## 2026 Updated C-SIGDA-2403 Test Cram | Updated 100% Free C-SIGDA-2403 Practice Exam

The learning material is available in three different easy-to-use forms. The first one is a PDF form. The students can save the C-SIGDA-2403 questions by taking out their prints or can access them on their smartphones, tablets, and laptops. The PDF form can be used anywhere anytime and is essential for applicants who like to learn from their smart devices. The second form is SAP Certified Associate - Process Data Analyst - SAP Signavio (C-SIGDA-2403) web-based practice test which can be taken from browsers.

## SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q51-Q56):

### NEW QUESTION # 51

How does Process Mining help companies? Note: There are 2 correct answers to this question.

- A. By adapting to rapid changes in the global market and customer expectations
- B. By creating different data views
- C. By preparing data that's used when analyzing processes
- D. By creating dashboards and visualizing them in the Collaboration Hub

**Answer: A,C**

### NEW QUESTION # 52

How can users provide comments on the process content? Note: There are 2 correct answers to this question.

- A. Select an element and use the Comment button
- B. Click the Comment button on the menu
- C. Click the Provide Feedback button above the diagram
- D. Click the speech-bubbles icon above the diagram to open the Comment section

**Answer: A,D**

Explanation:

Commenting on process content in the SAP Signavio Process Collaboration Hub is a key collaboration feature, allowing users to provide feedback directly on process models. The documentation outlines the methods:

\* Exact Extract: "Users can provide comments on process content in the SAP Signavio Process Collaboration Hub by:

\* Clicking the speech-bubbles icon above the diagram to open the Comment section and add general or element-specific comments.

\* Selecting a specific process element (e.g., a task) and using the Comment button to add targeted feedback." (SAP Signavio Process Collaboration Hub User Guide, section on "Commenting Features").

\* Explanation:

\* Option C (Click the speech-bubbles icon above the diagram to open the Comment section):

This is correct as the speech-bubbles icon, typically located above the process diagram, opens a commenting panel where users can add general comments or tag specific elements for feedback.

\* Option D (Select an element and use the Comment button): This is correct because selecting a process element (e.g., a task or gateway) and clicking the Comment button allows users to add context-specific comments directly linked to that element.

\* Option A (Click the Provide Feedback button above the diagram) is incorrect as there is no specific "Provide Feedback" button in the Collaboration Hub; feedback is provided via comments.

\* Option B (Click the Comment button on the menu) is incorrect because the menu does not have a dedicated Comment button; commenting is accessed via the diagram interface.

### NEW QUESTION # 53

What does the strategic level focus on in Business Process Management?

- A. Align business processes to company goals.
- B. Support business processes with the right systems.
- C. Define responsibilities in business processes.
- D. Run business tasks efficiently.

**Answer: A**

### NEW QUESTION # 54

What is end-to-end process management?

- A. Aligning all business operations to a certain customer need / outcome
- B. Aligning all processes within a certain business across different departments
- C. Aligning all processes within a certain department
- D. Aligning all tasks within a certain process

**Answer: A**

Explanation:

End-to-end process management in SAP Signavio refers to the alignment of all business operations towards a specific customer need or outcome. This approach involves the complete mapping and management of processes that span the entire organization, covering multiple departments and ensuring that every aspect of the process is directed towards satisfying customer requirements efficiently and effectively.

### NEW QUESTION # 55

Which Widget is automatically created after creating a new investigation?

- A. Process Discovery
- B. Variant Explorer
- C. Process Conformance
- D. Value

**Answer: A**

Explanation:

When a new investigation is created in SAP Signavio Process Intelligence, the Process Discovery Widget is automatically generated. This widget is fundamental for visualizing the actual process as it occurs, based on the data derived from event logs. It provides an immediate, visual representation of the process flow, identifying the steps involved and how they connect. This automatic generation facilitates a quick start in analyzing the process, making it easier for users to begin their investigation into process efficiencies and bottlenecks.
