

# SAP C\_BW4H\_2505 Valid Test Discount, C\_BW4H\_2505 Pdf Exam Dump

P.S. Free 2026 SAP C\_BW4H\_2505 dumps are available on Google Drive shared by DumpsMaterials: [https://drive.google.com/open?id=1EB\\_jYHC9g3U83gup8HHfcOCIGbEF80Gs](https://drive.google.com/open?id=1EB_jYHC9g3U83gup8HHfcOCIGbEF80Gs)

From the view of specialized examination point, it is necessary to teach you tips about the exam. You need to outsmart, and do not give your future the chance of failure. DumpsMaterials is a great resource site. It includes SAP C\_BW4H\_2505 Exam Materials, study materials and technical materials, as well as exam training and detailed explanation and answers. The website which provide exam information are surged in recent years. This may cause you clueless when you prepare the SAP C\_BW4H\_2505 Exam. DumpsMaterials's SAP C\_BW4H\_2505 exam training materials are effective training materials that proven by professionals and the candidates who passed the exam. It can help you to pass the exam certification easily.

## SAP C\_BW4H\_2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• SAP BW</li><li>• 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW</li><li>• 4HANA. It focuses on designing scalable, high-performing data models.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Native SAP HANA Modeling: This section evaluates the ability of SAP Consultants to describe and apply native modeling options in SAP HANA. It emphasizes understanding how to build optimized data structures directly within the HANA platform.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Data Acquisition into SAP BW</li><li>• 4HANA: This section tests how Data Engineers manage data integration into SAP BW</li><li>• 4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• SAP BW</li> <li>• 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW</li> <li>• 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing.</li> </ul>

## C\_BW4H\_2505 Pdf Exam Dump & C\_BW4H\_2505 Test Testking

Many candidates find the SAP C\_BW4H\_2505 exam preparation difficult. They often buy expensive study courses to start their SAP C\_BW4H\_2505 certification exam preparation. However, spending a huge amount on such resources is difficult for many SAP Certified Associate - Data Engineer - SAP BW/4HANA exam applicants. The latest SAP C\_BW4H\_2505 Exam Dumps are the right option for you to prepare for the SAP C\_BW4H\_2505 certification test at home.

### SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q57-Q62):

#### NEW QUESTION # 57

Which SAP BW/4HANA objects support the feature of generating an external SAP HANA View? Note: There are 2 correct answers to this question.

- A. BW query
- B. Open ODS view
- C. Composite Provider
- D. Semantic group object

**Answer: A,B**

Explanation:

In SAP BW/4HANA, certain objects support the generation of external SAP HANA views, enabling seamless integration with SAP HANA's in-memory capabilities and allowing consumption by other tools or applications outside of SAP BW/4HANA. Below is an explanation of the correct answers:

A). BW query A BW query in SAP BW/4HANA can generate an external SAP HANA view. This feature allows the query to be exposed as a calculation view in SAP HANA, making it accessible for reporting tools like SAP Analytics Cloud (SAC), SAP BusinessObjects, or custom applications. By generating an external HANA view, the BW query leverages SAP HANA's performance optimization while maintaining the analytical capabilities of SAP BW/4HANA.

\* SAP BW/4HANA Query Designer includes functionality to expose queries as external HANA views. This is documented in the SAP BW/4HANA Query Design Guide and is part of the broader integration between SAP BW/4HANA and SAP HANA.

B). Open ODS view Open ODS views are designed to provide direct access to data stored in SAP HANA tables or other sources. They inherently support the generation of external SAP HANA views, as they are tightly integrated with SAP HANA's modeling capabilities. Open ODS views act as a bridge between SAP BW/4HANA and SAP HANA, allowing data to be consumed directly by external tools or applications via HANA views.

Reference: The Open ODS view functionality is a core feature of SAP BW/4HANA, as described in the SAP BW/4HANA Modeling Guide. It is specifically designed to leverage SAP HANA's native capabilities, including the generation of external views.

Incorrect Options C. Composite Provider Composite Providers in SAP BW/4HANA combine data from multiple sources (e.g., InfoProviders, Open ODS views, or HANA tables) into a unified structure for reporting. However, Composite Providers do not directly support the generation of external SAP HANA views. While they can be used within SAP BW/4HANA for reporting purposes, their architecture does not include the ability to expose themselves as HANA views.

