H13-624_V5.5 Preparation materials will be the good helper for your qualification certification. We are concentrating on providing high-quality authorized H13-624_V5.5 study guide all over the world so that you can clear exam one time. H13-624_V5.5 reliable exam bootcamp materials contain three formats: PDF version, Soft test engine and APP test engine so that our products are enough to satisfy different candidates' habits and cover nearly full questions & answers of the real test.

Huawei HCIP-Storage V5.5 Sample Questions (Q47-Q52):

NEW QUESTION # 47

Object services use Bucket Policy to control access to buckets or buckets by a single user or multiple users. The access rights of the objects can control which specific object operations ()

- A. GET
- B. DELETE
- C. PUT
- D. MODIFY

Answer: A,B,C

NEW QUESTION # 48

In the storage planning and design process, which of the following is not part of the business single selection planning process ()

- A. Network planning
- B. Basic business
- C. Value-added features
- D. Capacity planning

Answer: B

NEW QUESTION # 49

After purchasing Huawei's all-flash storage devices, when planning the basic storage business, which of the following options must be planned ()

- A. Number of LUNs

- B. Disk domain
- C. Storage pool capacity
- D. LUN capacity

Answer: A,B,C,D

NEW QUESTION # 50

A financial customer purchases Huawei OceanStor Pacific 9950 for service deployment. During a routine inspection, an engineer finds that a main storage disk of the device is faulty and uses SmartKit to replace it. Which of the following statements is true about replacing the disk?

- A. The duration from removing the main storage disk to installing a normal one on the node cannot exceed 10 minutes. Otherwise, heat dissipation of the storage device will be affected.
- B. The interval between removing the faulty disk and inserting a normal one is at least 10 seconds. Otherwise, the disk may be damaged.
- C. Before using SmartKit to replace the disk, the engineer needs to complete the pre-processing as prompted. After that, the engineer can continue the subsequent operations.
- D. When removing the disk, the engineer needs to remove it from its connector, wait at least 60 seconds, and then remove the disk from the chassis.

Answer: C

NEW QUESTION # 51

An Industry customer purchases several Huawei flash storage devices for service deployment. During an inspection, an engineer finds that some storage components are faulty and need to be removed and replaced.

Which of the following statements Is true about the part removal and replacement?

- A. The interface modules and system subracks of the storage device can be replaced independently.
- B. The coin batteries of the storage device cannot be replaced or removed.
- C. The memory modules and system disks of the storage device can be removed and replaced independently.
- D. The CPUs of the storage device cannot be replaced independently, but can be removed independently.

Answer: C

NEW QUESTION # 52
