

# Pass Guaranteed CIPS - L3M6 - New Socially Responsible Warehousing and Distribution Exam Bootcamp

BTW, DOWNLOAD part of Exam4Docs L3M6 dumps from Cloud Storage: [https://drive.google.com/open?id=1u7Pw5fFNN03S96UKYIT\\_YKIDmAN9\\_JGi](https://drive.google.com/open?id=1u7Pw5fFNN03S96UKYIT_YKIDmAN9_JGi)

When you decide to pass L3M6 exam, you must want to find a good study materials to help you prepare for your exam. If you decide to choice our products as your study tool, you will be easier to pass your exam and get the L3M6 certification in the shortest time. So do not hesitate and buy our L3M6 Test Torrent, an unexpected surprise is awaiting you, we believe you will prefer to our L3M6 test questions than other study materials. In order to let you understand our L3M6 exam prep in detail, we are going to introduce our products to you.

## CIPS L3M6 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.</li> </ul>

In order to provide a convenient study method for all people, our company has designed the online engine of the L3M6 study practice dump. The online engine is very convenient and suitable for all people to study, and you do not need to download and install any APP. We believe that the L3M6 exam questions from our company will help all customers save a lot of installation troubles. You just need to have a browser on your device you can use our study materials. We can promise that the L3M6 Prep Guide from our company will help you prepare for your exam well. If you decide to buy and use the study materials from our company, it means that you are not far from success.

## **CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q150-Q155):**

### **NEW QUESTION # 150**

Not enough visual stimulation can lead to eye strain, distraction, and too much noise.

- A. TRUE
- B. FALSE

**Answer: B**

Explanation:

Insufficient visual stimulation (e.g., bland environments) may cause boredom or fatigue, but not eye strain (from overexertion), distraction (from excess stimuli), or noise (an auditory issue). The CIPS L3M6 module clarifies visual pollution's effects in LO2-

excess, not lack, drives stress. The statement is false due to mismatched causation.

---

### NEW QUESTION # 151

Categorised emissions fall into three areas. Which one includes indirect emissions from activities outside an organization's own operations, for example, contracted transport?

- A. Scope 2
- B. Scope 1
- **C. Scope 3**

**Answer: C**

Explanation:

Scope 3 encompasses indirect emissions from activities outside an organization's direct control, such as contracted transport, employee commuting, or supplier operations. The CIPS L3M6 module highlights Scope 3 as the broadest and often most significant category in supply chains, covering upstream (e.g., raw material extraction) and downstream (e.g., product disposal) emissions. Contracted transport, like third-party logistics using diesel trucks, falls here, as the organization doesn't own the vehicles but is responsible for their emissions impact. This scope is vital in LO2, as it drives procurement strategies like selecting low-emission logistics partners to reduce the carbon footprint holistically.

### NEW QUESTION # 152

Warehousing and logistics rely on efficient modes of \_\_\_\_\_ to satisfy customer demands.

- A. Negotiation
- B. Litigation
- **C. Transportation**
- D. Information

**Answer: C**

Explanation:

Efficient transportation (D) is fundamental to warehousing and logistics, ensuring goods are moved swiftly and sustainably to meet customer needs, as per the CIPS L3M6 syllabus. Information (A) supports logistics but isn't a "mode." Litigation (B) and negotiation (C) are unrelated to physical movement. Transportation's efficiency directly ties to CSR monitoring, as sustainable modes reduce environmental impact while fulfilling demand.

---

### NEW QUESTION # 153

Green transport replaces traditional modes of transportation that depend on fossil fuels with more eco-friendly methods. What are the advantages of using green transport? Select all that apply.

- **A. Lower cost energy**
- B. Increase in pollution rates
- **C. Reduced carbon emissions**
- **D. Contribute to building a sustainable economy**

**Answer: A,C,D**

Explanation:

Green transport offers multiple benefits, as outlined in the CIPS L3M6 module:

- \* A. Sustainable Economy: By reducing emissions and resource use, green transport supports long-term economic stability and aligns with SDGs (e.g., Goal 11: Sustainable Cities).
- \* B. Increase in Pollution: This is incorrect, as green transport aims to decrease pollution, not increase it.

\* C. Lower Cost Energy: Electric or hybrid vehicles often have lower operating costs (e.g., cheaper electricity vs. diesel), especially over time.

\* D. Reduced Carbon Emissions: A primary goal, achieved through zero/low-emission technologies (e.g., electric trains).

These advantages reflect LO2's focus on mitigating transport's environmental impact through sustainable alternatives.

#### NEW QUESTION # 154

Manual material handling operations will likely always be needed though.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

Despite advances in automation, manual material handling remains relevant for tasks requiring human judgment, flexibility, or handling delicate items that machines cannot easily manage. The CIPS L3M6 syllabus acknowledges that while automation and mechanization are growing, manual operations persist in hybrid systems or smaller facilities where full automation isn't feasible. This makes the statement true, as complete elimination of manual handling is unlikely in the foreseeable future.