Reference: The SAP BW/4HANA Modeling Guide explicitly states that Composite Providers are internal to SAP BW/4HANA and do not generate external HANA views.

D). Semantic group object Semantic group objects are used to organize and manage metadata in SAP BW/4HANA. They do not represent physical data structures or support the generation of external SAP HANA views. Instead, they

serve as logical containers for grouping related objects, such as InfoObjects or queries, for easier navigation and maintenance. Reference: The SAP BW/4HANA Administration Guide describes semantic groups as organizational tools rather than data modeling or integration components.

Conclusion The two SAP BW/4HANA objects that support the feature of generating an external SAP HANA view are:  
BW query

Open ODS view

These objects enable seamless integration with SAP HANA's in-memory database and allow external tools to consume data modeled in SAP BW/4HANA. This capability underscores the tight integration between SAP BW/4HANA and SAP HANA, leveraging the strengths of both platforms for advanced analytics and reporting.

### NEW QUESTION # 58

Which solution enables advanced AI and machine learning models on combined SAP and third-party data?

- A. SAP Analytics Cloud
- B. SAP AI Launchpad
- C. SAP Datasphere
- D. SAP Databricks

**Answer: D**

### NEW QUESTION # 59

You want to set up the replication process for the SAP Landscape Transformation Replication Server. Which actions can you define for a specific table? Note: There are 3 correct answers to this question.

- A. Apply customizing settings to the database redo logs
- B. Set the reading type and portion sizes
- C. Change or enrich the table structure
- D. Apply mapping rules during the replication
- E. Convert Unicode to non-Unicode

**Answer: B,C,D**

Explanation:

SAP BW/4HANA Project and Modeling Process

### NEW QUESTION # 60

You notice that an SAP ERP ODP\_SAP DataSource is delivering incorrect values into the first persistent data layer in SAP BW/4HANA. Which options do you have to analyze a potential extractor issue? Note: There are 2 correct answers to this question.

- A. Check entries in the table RSDDSTATEXTRACT in SAP ERP.
- B. Use the transaction RSA3 (Extractor checker) in SAP ERP.
- C. Use the transaction ODQMON (Monitor Delta Queues) in SAP BW/4HANA.
- D. Use the program RODPS\_REPL\_TEST in SAP ERP.

**Answer: B,D**

Explanation:

When dealing with incorrect values being delivered by an SAP ERP ODP\_SAP DataSource into the first persistent data layer in SAP BW/4HANA, it is crucial to analyze potential issues at the extractor level in the SAP ERP system. Below is a detailed explanation of the correct answers:

\* Explanation: The program RODPS\_REPL\_TEST is used to test the replication of data from an ODP\_SAP DataSource in the SAP ERP system. It allows you to simulate the extraction process and verify whether the data being extracted matches the expected values. This helps identify issues with the extractor logic or configuration.

\* RODPS\_REPL\_TEST is a standard tool provided by SAP for testing ODP-based DataSources. It is particularly useful for diagnosing issues related to data extraction in SAP ERP systems.

Option B: Use the transaction ODQMON (Monitor Delta Queues) in SAP BW/4HANA Explanation:

ODQMON is used in SAP BW/4HANA to monitor delta queues and ensure that data is being transferred correctly from the source

system. However, it does not help analyze issues at the extractor level in the SAP ERP system. ODQMON focuses on the BW/4HANA side of the data transfer process.

Reference: ODQMON is primarily a monitoring tool for delta queues in BW/4HANA and is not suitable for diagnosing extractor issues in the ERP system.

Option C: Use the transaction RSA3 (Extractor checker) in SAP ERP. Explanation: RSA3 is a powerful tool for testing and validating extractors in the SAP ERP system. It allows you to execute the extractor logic and view the extracted data directly in the ERP system. By comparing the extracted data with the expected values, you can identify issues such as incorrect mappings, filters, or transformations.

Reference: RSA3 is widely used for debugging extractor issues in SAP ERP systems. It is an essential tool for ensuring that DataSources deliver accurate data to SAP BW/4HANA.

Option D: Check entries in the table RSDDSTATEXTRACT in SAP ERP. Explanation: The table RSDDSTATEXTRACT is not a valid or standard table in SAP ERP systems. It does not exist in the context of ODP\_SAP DataSources or extractor diagnostics. Therefore, this option is incorrect.

