ATLASSIAN Managing Jira Cloud Projects Sample Questions (Q18-Q23):

NEW QUESTION # 18
A user wants to add the label VIP to an issue when any member of the Executives group adds a comment to it.
The configuration of the automation rule is shown.

Trigger	When: Issue commented	
Condition:	User condition	Reporter is in group Executives
Action:	Then: Edit issue fields	labels = VIP

The automation rule does not always execute as expected.
What is the cause of the problem?

- A. The label VIP is not available in the issue's project.
- B. A condition is missing to check whether the label is already set.
- C. Issue commented has to be the condition.
- D. User condition does not account for who is commenting.
- E. User condition has to be the trigger.

Answer: D

Explanation:
The user condition is checking whether the reporter is in the Executives group, but the rule is triggered when the issue is commented on. To work as intended, the condition should check whether the commenter (i.e., user who triggered the rule) is in the Executives group - not the reporter.
