

Free PDF Quiz 2026 SAP C-SAC-2501: SAP Certified Associate - Data Analyst - SAP Analytics Cloud Accurate Valid Test Pdf

P.S. Free 2025 SAP C-SAC-2501 dumps are available on Google Drive shared by ExamsLabs: <https://drive.google.com/open?id=1Bh0IDVLMZKVB1aDS11KuYcOH1GXQ0Axm>

All C-SAC-2501 learning materials fall within the scope of this exam for your information. The content is written promptly and helpfully because we hired the most professional experts in this area to compile the C-SAC-2501 Preparation quiz. And our experts are professional in this career for over ten years. Our C-SAC-2501 practice materials will be worthy of purchase, and you will get manifest improvement.

SAP C-SAC-2501 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Modeling, Analysis, and Integration: This section assesses the skills of Data Architects and covers data modeling, analysis, and integration.
Topic 2	• Connections and Data Preparation: This section targets Data Engineers and covers connections and data preparation. The focus is on connecting to data sources and preparing data for visualization.
Topic 3	• Performance, Troubleshooting, and Security Management: This section measures the skills of IT Administrators and covers performance, troubleshooting, and security management, making up less than 10% of the exam. It focuses on optimizing performance, resolving issues, and ensuring data security in data visualization environments.
Topic 4	• Planning: This section evaluates the expertise of Business Intelligence Developers. The focus is on planning and strategic aspects of data visualization projects.
Topic 5	• Story Design: This section of the exam measures the skills of Data Analysts and covers story design concepts, accounting for The focus on creating effective visualizations and narratives using data.

C-SAC-2501 Paper - C-SAC-2501 New Question

The SAP modern job market is becoming more and more competitive and challenging and if you are not ready for it then you cannot pursue a rewarding career. Take a smart move right now and enroll in the SAP Certified Associate - Data Analyst - SAP Analytics Cloud (C-SAC-2501) certification exam and strive hard to pass the SAP Certified Associate - Data Analyst - SAP Analytics Cloud (C-SAC-2501) certification exam. The SAP Certified Associate - Data Analyst - SAP Analytics Cloud (C-SAC-2501) certification exam offers you a unique opportunity to learn new in-demand skills and knowledge.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q21-Q26):

NEW QUESTION # 21

What are the available connection types in SAP Analytics Cloud? Note: There are 2 correct answers to this question.

- A. On-premise
- **B. Import**
- C. Cloud
- **D. Live**

Answer: B,D

Explanation:

SAP Analytics Cloud supports two primary types of data connections: Live Data Connection and Import Data Connection. Live Data Connection establishes a direct link to the data source, allowing real-time data access without replicating the data into SAP Analytics Cloud. This is ideal for scenarios where up-to-the-minute data is crucial, and data volume is large. On the other hand, Import Data Connection involves copying data from the source into SAP Analytics Cloud, which is suitable for scenarios where data doesn't change frequently, or there's a need for data transformation and enrichment within SAP Analytics Cloud.

NEW QUESTION # 22

How can you help a user enter data faster in a planning story? Note: There are 2 correct answers to this question.

- A. Enable unbooked data in the story.
- **B. Enable Optimize Recommended Planning Area in the model.**
- C. Set Size Limits for Planning Performance in the model.
- **D. Select fluid data entry mode in the story.**

Answer: B,D

NEW QUESTION # 23

For which activities must you enable Advanced Mode in story design? Note: There are 2 correct answers to this question.

- **A. Add JavaScript to a button**
- B. Add a custom widget
- C. Add a layer to a geo map
- **D. Add a popup**

Answer: A,D

NEW QUESTION # 24

You have a story based on an import model. The transaction data in the model's data source changes. How can you update the data in the model? Note: There are 2 correct answers to this question.

- A. Refresh the import job
- **B. Refresh the story**
- C. Allow model import
- **D. Schedule the import**

Answer: B,D

Explanation:

To update the data in a model based on an import connection, two main approaches can be used:

Refresh the story: This action forces SAP Analytics Cloud to reload the data for the visualizations in a story, pulling in the most recent data available in the model. This is a manual process initiated by the user.

Schedule the import: This option allows users to set up a recurring data import schedule, ensuring the model is regularly updated with the latest data from the source system. This automated process helps maintain data freshness without manual intervention.

Both methods ensure that the story reflects the most current data, accommodating changes in the transaction data of the model's data source.

NEW QUESTION # 25

You are using a live connection for a model. Where is the data stored?

- A. SAP Analytics Cloud model
- B. Public dataset
- **C. Source system**
- D. Embedded data set

Answer: C

Explanation:

Connections and data preparation

When using a live connection in SAP Analytics Cloud, the data remains stored in the source system. This means that no data is imported or replicated into SAP Analytics Cloud; instead, it is accessed and analyzed in real-time directly from the source system. This approach ensures that the most current data is always used for analysis and that data governance and security policies of the source system remain in control.

SAP Analytics Cloud Data Connections - InsightCubes

In the context of SAP Analytics Cloud, when using a live connection to connect to a data source, the data remains stored in the source system. This setup means that SAP Analytics Cloud directly queries the data in its original location, without importing or copying it into the SAP Analytics Cloud environment. This approach is advantageous for several reasons, including maintaining a single source of truth, reducing data redundancy, and ensuring data is always up-to-date without the need for synchronization processes. Live connections are particularly useful for real-time or near-real-time data analysis and reporting, providing insights based on the most current data available without the overhead of data replication.

SAP Analytics Cloud documentation and user guides typically emphasize the benefits and use cases of live connections, highlighting how they maintain data in the source system to ensure real-time data access and analysis.

SAP training materials for Data Analysts using SAP Analytics Cloud, including study guides and official certification resources, explain the technical and practical aspects of live connections, including where data is stored and how it is accessed.

Best practice guides for SAP Analytics Cloud, often available through the SAP Community or SAP Knowledge Base, provide insights and recommendations on setting up and using live connections, reinforcing the concept that data stays in the source system.

NEW QUESTION # 26

.....

Are you planning to crack the SAP SAP Certified Associate - Data Analyst - SAP Analytics Cloud C-SAC-2501 certification test in a short time and don't know how to prepare for it? ExamsLabs has updated C-SAC-2501 Dumps questions for the applicants who want to prepare for the SAP C-SAC-2501 Certification test successfully within a few days. This study material is available in
