

高通過率的最新C_BCBTP_2502試題|高通過率的考試材料|專業的C_BCBTP_2502認證題庫

P.S. NewDumps在Google Drive上分享了免費的2026 SAP C_BCBTP_2502考試題庫：<https://drive.google.com/open?id=1ZQGmRlcwA56oVr8QrS9LX6YU8jPXMxlr>

NewDumps提供的C_BCBTP_2502考古題是最全面的學習資料，這是一個可以讓您高效高速的掌握知識的題庫寶典。我們提供的SAP C_BCBTP_2502模擬測試題及答案和真實考試的題目及答案有95%的相似性，能保證您100%通過C_BCBTP_2502認證考試，滿足廣大考生需求。當您真的了解我們產品的可靠性之后，您會毫不猶豫的購買它，因為SAP C_BCBTP_2502是您最好的選擇，甚至是您未來職業生涯成功不可缺少的。

NewDumps是一個為參加C_BCBTP_2502認證考試的考生提供C_BCBTP_2502認證考試培訓工具的網站。NewDumps提供的培訓工具很有針對性，可以幫他們節約大量寶貴的時間和精力。我們的練習題及答案和真實的考試題目很接近。短時間內使用NewDumps的模擬測試題你就可以100%通過考試。這樣花少量的時間和金錢換取如此好的結果，是值得的。快將NewDumps提供的培訓工具放入你的購物車中吧。

SAP C_BCBTP_2502認證題庫，C_BCBTP_2502證照信息

我們NewDumps網站是個歷史悠久的SAP的C_BCBTP_2502考試認證培訓資料網站。在認證IT行業已經很久了，所以才有今天赫赫有名的地位及知名度，這都是幫助那些考生而得到的結果。我們的SAP的C_BCBTP_2502考試認證培訓資料包含試題及答案，這些資料是由我們資深的IT專家團隊通過自己的知識及不斷摸索的經驗而研究出來的，它的內容有包含真實的考試題，如果你要參加SAP的C_BCBTP_2502考試認證，選擇NewDumps是無庸置疑的選擇。

SAP C_BCBTP_2502 考試大綱：

主題	簡介

主題 1	<ul style="list-style-type: none"> • Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.
主題 2	<ul style="list-style-type: none"> • Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

最新的 SAP Certified Associate C_BCBTP_2502 免費考試真題 (Q27-Q32):

問題 #27

How does SAP LeanIX support IT landscape management when integrated with SAP BTP?

- **A. By providing enterprise architecture visualization and analysis.**
- B. By enforcing manual IT infrastructure tracking.
- C. By restricting governance of IT landscapes.
- D. By preventing real-time integration with business processes.

答案: A

解題說明:

As organizations adopt SAP BTP to build and extend their applications, their IT landscapes can become increasingly complex. SAP LeanIX (now a core part of SAP's enterprise architecture strategy) supports management by providing comprehensive visualization and analysis of the enterprise architecture. When integrated with SAP BTP, LeanIX allows IT leaders to see exactly how different BTP services, cloud applications, and on-premise systems are interconnected. This "map" of the IT landscape is essential for identifying redundant applications, managing technical debt, and ensuring that the IT strategy aligns with business goals.

The positioning of LeanIX alongside BTP is crucial for "Transformation Management." During a move to SAP S/4HANA or a transition to the cloud, LeanIX helps organizations plan their roadmap by showing the impact of changes on the existing architecture. It provides data-driven insights into which applications are critical, which are obsolete, and where there are gaps in security or compliance. By providing this transparency, LeanIX empowers architects to make informed decisions about where to deploy new BTP services. This prevents the "sprawl" of unmanaged cloud services and ensures that the evolution of the SAP Business Suite is organized, cost-effective, and fully aligned with the broader digital transformation objectives of the company.

問題 #28

What is a competitive advantage of SAP BTP for businesses?

- A. Eliminates the need for AI-driven automation.
- B. Prevents integration with multi-cloud environments.
- **C. Provides a unified platform for AI, analytics, and automation.**
- D. Limits businesses to SAP ERP-only solutions.

