## Sample Questions (Q52-Q57):

### NEW QUESTION # 52

Question:

What is the main advantage of a write-through operation in cache write I/O operations?

- A. Reduced write-response time
- B. No impact to host I/O performance
- C. Low risk of data loss
- D. Enhanced data security

**Answer: D**

Explanation:

Inwrite-through caching, data is written simultaneously to both the cache and the underlying disk. This ensures data integrity because the write is not acknowledged until it's safely written to the disk.

\* Write-backcaching offers reduced latency but increases risk of data loss if cache is lost.

\* Write-throughtrades speed for security, offeringenhanced data securityand reducing the risk of data loss during power failures.

### NEW QUESTION # 53

Question:

What is a key advantage of cloning a VM?

- A. Saves time when creating multiple identical copies of a VM
- B. Ability to run new VMs simultaneously with the same IP address
- C. Eliminates the need to create multiple snapshots for a VM
- D. Improves the performance of existing and new VMs

**Answer: A**

Explanation:

VM cloningallows administrators to createexact copiesof a virtual machine quickly.

Saves time compared to manually configuring new VMs.

Useful for testing, development, and scaling environments.

Each clone can be independently modified after creation.

\* Same IP addressis typically not the case (clones get unique addresses).

\* Snapshotsprovide rollback points, not full VM clones.

\* Performancedoes not improve because of cloning itself.

### NEW QUESTION # 54

Question:

What is an advantage of deploying intelligent storage systems in the data center?

- A. Migrates data from a data center to the cloud at no cost
- B. Reduces the amount of data to replicate, migrate, and back up
- C. Reduces the complexity of managing information by creating silos of storage
- D. Enables efficient and optimized storage and management of information

**Answer: D**

Explanation:

Intelligent storage systems incorporate advanced features like automated tiering, deduplication, and compression. These features enable efficient storage utilization and optimized management by automating data placement and reducing manual intervention.

\* Option A: While intelligent systems may facilitate cloud integration, they do not guarantee cost-free migration.

\* Option B: Data reduction features help, but the primary advantage is broader efficiency and optimization.

\* Option C: Creating silos increases complexity; intelligent systems aim to unify and simplify storage management.

### NEW QUESTION # 55

Question:

What information is available in a capacity planning report for storage infrastructure?

- A. Current and historical performance information about IT components and operations
- B. Number of units of storage available, used, and the cost
- C. Equipment purchase dates, licenses, lease status, and maintenance records
- D. **Current and historical information about the utilization of storage, file systems, and ports**

**Answer: D**

Explanation:

Capacity planning reports in storage environments focus on:

- \* Utilization trends of storage systems (e.g., used vs. available space)
- \* File system usage (volumes, file systems)
- \* Ports (SAN/NAS connections)

This enables proactive capacity management and ensures enough resources are available to meet future demands.

### NEW QUESTION # 56

Question:

Refer to the Exhibit (Port marked "X"): What type of FC port does the "X" represent?

- A. **E\_port**
- B. F\_port
- C. NL port
- D. N port

**Answer: A**

Explanation:

The exhibit shows a Fibre Channel (FC) switch connected to another FC switch. The port "X" is used for inter-switch link (ISL) connectivity, which is characteristic of an E\_port (Expansion Port).

- \* F\_port (Fabric port): Connects an N\_port (host or storage device) to a switch.
- \* N\_port (Node port): End device port in FC networks (like HBA in hosts or storage).
- \* NL\_port (Node Loop port): Used for Arbitrated Loop topologies.

\* E\_port: Connects two FC switches together for ISL, which is exactly what's shown in the exhibit.
