Free PDF Quiz 2026 CheckPoint 156-315.81: Perfect Test Check Point Certified Security Expert R81 Dumps Pdf

With the collection of 156-315.81 real questions and answers, our website aim to help you get through the real exam easily in your first attempt. There are 156-315.81 free demo and dumps files that you can find in our exam page, which will play well in your certification preparation. We give 100% money back guarantee if our candidates will not satisfy with our 156-315.81 vce braindumps.

CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q388-Q393):

NEW QUESTION # 388

CoreXL is NOT supported when one of the following features is enabled: (Choose three)

- A. Overlapping NAT
- B. IPv6
- C. IPS
- D. Route-based VPN

Answer: A,B,D

Explanation:

Explanation

CoreXL is not supported when one of the following features is enabled: Check Point QoS (Quality of Service), Route-based VPN, IPv6 on IPSO, or Overlapping NAT. CoreXL is a performance-enhancing technology that allows multiple CPU cores to concurrently handle network traffic. IPS is supported by CoreXL and can benefit from its acceleration. References: : Check Point Software, Getting Started, CoreXL; : Check Point Software, Getting Started, IPS.

NEW QUESTION # 389

What is not a component of Check Point SandBlast?

- A. Threat Cloud
- B. Threat Simulator
- C. Threat Extraction
- D. Threat Emulation

Answer: B

NEW QUESTION # 390

The customer has about 150 remote access user with a Windows laptops. Not more than 50 Clients will be connected at the same time. The customer want to use multiple VPN Gateways as entry point and a personal firewall. What will be the best license for him?

- A. He will need Harmony Endpoint because of the personal firewall.
- B. Because the customer uses only Windows clients SecuRemote will be sufficient and no additional license is needed
- C. He will need Capsule Connect using MEP (multiple entry points).
- D. Mobile Access license because he needs only a 50 user license, license count is per concurrent user.

Answer: A

Explanation:

Harmony Endpoint is a solution that provides comprehensive protection for endpoint devices against cyber threats. Harmony Endpoint includes a personal firewall that controls the network traffic to and from the endpoint device, based on predefined rules and policies. Harmony Endpoint also integrates with Check Point's VPN solutions to provide secure remote access to corporate resources¹. Therefore, the customer will need Harmony Endpoint because of the personal firewall requirement.

NEW QUESTION # 391

What is the recommended number of physical network interfaces in a Mobile Access cluster deployment?

- A. 2 Interfaces - a data interface leading to the organization and the Internet, a second interface for synchronization.
- B. 4 Interfaces - an interface leading to the organization, a second interface leading to the internet, a third interface for synchronization, a fourth interface leading to the Security Management Server.
- C. 1 Interface - an interface leading to the organization and the Internet, and configure for synchronization.
- D. 3 Interfaces - an interface leading to the organization, a second interface leading to the Internet, a third interface for synchronization.

Answer: D

Explanation:

Explanation

According to the Check Point R81 Mobile Access Administration Guide, the recommended number of physical network interfaces in a Mobile Access cluster deployment is . One interface should be connected to the organization network, one interface should be

connected to the Internet, and one interface should be used for synchronization between cluster members. This configuration provides optimal performance and security for Mobile Access traffic.

NEW QUESTION # 392

What is the difference between SSL VPN and IPsec VPN?

- A. SSL VPN requires installation of a resident VPN client.
- **B. IPsec VPN requires installation of a resident VPN client and SSL VPN requires only an installed Browser.**
- C. IPsec VPN does not require installation of a resilient VPN client.
- D. SSL VPN and IPsec VPN are the same.

Answer: B

Explanation:

Explanation

The main difference between SSL VPN (Secure Sockets Layer Virtual Private Network) and IPsec VPN (Internet Protocol Security Virtual Private Network) is in the way they operate:

SSL VPN typically does not require the installation of a resident VPN client. It often relies on a web browser to establish the VPN connection, making it more convenient for remote users who may not want to install dedicated VPN software.

IPsec VPN, on the other hand, often requires the installation of a resident VPN client on the user's device to establish the VPN connection. This client software is necessary for configuring and managing the VPN connection.

Option C, stating that SSL VPN and IPsec VPN are the same, is incorrect because they have distinct characteristics as described above.

Option A is incorrect because it inaccurately suggests that IPsec VPN does not require a resident VPN client, which is not true in most cases.

Option B is incorrect because it wrongly claims that SSL VPN requires the installation of a resident VPN client.
