Realistic Top 1Z0-1163-1 Dumps - Find Shortcut to Pass 1Z0-1163-1 Exam

Elementary 1Z0-1163-1 practice engine as representatives in the line are enjoying high reputation in the market rather than some useless practice materials which cash in on your worries. We can relieve you of uptight mood and serve as a considerate and responsible company with excellent 1Z0-1163-1 Exam Questions which never shirks responsibility. It is easy to get advancement by our 1Z0-1163-1 study materials. On the cutting edge of this line for over ten years, we are trustworthy company you can really count on.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Topic 2	<ul style="list-style-type: none"> OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Topic 3	<ul style="list-style-type: none"> Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.
Topic 4	<ul style="list-style-type: none"> OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.
Topic 5	<ul style="list-style-type: none"> OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Topic 6	<ul style="list-style-type: none"> OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.
Topic 7	<ul style="list-style-type: none"> OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q49-Q54):

NEW QUESTION # 49

What is the primary objective of the Order Promising process in Oracle Fusion Cloud SCM?

- A. It guarantees same-day shipping for all orders.
- B. It provides accurate order commitment dates based on supply and demand availability.**
- C. It only manages orders for direct-to-customer deliveries.

Answer: B

Explanation:

The Order Promising process in Oracle Fusion Cloud SCM, specifically through the Global Order Promising (GOP) module, aims to provide accurate and reliable order commitment dates by analyzing real-time supply and demand data. This process evaluates

factors such as current inventory levels, production schedules, supplier lead times, and transportation constraints to determine feasible delivery dates for customer orders. It ensures businesses can promise delivery dates that align with actual capabilities, enhancing customer satisfaction and operational reliability. Option A is incorrect because Order Promising is not limited to direct-to-customer deliveries—it applies to all order types, including B2B and internal transfers. Option B is also wrong as it overpromises "same-day shipping," which is not guaranteed by Oracle Fusion SCM; instead, the system focuses on realistic commitments based on constraints. For example, if a customer orders a product with limited stock and a two-day production lead time, Order Promising calculates the earliest possible delivery date rather than assuming immediate shipment. This precision reduces overpromising and underdelivering, a common issue in manual systems.

NEW QUESTION # 50

What is a primary function of Cost Accounting in Oracle Fusion Cloud SCM?

- A. It tracks and analyzes manufacturing costs to support financial reporting and decision-making.
- B. It records only customer payments, excluding supplier invoices.
- C. It prevents any fluctuations in material costs.

Answer: A

Explanation:

Cost Accounting in Oracle Fusion Cloud SCM is designed to track and analyze costs associated with manufacturing processes, including material, labor, and overhead expenses. This function supports financial reporting by providing detailed cost data and aids decision-making by offering insights into cost drivers and profitability. Option A is incorrect because cost accounting does not prevent fluctuations—it records and manages them. Option B is wrong as it encompasses supplier-related costs, not just customer payments. By maintaining accurate cost records, this module ensures compliance with accounting standards and enables strategic cost management.

NEW QUESTION # 51

What is the primary purpose of the Demand to Management OMBP in Oracle Fusion Cloud SCM?

- A. It eliminates the need for supplier collaboration.
- B. It ensures accurate demand forecasting and planning.
- C. It guarantees same-day delivery for all orders.
- D. It focuses only on local inventory availability.

Answer: B

Explanation:

The Demand to Management OMBP (C) in Oracle Fusion Cloud SCM ensures accurate demand forecasting and planning, translating market signals into actionable supply strategies. It uses tools like machine learning and collaborative forecasting to predict demand—e.g., forecasting 1,000 units for a holiday season—and aligns inventory and production accordingly. Option A is incorrect—it addresses enterprise-wide demand, not just local stock. Option B is false—no process guarantees same-day delivery; it focuses on planning. Option D is wrong—supplier collaboration is integral to fulfilling demand. This OMBP minimizes overstocking or shortages, optimizing resources and enhancing customer service through precise planning.

NEW QUESTION # 52

Which feature in Oracle Fusion Cloud SCM assesses and approves suppliers based on compliance and performance criteria?

- A. Supplier Portal.
- B. Manufacturing Execution.
- C. Supplier Qualification Management.
- D. Cost Accounting.

Answer: C

Explanation:

Supplier Qualification Management (D) assesses and approves suppliers based on compliance (e.g., regulatory standards) and performance criteria (e.g., delivery reliability). For example, it might evaluate a supplier's 95% on-time delivery rate and ISO certification before approval. Option A (Cost Accounting) tracks costs, not supplier quality. Option B (Supplier Portal) facilitates

communication, not qualification. Option C (Manufacturing Execution) manages production, not supplier vetting. This feature ensures reliable, high-quality suppliers, reducing supply chain risks and enhancing procurement outcomes.

Reference:

Below is the batch of questions formatted as requested, with comprehensive and detailed explanations verified against Oracle Fusion Cloud Applications SCM and Procurement documentation. Each explanation is extensive, covering the reasoning behind the correct answer, why other options are incorrect, practical examples, and the broader implications within the SCM or Procurement framework. All questions have four options, so the format includes A, B, C, and D. Note that Question 11 was included in this batch as it aligns with the pattern of your request.

NEW QUESTION # 53

What is the primary function of the Available to Promise (ATP) process in Oracle Fusion Cloud SCM?

- A. It ensures product availability commitments based on inventory and supply constraints.
- B. It manages only supplier payments without impacting inventory levels.
- C. It eliminates the need for demand forecasting.
- D. It guarantees immediate shipment for all orders.

Answer: A

Explanation:

The Available to Promise (ATP) process (A) in Oracle Fusion Cloud SCM calculates the quantity of products available to commit to new customer orders by analyzing current inventory levels and supply constraints, such as production capacity, supplier lead times, and existing order commitments. For example, if a warehouse has 200 units of a product with 50 already promised, ATP indicates 150 units are available, ensuring accurate delivery promises. This real-time calculation prevents overpromising and aligns customer expectations with operational reality. Option B is incorrect-ATP does not guarantee immediate shipment but provides feasible timelines based on availability, not an unrealistic universal promise. Option C is false-demand forecasting complements ATP by informing supply planning; it doesn't eliminate it. Option D is irrelevant-supplier payments are managed by financial modules, not ATP, which focuses on inventory and supply. By ensuring reliable commitments, ATP enhances customer satisfaction, reduces order cancellations, and optimizes resource use across the supply chain.

NEW QUESTION # 54

.....

Overall, 1Z0-1163-1 is committed to helping candidates achieve success in the Oracle 1Z0-1163-1 exam. Their goal is to save students time and money, and they guarantee that candidates who use their product will pass the 1Z0-1163-1 Exam on their first try. With the right study material and support team, passing the exam at the first attempt is an achievable goal.
