#### NEW QUESTION # 154

Which two are NOT selectable as Workflow dimensions for a Collection Interval in Supplemental Data Manager? (Choose two.)

- A. Entity
- B. Year
- C. Scenario
- D. Account
- E. Period

**Answer: B,E**

Explanation:

Year and Period are not selectable as Workflow dimensions for a Collection Interval in Supplemental Data Manager. Supplemental Data Manager is a feature that allows you to collect and review additional data that is not part of the standard consolidation process, such as tax schedules, disclosures, etc. A Collection Interval is a set of dimensions that defines the scope of data collection for a Form Group. The Workflow dimensions are the dimensions that determine the approval process for the data entered in the forms. The selectable Workflow dimensions are Scenario, Entity, and Account. Year and Period are not Workflow dimensions because they are fixed by the application settings and do not require approval. #### NEW QUESTION # 155

Which two are members in the Consolidation dimension? (Choose two.)

- A. FCCS Data Input
- B. FCCS Entity Input
- C. FCCS Total input And Adjusted
- D. FCCS Proportion

**Answer: B,D**

Explanation:

The two members that are in the Consolidation dimension are:

FCCS\_Entity Input: This is the member that represents the input data for each entity before consolidation. It shows the data in the entity's default currency without any adjustments or eliminations.

FCCS\_Proportion: This is the member that represents the data for each entity after applying the ownership percentage. It shows the data in the parent entity's currency after currency translation and ownership adjustment.

The other options are not members of the Consolidation dimension. FCCS Data Input is a member of the Data Source dimension, not the Consolidation dimension. It is used to identify data that is entered or loaded directly into the application. FCCS Total Input And Adjusted is a member of the Account dimension, not the Consolidation dimension. It is used to aggregate data from input accounts and adjustment accounts.
