### **SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q42-Q47):**

#### **NEW QUESTION # 42**

What do you need to create to test APIs on your SAP S/4HANA Cloud Public Edition system using the SAP Business Accelerator Hub? Note: There are 2 correct answers to this question.

- A. A communication scenario
- B. An API
- **C. A communication system**
- **D. A communication arrangement**

**Answer: C,D**

#### **NEW QUESTION # 43**

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- A. Use the Test system to demonstrate SAP Best Practice processes.
- B. Define the organizational structure and chart of accounts.
- **C. Conduct the Digital Discovery Assessment to identify extension requirements.**
- **D. Conduct the Fit-to-Standard analysis to gather configuration values.**

**Answer: C,D**

#### **NEW QUESTION # 44**

Which of the following are purchasing info record categories? Note: There are 2 correct answers to this question.

- **A. Service**
- B. External
- C. Pipeline
- **D. Standard**

**Answer: A,D**

Explanation:

In SAP S/4HANA Cloud Public Edition, purchasing info records can have different categories based on the type of procurement being managed. Below are the two correct answers:

\* Standard (Option A):The "Standard" category is used for regular procurement of materials or services.

It stores information such as prices, terms, and conditions agreed upon with vendors. TheSAP Purchasing Info Record Guideconfirms that "Standard" is a valid category.

\* Service (Option C):The "Service" category is used for procurement of services rather than physical materials. It includes details such as service descriptions, pricing, and terms. The sameSAP Purchasing Info Record Guidelists "Service" as a valid category.

\* B. Pipeline:"Pipeline" refers to a procurement process where materials are delivered directly from the vendor to the production line without intermediate storage. However, it is not a category for purchasing info records.

\* D. External:"External" is not a recognized category for purchasing info records in SAP S/4HANA Cloud Public Edition.

\* SAP Purchasing Info Record Guide:Describes the categories of purchasing info records and their usage in procurement processes.<https://help.sap.com>

\* SAP S/4HANA Cloud Procurement Guide:Provides details on managing purchasing info records and their categories.

Why the Other Options Are Incorrect:Key References:

#### NEW QUESTION # 45

What is a Purchasing Info Record?

- A. A master data record that contains information specific to a material and the contract.
- B. A master data record that contains information specific to a material and the customer.
- **C. A master data record that contains information specific to a material and the supplier.**
- D. A master data record that contains information specific to a material and the purchase order.

**Answer: C**

Explanation:

A Purchasing Info Record (PIR) is a master data object in SAP S/4HANA that stores procurement-related information for a specific material and supplier combination. Below is an explanation of the correct answer:

\* A master data record that contains information specific to a material and the supplier (B):The PIR includes details such as pricing conditions, order quantities, and delivery schedules for a specific material supplied by a specific vendor. It serves as a reference point for procurement transactions like purchase orders.

\* A master data record that contains information specific to a material and the purchase order (A):

Purchase orders are transactional documents, not master data. The PIR provides the basis for creating purchase orders but is not tied to individual orders.

\* A master data record that contains information specific to a material and the customer (C):

Customer-related information is managed in sales and distribution processes, not in purchasing info records.

\* A master data record that contains information specific to a material and the contract (D):

Contracts are separate procurement documents, and while they may reference PIRs, the PIR itself is not tied to a specific contract.
