EC-Council 712-50: Preparation Phase

EC-Council offers the comprehensive resources that the students can use to prepare for the test. Thus, the first thing that you must do after making up your mind to pursue the certification exam is to download the blueprint from the official website. It is important to go over the topics it covers in detail before starting any preparation. This is a starting point, and after that, you should proceed with the following steps:

- To gain competence in the exam topics, the next step is to get the EC-Council CCISO BOK. It covers five domains of Information Security Management in detail and explains the concepts. Having this material will act as a reference resource throughout the preparation process and even beyond;
- EC-Council also offers the official training course to help you adequately prepare for the 712-50 test. Those who want to choose the self-study route do not need to attend this option. They can proceed to purchase the CCISO Body of Knowledge for exam preparation. The applicants can also purchase only the courseware, but to choose this variant of preparation, they must possess the required experience in information security management. They should submit a filled exam eligibility application form that validates that they possess a minimum of five years of work experience in five CCISO domains.
- An alternative preparation option is the iLearn self-paced online training. It covers the same modules that are covered in the live course. The only difference is that the iLearn option is prerecorded and offered as a streaming video tutorial. It is recommended for the individuals with busy work schedules.

The learners can also opt for the in-person training, which is delivered by an expert and certified EC-Council trainer. The details of all the available resources can be found on the official site.

EC-COUNCIL 712-50 Exam is designed to assess the knowledge and skills of candidates in the five domains of the CCISO certification – governance, security risk management, controls, audit and assessment, and information security program management. 712-50 exam is a combination of multiple-choice questions and scenario-based questions that are designed to test the practical application of the knowledge and skills acquired by candidates.

The CCISO certification program covers a wide range of topics related to information security management, including risk management, governance, compliance, strategic planning, and financial management. The program is designed to help individuals gain a deeper understanding of the various aspects of information security management, and to develop the skills and knowledge needed

to be an effective CISO.