Reference: SAP documentation does not mention RSDDSTATEXTRACT as a relevant table for analyzing extractor issues.

Summary To analyze potential extractor issues in the SAP ERP system:

RODPS\_REPL\_TEST: Simulates and tests the extraction process for ODP\_SAP DataSources.

RSA3: Validates the extractor logic and verifies the extracted data.

These tools help identify and resolve issues at the extractor level, ensuring that correct data is delivered to the first persistent data layer in SAP BW/4HANA.

## NEW QUESTION # 61

What are some of the prerequisites for using SAP S/4HANA ABAP CDS views for extraction into SAP BW/4HANA in an ODP context? Note: There are 2 correct answers to this question.

- A. The ABAP CDS views must be released through the program RODPS\_OS\_EXPOSE for BW extraction.
- B. An ODP source system with context ODP\_CDS must be created in SAP BW/4HANA.
- C. The Operational Data Provisioning Framework must be configured in SAP BW/4HANA.
- D. The ABAP CDS views must be defined with the appropriate data extraction annotations.

**Answer: A,B**

Explanation:

Extracting data from SAP S/4HANA ABAP CDS (Core Data Services) views into SAP BW/4HANA using the Operational Data Provisioning (ODP) framework requires specific prerequisites. These ensure that the CDS views are properly exposed and accessible for extraction. Below is a detailed explanation of why the verified answers are correct.

\* ABAP CDS Views: ABAP CDS views are reusable data models defined in SAP S/4HANA. They provide a semantic layer for querying data and can be used for reporting and analytics.

\* Operational Data Provisioning (ODP): ODP is a framework in SAP BW/4HANA that enables real-time or near-real-time data extraction from various source systems, including SAP S/4HANA.

\* ODP Contexts: ODP contexts define the type of source system and data extraction method. For CDS views, the context ODP\_CDS is used.

\* Data Extraction Annotations: Annotations in CDS views specify metadata for extraction purposes, such as field properties and extraction behavior.

Key Concepts:

\* Option A: The ABAP CDS views must be released through the program RODPS\_OS\_EXPOSE for BW extraction.

\* Why Correct? To make an ABAP CDS view available for extraction via ODP, it must be explicitly released using the program RODPS\_OS\_EXPOSE. This step registers the view in the ODP framework and makes it accessible to SAP BW/4HANA.

\* Option B: The Operational Data Provisioning Framework must be configured in SAP BW/4HANA.

\* Why Incorrect? While configuring the ODP framework is a general prerequisite for any ODP-based extraction, it is not specific to extracting ABAP CDS views. This option is too broad to be considered a direct prerequisite.

\* Option C: An ODP source system with context ODP\_CDS must be created in SAP BW/4HANA.

\* Why Correct? To extract data from ABAP CDS views, you must create an ODP source system in SAP BW/4HANA with the context ODP\_CDS. This context specifies that the source system provides data from CDS views.

\* Option D: The ABAP CDS views must be defined with the appropriate data extraction annotations.

\* Why Incorrect? While annotations are important for defining metadata in CDS views, they are not mandatory for ODP-based extraction. The primary requirement is releasing the view using RODPS\_OS\_EXPOSE.

Verified Answer Explanation:

\* SAP BW/4HANA Extraction Guide: The guide outlines the steps for extracting data from ABAP CDS views using the ODP framework, including the use of RODPS\_OS\_EXPOSE and the creation of an ODP source system.

\* SAP Note 2700850: This note provides detailed instructions on releasing CDS views for BW extraction and configuring the ODP

framework.

\* SAP Best Practices for ODP Extraction: SAP recommends using the ODP\_CDS context for extracting data from ABAP CDS views and emphasizes the importance of releasing views using RODPS\_OS\_EXPOSE.

## NEW QUESTION # 62

.....

If you are craving for getting promotion in your company, you must master some special skills which no one can surpass you. To suit your demands, our company has launched the SAP Certified Associate - Data Engineer - SAP BW/4HANA C\_BW4H\_2505 exam materials especially for office workers. For on one hand, they are busy with their work, they have to get the SAP C\_BW4H\_2505 Certification by the little spread time.

**C\_BW4H\_2505 Pdf Exam Dump:** [https://www.dumpsmaterials.com/C\\_BW4H\\_2505-real-torrent.html](https://www.dumpsmaterials.com/C_BW4H_2505-real-torrent.html)
