

2V0-16.25 Test Duration & 2V0-16.25 Reliable Exam Voucher

2026 Latest It-Tests 2V0-16.25 PDF Dumps and 2V0-16.25 Exam Engine Free Share: https://drive.google.com/open?id=1zpBvIDuoB6pb25_J2TK_ojZYebUF4GF-

We sincerely suggest you to try these demos of our 2V0-16.25 study guide and make a well-content choice. Different demos have different functions and each version has its advantages during the process of learning. Our 2V0-16.25 Preparation exam is suitable for various consumer groups in the world we assure that after having a knowledge of those demos, you can purchase the most suitable 2V0-16.25 exam materials.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Topic 2	<ul style="list-style-type: none">Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

Topic 3	<ul style="list-style-type: none"> Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 4	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
Topic 5	<ul style="list-style-type: none"> VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

Free PDF Quiz 2V0-16.25 - VMware vSphere Foundation 9.0 Administrator – Trustable Test Duration

The software version is one of the different versions that is provided by our company, and the software version of the 2V0-16.25 study materials is designed by all experts and professors who employed by our company. We can promise that the superiority of the software version is very obvious for all people. It is very possible to help all customers pass the 2V0-16.25 Exam and get the related certification successfully.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q22-Q27):

NEW QUESTION # 22

An administrator is tasked with setting up pricing for their VMware vSphere Foundation (VVF) environment.

The accounting team has decided to charge users in 't-shirt sizes' for vCPU in the following method:

- * Small (1-2 vCPU)
- * Medium (3-4 vCPU)
- * Large (5-8 vCPU)

Which rate method is used for this configuration?

- A. Base rate storage per GB.
- B. Base rate CPU per GHz
- C. Base rate CPU per vCPU.
- D. **Base rate slabs.**

Answer: D

Explanation:

The t-shirt sizing model (Small, Medium, Large) for vCPU allocation is an example of slab-based pricing.

* Base rate slabs allow administrators to define different ranges (slabs) of resource usage with associated rates.

* In this case, vCPUs are grouped into ranges (1-2, 3-4, 5-8), and charges are applied per slab.

Other options:

- * A. Base rate storage per GB# Applies to storage, not CPU.
- * C. Base rate CPU per GHz# Charges by GHz usage, not vCPU count.
- * D. Base rate CPU per vCPU# Flat per vCPU, no slab/tier-based flexibility.

NEW QUESTION # 23

What are the two methods to add a widget to a VMware Cloud Foundation (VCF) Operations for Logs dashboard? (Choose two.)

- A. Open Management Pack Builder and clone the widget.
- B. Import the widget in the dashboard design pane.
- C. Drag and drop the widget in the dashboard design pane.
- D. Clone the widget from an existing dashboard.
- E. Create the widget in Explore Logs and click Add to Dashboard.

Answer: C,E

Explanation:

Two supported methods exist for adding widgets to VCF Operations for Logs dashboards:

- * From Explore Logs- Create a widget (e.g., query result) and select Add to Dashboard. (B)
- * Dashboard Design Pane- Use the design interface to drag and drop widgets. (C) Other options:
 - * A. Clone widget from existing dashboard# Not a supported method.
 - * D. Import widget in design pane# Import is for dashboards, not individual widgets.
 - * E. Management Pack Builder# Not related to Logs dashboard widgets.

NEW QUESTION # 24

Which VMware Cloud Foundation (VCF) Operations for Logs capability facilitates root cause analysis and troubleshooting?

- A. Log Forwarding
- B. Log Querying
- C. Dashboarding
- D. Alerting

Answer: B

Explanation:

The VCF Operations for Logs capability most useful for root cause analysis and troubleshooting is Log Querying.

- * Allows searching, filtering, and correlating log events to diagnose issues.
- * Log Forwarding (A)# Sends logs elsewhere, not analysis.
- * Alerting (B)# Notifies about issues but does not provide investigation details.
- * Dashboarding (C)# Provides visualization, but root cause analysis requires queries.

NEW QUESTION # 25

An administrator is tasked with creating dashboards to track system performance metrics for both the IT department and executive leadership. The requirements for this task are:

- * The IT team needs detailed, technical metrics across all of the infrastructure components in the environment.
- * The executives need high-level summaries that highlight Key Performance Indicators (KPIs) across the environment in a single dashboard.
- * The executives need to access the dashboard via a shared URL.
- * The dashboards must be capable of being shared, and always display the latest data collected when the link is used.

What two steps should the administrator perform to meet these requirements? (Choose two.)

- A. Create a Custom dashboard in VCF Operations to highlight Key Performance Indicators.
- B. Create a Custom dashboard in VCF Operations for Logs to display the Key Performance Indicators.

- C. Use Out-of-the-Box dashboards in VCF Automation to highlight Key Performance Indicators.
- D. Use Out-of-the-Box dashboards in VCF Operations to display detailed technical metrics.

Answer: A,D

Explanation:

To satisfy both IT and executive requirements:

- * IT team# Needs detailed technical metrics, which are available through Out-of-the-Box dashboards in VCF Operations. (A)
- * Executives# Need a custom KPI-focused dashboard, with summaries and high-level visibility. This can be shared via a URL link that always shows the latest data. (B) Why others are incorrect:
- * C. Custom dashboard in VCF Operations for Logs# Logs are not KPI-focused performance metrics.
- * D. Out-of-the-Box dashboards in VCF Automation# VCF Automation is not designed for KPI reporting.

NEW QUESTION # 26

An organization uses VMware Cloud Foundation (VCF) Operations to monitor and troubleshoot issues within a VMware vSphere Foundation (VVF) environment.

As part of the root cause analysis following a recent critical event, the administrator determined that specific log messages on a host clearly identified the problem.

What should the administrator implement to provide additional data to help troubleshoot in the future?

- A. VCF Automation
- B. VCF Operations Management Pack for VCF
- C. VCF Operations for logs
- D. VCF Operations Diagnostics

Answer: C

Explanation:

When troubleshooting critical events in a VMware vSphere Foundation (VVF) environment, logs are essential for root cause analysis.

- * In the given scenario, the administrator identified that specific log messages on a host clearly pinpointed the issue.
- * To enhance future troubleshooting, the best approach is to implement VCF Operations for Logs.
- * This enables centralized log collection, log-based alerts, and advanced queries, making it easier to correlate issues across infrastructure.

Other options like VCF Operations Diagnostics focus on proactive health checks and findings, while Management Pack for VCF extends observability but does not provide raw log insights. VCF Automation is unrelated to troubleshooting logs.
