New FortiGate HA configuration

```
FGT-1
#config system ha
    set group-id 3
    set group-name "Fortinet"
    set mode a-p
    set password *
    set hbdev "port9" 50 "port10" 50
    set session-pickup enable
    set override disable
    set priority 90
    set monitor port3

FGT-2
#config system ha
    set group-id 3
    set group-name "Fortinet"
    set mode a-p
    set password *
    set hbdev "port9" 50 "port10" 50
    set session-pickup enable
    set override enable
    set priority 110
    set monitor port3
```

FGT-1 and FGT-2 are updated with HA configuration commands shown in the exhibit.
What would be the expected outcome in the HA cluster?

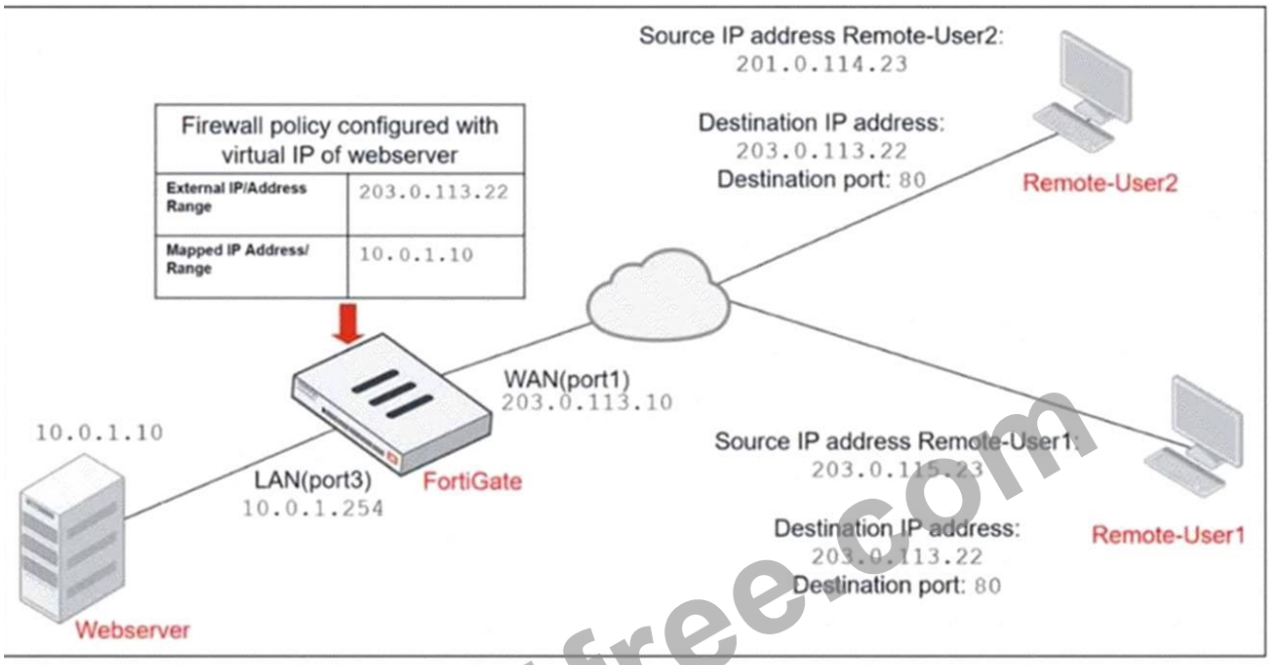
- A. FGT-1 will synchronize the override disablesetting with FGT-2.
- B. The HA cluster will become out of sync because the overridesetting must match on all HA members.
- C. FGT-2 will take over as the primary because it has the override enablesetting and higher priority than FGT-1.
- D. FGT-1 will remain the primary because FGT-2 has lower priority.

Answer: B

Explanation:
The override setting must be identical on all FortiGate devices in an HA cluster. In the exhibit, FGT-1 has set override disable, while FGT-2 has set override enable. Because of this mismatch, the HA members will fail to synchronize properly, and the cluster will become out of sync until the override configuration is made consistent across both FortiGates.

NEW QUESTION # 77
Refer to the exhibits.

Network diagram



Firewall address object

Firewall policies

ID	Name	Source	Destination	Schedule	Service	Action
WAN (port1) → LAN (port3) 2						
4	Deny	Deny_IP	all	always	ALL	DENY
3	Allow_access	all	Webserver	always	ALL	ACCEPT

The exhibits show a diagram of a FortiGate device connected to the network, and the firewall configuration.
An administrator created a Deny policy with default settings to deny Webserver access for Remote-User2.
The policy should work such that Remote-User1 must be able to access the Webserver while preventing Remote-User2 from accessing the Webserver.
Which additional configuration can the administrator add to a deny firewall policy, beyond the default behavior, to block Remote-User2 from accessing the Webserver?

- A. Disable match-vip in the Allow_access policy
- B. Set the Destination address as Deny_IP in the Allow_access policy.
- C. Configure a One-to-One IP Pool object in a new policy.
- D. Set the Destination address as Webserver in the Deny policy.

Answer: D

Explanation:
To block Remote-User2's access to the Webserver, the deny policy must explicitly specify the Webserver as the destination address; otherwise, it denies traffic to all destinations, which is not the desired behavior.
