

Valid AIGP exam materials offer you accurate preparation dumps

5. Study Resources (Books, Practice Papers, Videos, Training)

Your study plan will only be as good as the resources you use. Quality study materials can make a huge difference in understanding the content and ultimately acing the exam.

- **Official IAPP Study Guide:** Start with official materials if available. The IAPP often provides an **official AIGP study guide** or textbook. This is gold because it's aligned exactly with the exam syllabus. According to one source, a comprehensive IAPP AIGP Study Guide covers all the syllabus topics, provides easy-to-understand explanations, and even practical examples.
- **Books and Publications:** Beyond official guides, look for books on AI governance, AI ethics, and privacy that cover the material. As of now, there might not be a plethora of AIGP-specific books besides IAPP's own, but topics like "ethical AI", "AI law", etc., are covered in academic and professional books.
- **Practice Papers and Question Banks:** Practice questions are your best friend for exam prep. They test your knowledge and get you in the mindset of how questions are asked.
- **Mock Exams:** In addition to practice question sets, take full-length mock exams as you approach test day. Platforms like **CertFun** offer realistic practice exams with an interface similar to the actual test.
- **Training Courses:** Self-study is great, but guided preparation can make all the difference. If you prefer structured learning, consider enrolling in official or third-party training programs aligned with the AIGP syllabus. InfosecTrain's **AIGP training** is specifically designed to cover the exam objectives thoroughly, with expert guidance and hands-on practice. Access structured learning, hands-on exercises, practice questions, and insider exam tips.

IAPP AIGP Testking - AIGP Prüfungsmaterialien

Aufgrund der großen Übereinstimmung mit den echten Prüfungsfragen- und Antworten können wir Ihnen 100%-Pass-Garantie versprechen. Wir aktualisieren jeden Tag nach den Informationen von Prüfungsabsolventen oder Mitarbeiter von Testcentern, unsere

IAPP Certified Artificial Intelligence Governance Professional AIGP Prüfungsfragen mit Lösungen (Q103-Q108):

103. Frage

According to the GDPR's transparency principle, when an AI system processes personal data in automated decision-making, controllers are required to provide data subjects specific information on?

- **A. The existence of automated decision-making and meaningful information on its logic and consequences.**
- B. The data protection impact assessments carried out on the AI system and legal bases for processing.
- C. The personal data used during processing, including inferences drawn by the AI system about the data.
- D. The contact details of the data protection officer and the data protection national authority.

Antwort: A

Begründung:

The GDPR's transparency principle requires that when personal data is processed for automated decision-making, including profiling, data subjects must be informed about the existence of such automated decision-making. Additionally, they must be provided with meaningful information about the logic involved, as well as the significance and the envisaged consequences of such processing for them. This requirement ensures that data subjects are fully aware of how their personal data is being used and the potential impacts, thereby promoting transparency and trust in the processing activities.

104. Frage

CASE STUDY

A global marketing agency is adapting a large language model ("LLM") to generate content for an upcoming marketing campaign for a client's new product: a hard hat designed for construction workers of any gender to better protect them from head injuries. The marketing agency is accessing the LLM through an application programming interface ("API") developed by a third-party technology company. They want to generate text to be used for targeted advertising communications that highlight the benefits of the hard hat to potential purchasers. Both the marketing agency and the technology company have taken reasonable steps to address AI governance.

The marketing company has:

- * Entered into a contract with the technology company with suitable representations and warranties.
- * Completed an impact assessment on the LLM for this intended use.
- * Built technical guidance on how to measure and mitigate bias in the LLM.
- * Enabled technical aspects of transparency, explainability, robustness and privacy.
- * Followed applicable regulatory requirements.
- * Created specific legal statements and disclosures regarding the use of the AI on its client's advertising.

The technology company has:

- * Provided guidance and resources to developers to address environmental concerns.
- * Built technical guidance on how to measure and mitigate bias in the LLM.
- * Provided tools and resources to measure bias specific to the LLM.
- * Enabled technical aspects of transparency, explainability, robustness and privacy.
- * Mapped and mitigated potential societal harms and large-scale impacts.
- * Followed applicable regulatory requirements and industry standards.
- * Created specific legal statements and disclosures regarding the LLM, including with respect to IP and rights to data.