答案: C

解題說明:

The primary competitive advantage of SAP BTP lies in its unified nature, bringing together AI, analytics, integration, and automation into a single cohesive platform. Many organizations struggle with "point solutions"-using one vendor for AI, another for database management, and a third for integration. This fragmentation creates technical debt and data silos. SAP BTP solves this by providing a consistent set of tools and a shared data model, which allows for faster innovation and a lower total cost of ownership.

By having these capabilities on a single platform, businesses can create "end-to-end" intelligent scenarios. For example, a company can use Integration Suite to pull data from a third-party CRM, SAP HANA Cloud to process that data in real-time, SAP AI Core to predict customer behavior, and SAP Build Process Automation to trigger a marketing campaign based on those predictions. This level of cross-functional orchestration is difficult to achieve with fragmented systems. Positioning SAP BTP as the "technological foundation" allows businesses to focus on business outcomes rather than managing infrastructure, giving them a significant edge in

agility and speed-to-market compared to competitors using traditional, siloed architectures.

問題 #29

Which SAP BTP capability is crucial for supply chain resilience in the logistics industry?

- A. Limiting automation in fleet management.
- B. Restricting logistics data visibility to local servers.
- **C. Real-time data exchange and tracking with SAP Integration Suite.**
- D. Manual coordination of supply chain operations.

答案： C

解題說明：

Supply chain resilience depends on visibility and the ability to react to disruptions in real-time. The SAP Integration Suite on BTP is crucial here because it enables real-time data exchange and tracking across a global network of suppliers, carriers, and warehouses. In the logistics industry, delays at a single port or a shortage of specific raw materials can have a cascading effect. By integrating IoT (Internet of Things) sensors, GPS tracking, and carrier management systems through the BTP Integration Suite, companies can gain a

"control tower" view of their entire supply chain.

This connectivity allows for "event-driven" logistics. For example, if a shipment is delayed, the system can automatically trigger a notification in the SAP S/4HANA system, recalculate production schedules, and notify customers—all without manual intervention. This level of automation and visibility is what builds resilience; it allows businesses to pivot quickly when faced with unexpected challenges. Positioning SAP BTP as the integration hub for logistics ensures that data flows smoothly between the "digital core" and the physical world of shipping and receiving. This transforms the supply chain from a linear, often opaque process into a dynamic, responsive network that can withstand the pressures of modern global commerce.

問題 #30

Which SAP BTP services support AI-driven automation? (Choose two).

- A. SAP Business Network
- **B. SAP AI Core**
- **C. SAP Business Process Intelligence**
- D. SAP Concur

答案： B,C

解題說明：

AI-driven automation on SAP BTP is achieved through a combination of foundational infrastructure and process analysis tools. SAP AI Core is a key service that provides a dedicated runtime for AI workloads. It allows developers to manage the entire lifecycle of machine learning models—from training to deployment— at scale. It is designed to handle large datasets and complex computations while ensuring that AI models are transparent and compliant with enterprise standards. By using SAP AI Core, businesses can embed predictive capabilities directly into their business logic.

Complementing this is SAP Business Process Intelligence (part of the SAP Signavio suite). This service uses AI to "mine" data from existing business processes to identify inefficiencies, bottlenecks, and manual tasks that are prime candidates for automation. It provides the "sight" to see where automation is needed, while SAP AI Core provides the "brain" to execute intelligent decisions. Together, these services allow an organization to move beyond simple task automation toward intelligent process transformation. SAP Concur and SAP Business Network, while benefiting from these technologies, are SaaS applications rather than the underlying services that facilitate the creation and management of AI-driven automation workflows within the BTP ecosystem.

問題 #31

What is the primary function of SAP Business Process Intelligence?

- **A. To analyze and optimize business processes using AI-driven insights.**
- B. To store customer transactional data.
- C. To replace existing workflow automation tools.
- D. To manage API security and integrations.

答案： A
