Salesforce Salesforce-Media-Cloud Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Implement: This section of the exam measures skills of a Salesforce Solution Architect and focuses on implementing the Media Cloud solution based on business and technical requirements. It includes supporting CI• CD deployment processes, planning data migration with an understanding of the data model, selecting appropriate integration approaches for media-specific contexts, applying security settings to control data access, and ensuring performance outcomes align with defined KPIs and non-functional expectations.

Topic 2	<ul style="list-style-type: none"> • Discovery: This section of the exam measures the skills of a Salesforce Solution Architect and covers the ability to assess business and technical requirements for implementing Media Cloud applications. It includes determining the technical scope for a statement of work (SOW), mapping use cases to Salesforce Media Cloud components, understanding how third-party systems integrate with the Media Cloud ecosystem, outlining system flows based on the existing business environment, and identifying relevant non-functional requirements based on customer needs.
Topic 3	<ul style="list-style-type: none"> • Design: This section of the exam measures the skills of a Salesforce Media Cloud Consultant and covers the process of designing scalable and efficient Media Cloud solutions. It focuses on creating solution flows using ASM capabilities, applying best practices in solution architecture, recommending product model and pricing strategies, and aligning designs with the Media Cloud data model. It also evaluates the candidate's ability to set up sharing and permission sets, identify integration points, assess reporting needs, and determine deployment strategies that fit within a CI • CD environment.

With our proved data from our loyal customers that the pass rate of our Salesforce-Media-Cloud Practice Engine is as high as 99% to 100%. Your success is insured with our excellent Salesforce-Media-Cloud training questions.

Salesforce Media Cloud Accredited Professional (AP) Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

Which two solutions should a Consultant recommend to a client who wants to integrate with an ad server other than Google Ad Manager (GAM) to create an ad campaign?

Choose 2 answers

- **A. Create a custom solution using Apex code.**
- B. Use the Out of the Box Marketing Cloud Intelligence connector.
- C. Use the Out of the Box Ad Server Integration.
- **D. Create a custom integration procedure to integrate with the ad server.**

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Media Cloud provides out-of-the-box integration only with Google Ad Manager. For other ad servers, a custom integration is required either via a custom Integration Procedure or Apex code to handle API interactions and data flows. The Marketing Cloud Intelligence connector focuses on analytics, not ad server integration.

NEW QUESTION # 12

Which permission set license should a Consultant consider using when planning to allow for internal users to leverage Sales Management features such as "360° view of the Customer and Sales cycle", "Visualizations of key relationships including Agencies and Contacts," and "Digital contract lifecycle management?"

- A. Advertising Sales Management PSL
- B. Subscriber Lifecycle Management PSL
- C. OmniStudio Admin
- D. Communications Cloud Digital Experience user PSL

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Advertising Sales Management Permission Set License (PSL) is designed for internal users who require full access to Media Cloud sales features, including customer views, relationship visualizations, and contract management. OmniStudio Admin and other PSLs focus on different Salesforce clouds or administrative functions.

NEW QUESTION # 13

Which two objects should a Consultant ensure the user has write access to, for the Seller to create media plans for Digital products using the Advertising Sales Management (ASM) Create Media Plan OmniScript?

Choose 2 answers

- A. Order
- B. Media Content Title
- C. Ad Quote Line
- D. Quotes

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To create digital media plans via ASM OmniScript, users require write access to Quote and Ad Quote Line objects because these store the media plan and its line items. Order and Media Content Title are not directly involved in the creation step.

NEW QUESTION # 14

A publisher wants to empower its sales team by embedding analytic dashboards that show the actual digital delivery performance on the Salesforce account page for advertisers and agencies. The dashboard will need to be customized to reflect nuances of the publisher's business.

What should a Consultant configure or implement to solve for this use case?

- A. Integrate digital delivery sources to Big Query or Snowflake, connect Tableau to the data warehouse, and then set up an embedded Tableau dashboard on the account page.
- B. Use integration procedures to build a custom connection to the ad server to bring delivery data into the Ad Delivery object and set up a report chart on the account page.
- C. Clone one of the flex cards included in ASM and customize the parameters to display a Marketing Cloud Intelligence dashboard.
- D. Configure the Ad Delivery Connector for CRM Analytics and set up an embedded CRM dashboard.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Ad Delivery Connector for CRM Analytics is a standard Salesforce solution to display digital delivery metrics directly inside Salesforce, with embedded dashboards tailored to the publisher's business. This approach leverages native Salesforce Analytics, enabling customization and tight integration with account data. Using external data warehouses like Big Query or Tableau is more complex and less integrated.

NEW QUESTION # 15

A Media Cloud customer is already running Advertising Sales Management (ASM) on an org and wants to upgrade from an older release to a newer release.

What should a Consultant do before migration?

- A. Take a backup of any newer ASM components
- B. Customize or modify the newer ASM components
- C. Activate Custom Lightning Web Components and FlexCards
- **D. Take a backup of any customized or modified older ASM components**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Before migrating ASM to a newer release, it is crucial to take a backup of any customized or modified components in the existing (older) release to avoid losing customizations. Newer components should not be customized before migration. Activating new LWC and FlexCards is a post-migration step.
