### NEW QUESTION # 47

A revenue cloud consultant learns salesforce is deploying a new release during the course of the implementation. which two actions should be taken to make sure the implementation is tested against the new release before it deploys to production?

- A. The platform ensures that all sandboxes are upgraded all the same time so wait for the upgrade
- B. submit ticket to support when you want your sandbox updated
- C. Determine whether your sandbox is on a preview or non-preview instance
- D. review status.salesforce.com to determine refresh cutoff dates for the new release

**Answer: C,D**

Explanation:

\* Review Salesforce Status: The status.salesforce.com website provides real-time information about the status of Salesforce services, including maintenance windows and release schedules. By checking this site, you can find out when the new release will be available for sandboxes. This information will help you plan your testing activities.

\* Submit a Sandbox Refresh Request: If your sandbox is not automatically upgraded to the new release, you can request a sandbox refresh through Salesforce Support. This process will update your sandbox to the latest release, allowing you to test your implementation against the most current features and functionality.

- B. anything presented from salesforce must be kept confidential mergers and acquisitions integrations are immediate
- C. new release capabilities will not have impact to existing implementations
- D. roadmap capability will be released exactly as they are demonstrated

**Answer: A**

### NEW QUESTION # 50

A revenue cloud user story states "Sales users should have the ability to create new quotes with established rate cards and account specific discounts because current customers are entitled to the pricing that was originally negotiated". in addition to loading data to accounts, contracts, quotes what other object will need to absorb legacy data?

- A. order products

- B. Subscription
- **C. Contracted Pricing**
- D. entitlements

**Answer: C**

Explanation:

Contracted Pricing is the object that stores the negotiated prices and discounts for each account and product combination.

Contracted Pricing allows sales users to create new quotes with the same pricing terms that were agreed upon in previous contracts, without having to manually adjust the prices or discounts. Contracted Pricing also enables businesses to maintain pricing consistency and accuracy across different channels and systems. To use Contracted Pricing, legacy data from accounts, contracts, and quotes need to be loaded into the Contracted Pricing object, along with the relevant price book entries and product options. 12 References:
