

# Latest NGFW-Engineer Version & Updated NGFW-Engineer Testkings

P.S. Free & New NGFW-Engineer dumps are available on Google Drive shared by ITExamSimulator:  
[https://drive.google.com/open?id=1pclbXETLnDOB7Ki4\\_Lg\\_HsZoXZgvpbCk](https://drive.google.com/open?id=1pclbXETLnDOB7Ki4_Lg_HsZoXZgvpbCk)

This time set your mind at rest with the help of our NGFW-Engineer guide quiz. You are free from any loss but focus on your success of the exam firmly this time. If you choose our nearly perfect NGFW-Engineerpractice materials with high quality and accuracy, our NGFW-Engineer Training Questions can enhance the prospects of victory. Choosing our NGFW-Engineer learning prep is the most useful way to improve your grade and chance to pass the exam.

## Palo Alto Networks NGFW-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Integration and Automation: This section measures the skills of Automation Engineers in deploying and managing Palo Alto Networks NGFWs across various environments. It includes the installation of PA-Series, VM-Series, CN-Series, and Cloud NGFWs. The use of APIs for automation, integration with third-party services like Kubernetes and Terraform, centralized management with Panorama templates and device groups, as well as building custom dashboards and reports in Application Command Center (ACC) are key topics.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>PAN-OS Device Setting Configuration: This section evaluates the expertise of System Administrators in configuring device settings on PAN-OS. It includes implementing authentication roles and profiles, and configuring virtual systems with interfaces, zones, routers, and inter-VSYS security. Logging mechanisms such as Strata Logging Service and log forwarding are covered alongside software updates and certificate management for PKI integration and decryption. The section also focuses on configuring Cloud Identity Engine User-ID features and web proxy settings.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>PAN-OS Networking Configuration: This section of the exam measures the skills of Network Engineers in configuring networking components within PAN-OS. It covers interface setup across Layer 2, Layer 3, virtual wire, tunnel interfaces, and aggregate Ethernet configurations. Additionally, it includes zone creation, high availability configurations (active/active and active/passive), routing protocols, and GlobalProtect setup for portals, gateways, authentication, and tunneling. The section also addresses IPsec, quantum-resistant cryptography, and GRE tunnels.</li> </ul>

**Updated NGFW-Engineer Testkings | Valid NGFW-Engineer Braindumps**

In order to meet the demand of all customers and protect your machines network security, our company can promise that our NGFW-Engineer study materials have adopted technological and other necessary measures to ensure the security of personal information they collect, and prevent information leaks, damage or loss. In addition, the NGFW-Engineer Study Materials system from our company can help all customers ward off network intrusion and attacks prevent information leakage, protect user machines network security.

## **Palo Alto Networks Next-Generation Firewall Engineer Sample Questions (Q90-Q95):**

### **NEW QUESTION # 90**

Palo Alto Networks NGFWs use SSL/TLS profiles to secure which two types of connections?  
(Choose two.)

- A. NAT tables
- **B. GlobalProtect Gateways**
- C. User Authentication
- **D. GlobalProtect Portal**

**Answer: B,D**

Explanation:

Palo Alto Networks Next-Generation Firewalls (NGFWs) use SSL/TLS profiles to secure connections for services such as GlobalProtect Gateways and GlobalProtect Portals. These profiles are used to manage the SSL/TLS encryption and decryption for secure communication between the firewall and clients (such as VPN clients for GlobalProtect). This helps ensure the confidentiality and integrity of the data during transmission.

### **NEW QUESTION # 91**

A network administrator needs to replace the default self-signed certificate on a firewall with one signed by the company's internal certificate authority (CA).

Which two firewall features would require this new certificate to be assigned via an SSL/TLS service profile? (Choose two.)

- A. GlobalProtect gateway
- **B. User-ID agent redistribution**
- C. RADIUS server authentication
- **D. Authentication portal**

**Answer: B,D**

### **NEW QUESTION # 92**

After enabling multiple security profiles such as IPS, antivirus, and URL filtering on an NGFW, users report degraded network performance.

Which factor is MOST likely causing the issue?

- A. VLAN misconfiguration
- **B. Excessive CPU utilization due to deep inspection**
- C. Asymmetric routing
- D. Incorrect DNS configuration

**Answer: B**

Explanation:

Deep packet inspection and threat analysis consume significant system resources. Improper tuning or undersized hardware can lead to performance degradation.

### **NEW QUESTION # 93**

An engineer at a managed services provider is updating an application that allows its customers to request firewall changes to also manage SD-WAN. The application will be able to make any approved changes directly to devices via API.

What is a requirement for the application to create SD-WAN interfaces?

- A. REST API's "sdwanInterfaceprofiles" parameter on a Panorama device
- B. XML API's "sdwanprofiles/interfaces" parameter on a Panorama device
- C. REST API's "sdwanInterfaces" parameter on a firewall device
- D. XML API's "InterfaceProfiles/sdwan" parameter on a firewall device

**Answer: A**

Explanation:

SD-WAN interfaces on Palo Alto firewalls are centrally managed through Panorama using the REST API endpoint for "sdwanInterfaceprofiles" in templates, which defines link characteristics before creating the virtual SD-WAN interfaces that group physical Ethernet links.

#### NEW QUESTION # 94

What is the correct sequence of evaluation for Security policy rulebases?

- A. Panorama Shared Rules --> Local Firewall Rules --> Device Group Rules
- B. Local Firewall Rules --> Panorama Pre-Rules --> Panorama Post-Rules
- C. Panorama Post-Rules --> Panorama Pre-Rules --> Local Firewall Rules
- D. Panorama Pre-Rules --> Local Firewall Rules --> Panorama Post-Rules

**Answer: D**

Explanation:

Security policy rules are evaluated in a strict top-down order starting with Panorama Pre-Rules, followed by the local firewall rulebase, and finally Panorama Post-Rules, ensuring centrally enforced policies are applied before and after locally defined rules.

#### NEW QUESTION # 95

.....

Now, let us show you why our NGFW-Engineer exam questions are absolutely your good option. First of all, in accordance to the fast-pace changes of bank market, we follow the trend and provide the latest version of NGFW-Engineer study materials to make sure you learn more knowledge. Secondly, since our NGFW-Engineer training quiz appeared on the market, seldom do we have the cases of customer information disclosure. We really do a great job in this career!
