Pass Guaranteed Quiz Latest Fortinet - Actual NSE7_EFW-7.2 Test Answers

Our NSE7_EFW-7.2 test questions can help you have a good preparation for exam effectively. Also you don't need to worry about if our NSE7_EFW-7.2 study materials are out of validity. We provide one year free updates for every buyer, after purchasing you can download our latest version of NSE7_EFW-7.2 Training Questions always within one year. And if you have any question on our NSE7_EFW-7.2 learning guide, you can contact with our service at any time, we will help you pass the NSE7_EFW-7.2 exam with our high quality of NSE7_EFW-7.2 exam questions and good service.

Fortinet NSE7_EFW-7.2 Exam Syllabus Topics:

| Topic	Details
Topic 1	• Routing: It covers implementing OSPF to route enterprise traffic and Border Gateway Protocol (BGP) to route enterprise traffic.
Topic 2	• Security profiles: Using FortiManager as a local FortiGuard server is discussed in this topic. Moreover, it delves into configuring web filtering, application control, and the intrusion prevention system (IPS) in an enterprise network.
Topic 3	• Central management: The topic of Central management covers implementing central management.
Topic 4	• VPN: Implementing IPsec VPN IKE version 2 is discussed in this topic. Additionally, it delves into implementing auto-discovery VPN (ADVPN) to enable on-demand VPN tunnels between sites.
Topic 5	• System configuration: This topic discusses Fortinet Security Fabric and hardware acceleration. Furthermore, it delves into configuring various operation modes for an HA cluster.

Our third format is the desktop practice NSE7_EFW-7.2 exam software which can be used easily after installing it on your Windows laptop and computers. These formats are there so that applicants with different study styles can use them to attempt the Fortinet NSE 7 - Enterprise Firewall 7.2 (NSE7_EFW-7.2) PRACTICE QUESTIONS successfully. The practice material of PassExamDumps can be instantly accessed just after purchasing it.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q23-Q28):

NEW QUESTION # 23
Exhibit.
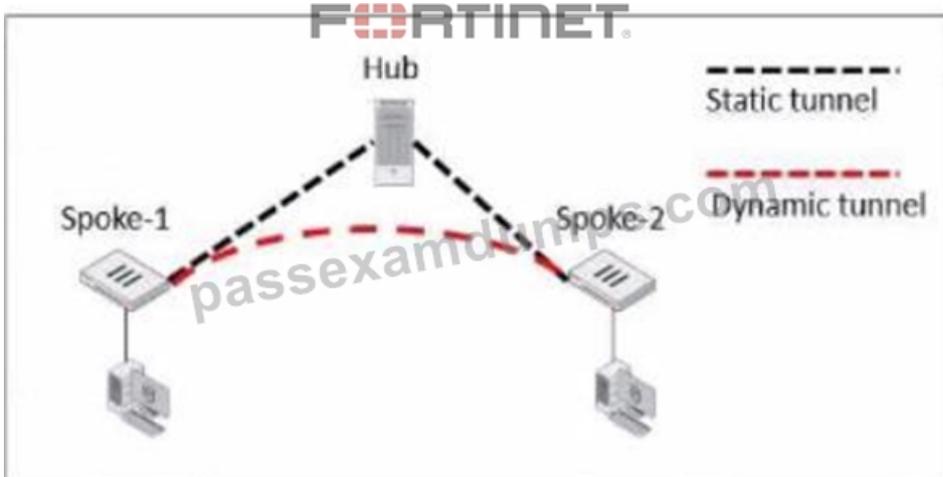

Refer to the exhibit, which shows an ADVPN network.
The client behind Spoke-1 generates traffic to the device located behind Spoke-2.
Which first message floes the hub send to Spoke-110 bring up the dynamic tunnel?

- A. Shortcut forward
- B. Shortcut query
- C. Shortcut offer
- D. Shortcut reply

Answer: B

Explanation:
In an ADVPN scenario, when traffic is initiated from a client behind one spoke to another spoke, the hub sends a shortcut query to the initiating spoke. This query is used to determine if there is a more direct path for the traffic, which can then trigger the establishment of a dynamic tunnel between the spokes.

