

Huawei H35-211_V2.5 Hot Spot Questions, H35-211_V2.5 Valid Exam Format

One of the main unique qualities of the Prep4cramp Huawei Exam Questions is its ease of use. Our practice exam simulators are user and beginner friendly. You can use HCIP-Access V2.5 (H35-211_V2.5) PDF dumps and Web-based software without installation. HCIP-Access V2.5 (H35-211_V2.5) PDF questions work on all the devices like smartphones, Macs, tablets, Windows, etc. We know that it is hard to stay and study for the HCIP-Access V2.5 (H35-211_V2.5) exam dumps in one place for a long time.

Huawei H35-211_V2.5 (HCIP-Access V2.5) Certification Exam is a comprehensive exam that tests the knowledge and skills of IT professionals in access network technologies. It is a vendor-specific certification that validates the skills and expertise of IT professionals in Huawei's access network technologies. HCIP-Access V2.5 certification is ideal for IT professionals who want to enhance their career prospects in the field of network engineering and administration. The Huawei H35-211_V2.5 (HCIP-Access V2.5) Certification Exam is a globally recognized certification that demonstrates the proficiency of IT professionals in Huawei's access network technologies.

Huawei H35-211_V2.5: HCIP-Access V2.5 is a professional-level certification exam offered by Huawei Technologies Co. Ltd. for IT professionals who want to validate their proficiency in designing, deploying, and managing access networks. H35-211_V2.5 Exam focuses on the knowledge and skills required to implement various access network technologies and protocols, including PPP, DHCP, DNS, STP, VLAN, and more.

H35-211_V2.5 Valid Exam Format | H35-211_V2.5 Latest Material

Our H35-211_V2.5 exam prep has already become a famous brand all over the world in this field since we have engaged in compiling the H35-211_V2.5 practice materials for more than ten years and have got a fruitful outcome. You are welcome to download the free demos to have a general idea about our H35-211_V2.5 study questions. Since different people have different preferences, we have prepared three kinds of different versions of our H35-211_V2.5 training guide: PDF, Online App and software.

Huawei H35-211_V2.5 (HCIP-Access V2.5) Certification Exam is a valuable certification for IT professionals who work with Huawei access network products. HCIP-Access V2.5 certification demonstrates that the holder has the knowledge and skills required to design, deploy, operate, and maintain access networks using Huawei products and technologies. With this certification, IT professionals can enhance their career prospects and gain recognition for their expertise in the access network field. Additionally, the certification is recognized globally, making it a valuable asset for professionals who work with Huawei products and technologies around the world.

Huawei HCIP-Access V2.5 Sample Questions (Q41-Q46):

NEW QUESTION # 41

(Radio) Regarding multicast, the following description is incorrect

- A. When the **igmp match mode** disables, you need to configure the multicast program group
- B. The user-issued Report is captured in the single board logic and sent to the single board CPU
- C. Add Lgmp user under BTV, and by default, multicast users can watch 8 programs.
- D. Device-based global configurations of Layer 2 groups refer to common parameters of protocols (IGMP Proxy, GMP Snoop) to all

Answer: A

NEW QUESTION # 42

In a campus project, the XGS-PON technology is used, ONUs are used for AP backhaul, and 1:16 splitters are used. However, each splitter is connected to only 12 APs. In this case, what is the downstream concurrent bandwidth (Mbit/s) of each AP?

- A. About 800
- B. About 300
- C. **About 600**
- D. About 400

Answer: C

NEW QUESTION # 43

In video services, if the VOD service is normal but the live service encounters a black screen, which of the following are possible causes?

- A. **The traffic profile corresponding to the OLT upstream multicast service flow is set to a low priority.**
- B. DWRR is used for upstream congestion management of an OLT.
- C. **On the ONU, the VLAN of the VoD service is different from that of the live service. On the OLT, there is only one video service stream.**
- D. PQ is used for downstream congestion management of an OLT.

Answer: A,C

Explanation:

Live TV uses multicast, while VOD uses unicast. If VOD works but live TV is a black screen, typical causes are multicast service-path/config mismatches or priority starvation for multicast control/traffic:

C: If the ONU uses different VLANs for VOD and live but the OLT has only one video service flow, multicast frames will not match the correct service-port, causing black screen.

D: A low-priority traffic profile for multicast join/report or stream on the OLT uplink may drop IGMP joins or multicast packets under load, resulting in black screen while unicast VOD still passes.

Queue scheduling choices such as PQ or DWRR (A/B) are generic congestion schemes; by themselves they are not direct root

causes of a live-only black screen unless mis-classified, whereas C and D are recognized multicast-specific fault points.
References: HCIP-Access V2.5 Study Guide - IPTV Multicast Service Flow, IGMP/Multicast QoS and Typical Faults (black screen with VLAN/service-port mismatch; priority of multicast control/stream).

NEW QUESTION # 44

Max-Forwards fields can be used in SIP messages to solve loop problems and avoid endless packet forwarding.

- A. Right
- B. wrong

Answer: A

Explanation:

Right. The SIP Max-Forwards header limits how many SIP elements a request can traverse. Each proxy decrements the value by one; when it reaches zero, the message must not be forwarded, preventing infinite loops and yielding responses like 483 (Too Many Hops). RFC 3261 (Sections 8.1.1.6, 16.6, 20.22) defines this behavior; later work further discusses loop mitigation

NEW QUESTION # 45

(Radio) The downstream effective bandwidth of the GPON PON port is

- A. 2.5G
- B. 1.25G
- C. 2G
- D. 2.2G

Answer: A

NEW QUESTION # 46
