After you purchase our ITFAS-Level-1 quiz guide, we will still provide you with considerate services. Maybe you will ask whether we will charge additional service fees.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which of the following situations is considered an impairment?

- A. Smoke detector within 4 feet of an air supply diffuser
- **B. Closed sprinkler valve**
- C. Smoke detector within 4 feet of a return air opening
- D. Intelligible audibility

Answer: B

Explanation:

An impairment occurs when part of the life safety system is disabled or rendered ineffective. A closed sprinkler valve directly disables part of the fire suppression system, which meets the definition of an impairment.

NFPA 72 (2022), Section 3.3.1.49 - Impairment:

"A condition where a fire protection or life safety system or portion thereof is out of service." Smoke detector placement issues may be a code violation but not a system impairment. Intelligible audibility is a positive attribute, not a problem.

Correct answer: A. Closed sprinkler valve

NEW QUESTION # 43

A single open fault, in a Class A pathway, shall result in the annunciation of which of the following signals?

- A. Alarm
- **B. Trouble**
- C. Pre-alarm
- D. Supervisory

Answer: B

Explanation:

In a Class A fire alarm circuit, a single open condition does not affect communication but must still be annunciated as a trouble signal.

NFPA 72 (2022), Section 12.3.1.1.1.4:

"A single open condition on a Class A pathway shall result in a trouble signal." This maintains system operation while alerting of a wiring fault.

Correct answer: D. Trouble

NEW QUESTION # 44

Which three of the following parties gets notified that the system has been restored? (Choose three.)

- **A. Authority Having Jurisdiction**
- **B. Monitoring organization**
- **C. Building occupants**
- D. First responders

Answer: A,B,C

Explanation:

After impairment or testing, NFPA 72 requires that all previously notified parties be informed that the system has been returned to service. This includes those who could be affected by or responsible for system monitoring and emergency response.

NFPA 72 (2022), Section 10.21.3.8:

"When the system has been returned to normal, the persons and facilities previously notified (including the supervising station, building occupants, and AHJ, where required) shall be notified that testing is complete and the system is restored." Although "first responders" isn't explicitly listed, they're typically contacted through the AHJ or monitoring center, so they're not usually notified directly by technicians.

Correct answers:

- * Authority Having Jurisdiction
- * Building occupants
- * Monitoring organization

NEW QUESTION # 45

The inspection phase, as opposed to the testing phase, of system control equipment should concentrate on which of the following tasks?

- A. Activation of all initiating devices
- B. Operational reliability only
- **C. Visual inspection only**
- D. Proof of signals at monitoring facility

Answer: C

Explanation:

NFPA 72 defines inspection as a visual examination of a system or component to verify that it appears to be in operating condition and is free of physical damage.

NFPA 72 (2022), Section 3.3.138 - Inspection:

"A visual examination of a system or portion thereof to verify that it appears to be in operating condition and is free of physical damage." Testing, on the other hand, involves functional activation.

Correct answer: D. Visual inspection only

NEW QUESTION # 46

In private mode systems, what is the audibility requirement?

- A. Minimum 75 dBA
- B. Minimum 85 dBA
- C. 15 dBA above ambient
- D. 10 dBA above ambient

Answer: D

Explanation:

Private mode signaling is used in locations not open to the public (e.g., hospitals, certain office buildings).

The audibility requirement for private mode differs from public mode.

NFPA 72 (2022), Section 18.4.5.3:

"For private mode audible appliances, the sound level shall be at least 10 dBA above the average ambient sound level..." This ensures the signal is heard clearly in the intended space without exceeding what's necessary.

Correct answer: C. 10 dBA above ambient

NEW QUESTION # 47

.....

Do you want to pass the NICET ITFAS-Level-1 exam on the first attempt but do not know where to start the preparation?

Then PassExamDumps has a solution to all your problems. PassExamDumps is among the greatest resources for preparing for NICET ITFAS-Level-1 Certification test.