NEW QUESTION # 24
Which two statements about the Security Fabric are true? (Choose two.)

- A. Only FortiGate devices with configuration-sync sel to Local receive and synchronize the global CMDB objects that the root FortiGate sends.
- B. Only the root FortiGate collects network topology information and forwards it to FortiAnalyzer.
- C. Each FortiGate device in the Security Fabric must have bidirectional FortiTelemetry connectivity.
- D. Each member of the Security Fabric maintains the shared Security Fabric map.
- E. FortiGate uses the FortiTelemetry protocol to communicate with FortiAnalyzer.

Answer: B,C

NEW QUESTION # 25
Exhibit.

Refer to the exhibit, which contains the partial interface configuration of two FortiGate devices.
Which two conclusions can you draw from this configuration? (Choose two)

- A. The VRRP domain uses the physical MAC address of the primary FortiGate
- B. On failover new primary device uses the same MAC address as the old primary
- C. 10.1.5.254 is the default gateway of the internal network
- D. By default FortiGate B is the primary virtual router

Answer: B,C

Explanation:
The Virtual Router Redundancy Protocol (VRRP) configuration in the exhibit indicates that 10.1.5.254 is set as the virtual IP (VRIP), commonly serving as the default gateway for the internal network (A). With vrrp-virtual-macenabled, both FortiGates would use the same virtual MAC address, ensuring a seamless transition during failover (B). The VRRP domain does not use the physical MAC address (C), and the priority settings indicate that FortiGate-A would be the primary router by default due to its higher priority (D).

NEW QUESTION # 26
Exhibit.

Refer to the exhibit, which contains a partial VPN configuration.
What can you conclude from this configuration1?

- A. The VPN should use the dynamic routing protocol to exchange routing information Through the tunnels.
- B. The routing table shows a single IPSec virtual interface.

- C. Dead peer detection s disabled.
- D. FortiGate creates separate virtual interfaces for each dial up client.

Answer: B

Explanation:
The configuration line "set dpd on-idle" indicates that dead peer detection (DPD) is set to trigger only when the tunnel is idle, not actively disabled1. References: FortiGate IPSec VPN User Guide - Fortinet Document Library From the given VPN configuration, dead peer detection (DPD) is set to 'on-idle', indicating that DPD is enabled and will be used to detect if the other end of the VPN tunnel is still alive when no traffic is detected.

Hence, option C is incorrect. The configuration shows the tunnel set to type 'dynamic', which does not create separate virtual interfaces for each dial-up client (A), and it is not specified that dynamic routing will be used (B). Since this is a phase 1 configuration snippet, the routing table aspect (D) cannot be concluded from this alone.

NEW QUESTION # 27
Which ADVPN configuration must be configured using a script on fortiManager, when using VPN Manager to manage fortiGate VPN tunnels?

- A. Disable add-route on hub
- B. Enable AD-VPN in IPsec phase 1
- C. Set protected network to all
- D. Configure IP addresses on IPsec virtual interlaces

Answer: B

Explanation:
To enable AD-VPN, you need to edit an SD-WAN overlay template and enable the Auto-Discovery VPN toggle. This will automatically add the required settings to the IPsec template and the BGP template. You cannot enable AD-VPN directly in the IPsec phase 1 settings using VPN Manager. References ≔ ADVPN | FortiManager 7.2.0 - Fortinet Documentation

NEW QUESTION # 28
......

Success in the NSE7_EFW-7.2 certification exam is essential to advance your career. The Fortinet NSE 7 - Enterprise Firewall 7.2 (NSE7_EFW-7.2) certification can set you apart from the competition and give you the edge you need to grow in your career. However, preparing for the NSE7_EFW-7.2 test can be challenging, mainly if you have limited time. Here's where PassExamDumps comes in with actual NSE7_EFW-7.2 Questions. We at PassExamDumps are well aware of the importance of the Fortinet NSE7_EFW-7.2 certification in order to stand out in today's competitive job environment.