The technology company has also addressed environmental concerns and societal harms.

Which of the following results would be considered biased outputs from this AI system EXCEPT?

- A. The images of female workers are hyper-sexualized
- **B. The generated ads are sent to construction companies, not individual workers**
- C. The advertising text generated for female audiences focuses on color and style
- D. The content generated for minority construction workers is insufficient

Antwort: B

Begründung:

The correct answer is A. Sending ads to construction companies (business entities) rather than individual workers is a business targeting decision, not inherently a biased AI output.

From the AIGP ILT Participant Guide - Bias & Fairness Module:

"Biased outputs often include stereotyping, exclusion of underrepresented groups, or reinforcing harmful societal assumptions."

Examples like insufficient representation of minority groups or gender-stereotyping in visuals or language are typical manifestations of bias.

AI Governance in Practice Report 2024 also notes:

"Bias in generative models may manifest in representation gaps, stereotyping, or unequal performance across demographic groups."

Option A, by contrast, describes a distribution strategy, not a bias generated by the AI model.

105. Frage

All of the following are obligations of a distributor of high risk systems under the EU AI Act EXCEPT:

- A. Communication with national authorities.
- B. Verification of CE marking.
- C. Corrective actions.
- D. Registration in EU Database.

Antwort: D

Begründung:

Registration in the EU database is an obligation of the provider, not the distributor. Distributors handle CE-mark verification, corrective actions, and communication with authorities, but they do not register high-risk systems in the EU database.

106. Frage

During the planning and design phases of the AI development life cycle, bias can be reduced by all of the following EXCEPT?

- A. Data collection.
- B. Human oversight.
- C. Stakeholder involvement.
- D. Feature selection.

Antwort: D

Begründung:

Bias in AI can be reduced during the planning and design phases through stakeholder involvement, human oversight, and careful data collection. While feature selection is critical in the development phase, it does not specifically occur during planning and design.

Ensuring diverse stakeholder involvement and human oversight helps identify and mitigate potential biases early, and data collection ensures a representative dataset.

107. Frage

CASE STUDY

Please use the following to answer the next question:

A global marketing agency is adapting a large language model ("LLM") to generate content for an upcoming marketing campaign for a client's new product: a hard hat designed for construction workers of any gender to better protect them from head injuries.

The marketing agency is accessing the LLM through an application programming interface ("API") developed by a third-party technology company. They want to generate text to be used for targeted advertising communications that highlight the benefits of the hard hat to potential purchasers. Both the marketing agency and the technology company have taken reasonable steps to address AI governance.

The marketing company has:

- Entered into a contract with the technology company with suitable representations and warranties.
- Completed an impact assessment on the LLM for this intended use.
- Built technical guidance on how to measure and mitigate bias in the LLM.
- Enabled technical aspects of transparency, explainability, robustness and privacy.
- Followed applicable regulatory requirements.
- Created specific legal statements and disclosures regarding the use

of the AI on its client's advertising.

The technology company has:

- Provided guidance and resources to developers to address environmental concerns.
- Build technical guidance on how to measure and mitigate bias in the LLM.
- Provided tools and resources to measure bias specific to the LLM.
- Enabled technical aspects of transparency, explainability, robustness and privacy.
- Mapped and mitigated potential societal harms and large-scale impacts.
- Followed applicable regulatory requirements and industry standards.
- Created specific legal statements and disclosures regarding the LLM, including with respect to IP and rights to data.

Which stakeholder is responsible for lawful collection of data for the training of the foundational AI model?

- A. The marketing agency.
- **B. The tech company.**
- C. The marketing agency's client.
- D. The data aggregator.

Antwort: B

108. Frage

.....

Die Konkurrenz in der IT-Branche im 21. Jahrhundert ist sehr hart. Natürlich ist die IAPP AIGP Zertifizierungsprüfung zu einer sehr beliebten Prüfung im IT-Bereich geworden. Immer mehr Menschen beteiligen sich an der AIGP Prüfung. Die Prüfung zu bestehen, ist auch der Traum der ambitionierten IT-Fachleuten.
