Reliable ANS-C01 Test Online | Vce ANS-C01 Test Simulator

What's more, part of that Real4test ANS-C01 dumps now are free: https://drive.google.com/open?id=1ConfrFA_y5KMizsmIkMAEpYkHfaxObKB

Our passing rate is high so that you have little probability to fail in the exam because the ANS-C01 guide torrent is of high quality. But if you fail in exam unfortunately we will refund you in full immediately at one time and the procedures are simple and fast. If you have any questions about AWS Certified Advanced Networking Specialty Exam test torrent or there are any problems existing in the process of the refund you can contact us by mails or contact our online customer service personnel and we will reply and solve your doubts or questions promptly. We guarantee to you that we provide the best ANS-C01 study torrent to you and you can pass the exam with high possibility and also guarantee to you that if you fail in the exam unfortunately we will provide the fast and simple refund procedures.

Our ANS-C01 learning quiz can lead you the best and the fastest way to reach for the certification and achieve your desired higher salary by getting a more important position in the company. Because we hold the tenet that low quality ANS-C01 exam materials may bring discredit on the company. Our ANS-C01 learning questions are undeniable excellent products full of benefits, so our ANS-C01 exam materials can spruce up our own image and our exam questions are your best choice.

Vce ANS-C01 Test Simulator, ANS-C01 New Braindumps Files

Thanks to modern technology, learning online gives people access to a wider range of knowledge, and people have got used to convenience of electronic equipment. As you can see, we are selling our ANS-C01 learning guide in the international market, thus there are three different versions of our ANS-C01 exam materials which are prepared to cater the different demands of various people. We can guarantee that our ANS-C01 Exam Materials are the best reviewing material. Concentrated all our energies on the study ANS-C01 learning guide we never change the goal of helping candidates pass the exam. Our ANS-C01 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our ANS-C01 exam materials, and you

won't be regret.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q105-Q110):

NEW QUESTION # 105
You can use the _____ command of the AWS Config service CLI to see the compliance state for each AWS resource of a specific type.
Response:

- A. get-compliance-details-by-config-rule
- B. describe-compliance-by-config-rule
- C. get-compliance-details-by-resource
- D. describe-compliance-by-resource

Answer: D

NEW QUESTION # 106
A network engineer needs to monitor internet metrics for an application that is in a VPC. The metrics include user experiences such as health events, latency, and traffic insights.
The network engineer sets up Amazon CloudWatch Internet Monitor for the application. The engineer wants to push the internet health events to a third-party target.
Which solution will meet these requirements with the LEAST implementation effort?

- A. Create a third-party API endpoint in Amazon EventBridge. Configure internet Monitor to send the events to the third-party API endpoint in EventBridge.
- B. Create a third-party API endpoint in Internet Monitor. Configure Internet Monitor to send the events to the third-party API endpoint in Internet Monitor.
- C. Create a third-party API endpoint in Amazon EventBridge. Create a rule in EventBridge that uses Internet Monitor as the source and the third-party API endpoint in EventBridge as the destination.
- D. Create a third-party API endpoint in internet Monitor. Configure Internet Monitor to send the events to an Amazon S3 bucket. Configure an AWS Lambda function to send the events to the third-party API endpoint in Internet Monitor.

Answer: B

NEW QUESTION # 107
A company deployed an application in two AWS Regions in one AWS account. The company has one VPC in each Region. The VPCs use non-overlapping private CIDR ranges.
The company needs to connect both VPCs to a single on-premises data center to test theapplication. The application requires up to 800 Mbps of throughput. A network engineer needs to establish connectivity between the VPCs and the on-premises data center.
Which solution will meet this requirement with the LEAST operational overhead?

- A. Order a 2 Gbps Direct Connect connection for the data center. Configure a virtual private gateway in each VPC. Create a private VIF for each virtual private gateway, and associate the virtual private gateways with the Direct Connect connection. Configure static routes in the VPC route tables and in the data center router.
- B. Configure a customer gateway and a virtual private gateway in each VPC. Configure an AWS Site-to- Site VPN connection between the data center and each VPC. Configure BGP routing between the VPCs and the data center.
- C. Order a 2 Gbps Direct Connect connection for the data center. Configure a virtual private gateway in each VPC. Create a private VIF for each virtual private gateway, and associate the virtual private gateways with the Direct Connect connection. Configure Open Shortest Path First (OSPF) routing between the private VIF and the data center.
- D. Configure a customer gateway and a virtual private gateway in each VPC. Configure an AWS Site-to- Site VPN connection between the data center and each VPC. Configure static routes in each VPC route table to point to the subnets in the data center.

Answer: A

Explanation:
Direct Connect for High Throughput: The application requires up to 800 Mbps of throughput. AWS Direct Connect is the best

choice for meeting this requirement because it provides a high-bandwidth, low-latency, and private connection between the on-premises data center and AWS.

Private VIFs for VPC Connectivity: Private virtual interfaces (VIFs) are used to connect to VPCs through virtual private gateways. Configuring a private VIF for each VPC ensures secure and efficient connectivity to the on-premises data center.

Static Routes for Simplicity: Using static routes in the VPC route tables and the data center router minimizes operational overhead compared to dynamic routing protocols like BGP. Static routes are sufficient for testing purposes and are simpler to configure and maintain.

NEW QUESTION # 108

The networking team at a global social gaming company has been tasked to reduce the in-game latency and jitters. The team wants traffic from its end users to be routed to the AWS Region that is closest to the end users geographically.

When maintenance occurs in an AWS Region, traffic must be routed to the next closest AWS Region with no changes to the IP addresses being used as connections by the end-users.

Which solution will you suggest to address these requirements?

Response:

- A. Configure a Route 53 latency routing policy to navigate traffic to the closest AWS Region
- B. Set up a CloudFront distribution in front of all the AWS Regions
- C. Configure a Route 53 geoproximity routing policy to navigate traffic to the closest AWS Region
- D. Set up AWS Global Accelerator in front of all the AWS Regions

Answer: D

NEW QUESTION # 109

You need to create a subnet in a VPC that supports 1000 hosts. You need to be as accurate as possible since you run a very large company. What CIDR should you use?

Note: Answers to this question are not verified by our experts, please study yourself and select the appropriate answers.

Contribute: Please send the correct answers with reference text/link on feedback@VMexam.com to get up to 50% cashback.

Response:

- A. /24
- B. /7
- C. /22
- D. /16

Answer: D

NEW QUESTION # 110
