

CCDM Accurate Study Material | Latest CCDM Exam Labs

BTW, DOWNLOAD part of PrepAwayTest CCDM dumps from Cloud Storage: <https://drive.google.com/open?id=1IQtMljxYPPCrL9AEPNk91LT0zhGNjyy>

Get the test CCDM certification is not achieved overnight, we need to invest a lot of time and energy to review, and the review process is less a week or two, more than a month or two, or even half a year, so CCDM exam questions are one of the biggest advantage is that it is the most effective tools for saving time for users. Users do not need to spend too much time on CCDM questions torrent, only need to use their time pieces for efficient learning, the cost is about 20 to 30 hours, users can easily master the test key and difficulties of questions and answers of CCDM Prep Guide, and in such a short time acquisition of accurate examination skills, better answer out of step, so as to realize high pass the qualification test, has obtained the corresponding qualification certificate.

Each of the PrepAwayTest SCDM CCDM exam dumps formats excels in its way and carries actual Certified Clinical Data Manager (CCDM) exam questions for optimal preparation. All of these Certified Clinical Data Manager (CCDM) practice question formats are easy to use and extremely convenient such that even newbies find them simple.

Free PDF Quiz CCDM - High-quality Certified Clinical Data Manager Accurate Study Material

Our CCDM study materials boost high passing rate ss more than 98% and hit rate so that you needn't worry that you can't pass the

test too much. We provide free tryout before the purchase to let you decide whether it is valuable or not by yourself. To further understand the merits and features of our CCDM Practice Engine you could free download the free demo of our CCDM exam questions, or visit our web page to know more related information. And you can pass your CCDM exam with the least time and energy with our wonderful CCDM exam questions.

SCDM Certified Clinical Data Manager Sample Questions (Q75-Q80):

NEW QUESTION # 75

If database auditing is used for data quality control during a study, which is the optimal timing of the audits?

- A. Periodically throughout the study
- B. After the first few cases have been entered
- C. Immediately following database lock
- D. A week or two before database lock

Answer: A

Explanation:

Database audits are conducted to ensure ongoing data accuracy, completeness, and compliance throughout the lifecycle of a clinical trial. According to the Good Clinical Data Management Practices (GCDMP, Chapter: Data Quality Assurance and Control), quality audits are most effective when performed periodically during study conduct, rather than waiting until study completion.

Performing audits periodically allows early detection of data entry errors, protocol deviations, and system inconsistencies, thereby reducing the risk of large-scale data issues before database lock. This proactive approach aligns with risk-based quality management principles outlined in ICH E6(R2) and ensures corrective actions are implemented in real time.

Options A and B represent reactive quality control, which occurs too late to prevent data issues. Option C (after first few cases) provides initial validation but does not ensure continuous oversight.

Therefore, option D - "Periodically throughout the study" - represents the optimal and compliant timing for quality audits of the database.

Reference (CCDM-Verified Sources):

SCDM GCDMP, Chapter: Data Quality Assurance and Control, Section 5.3 - Ongoing Quality Control and Auditing ICH E6(R2) GCP, Section 5.1.1 - Quality Management System and Risk-Based Monitoring FDA Guidance for Industry: Computerized Systems Used in Clinical Investigations, Section 6.5 - Data Review and Auditing Practices

NEW QUESTION # 76

A Data Manager is establishing a timeline for database lock for a 100-person study where the data have been maintained almost all clean throughout the study. All data from external labs have been received and reconciled. Which is the best estimate of the amount of time needed to lock the database after Last Patient Last Visit?

- A. A few months
- B. A few days
- C. A few weeks
- D. A few hours

Answer: B

Explanation:

For a well-maintained 100-subject study with ongoing data cleaning and completed reconciliations, the database lock process typically takes a few days after the Last Patient Last Visit (LPLV).

According to the GCDMP (Chapter: Database Lock and Archiving), the duration of the lock process depends on the level of data cleanliness at LPLV. If the study team has conducted continuous data cleaning, query resolution, and external data reconciliation throughout the trial, then the final lock steps (e.g., final data review, documentation, and approvals) can be completed in 2-5 days. However, if significant cleaning or reconciliation remains outstanding, lock may take several weeks. Since the question states that data are "maintained almost all clean," Option B - a few days - is the appropriate estimate.

Reference (CCDM-Verified Sources):

SCDM Good Clinical Data Management Practices (GCDMP), Chapter: Database Lock and Archiving, Section 6.2 - Database Lock Preparation and Timelines ICH E6 (R2) Good Clinical Practice, Section 5.5.3 - Data Quality and Lock Procedures FDA Guidance for Industry: Computerized Systems Used in Clinical Investigations - Data Lock and Archiving Procedures

NEW QUESTION # 77

Which of the following scenarios requires a query to be sent to the central lab first when there is a discrepancy between the final lab data transfer and the CRF?

- A. Both the central lab and the CRF have data present for a visit
- **B. The central lab has data for a visit but the CRF has missing data for the visit**
- C. The CRF has data for a visit but the central lab has missing data for the visit
- D. Both the central lab and the CRF data have missing data for a visit

Answer: B

Explanation:

During data reconciliation between a central laboratory and CRF data, the source of truth is typically the central lab database, as it provides directly measured, vendor-generated results.

When the central lab has data but the CRF does not (option C), the Data Manager must first query the central lab to confirm that the result was transmitted correctly, since discrepancies may stem from data processing or timing issues. Once confirmed, a secondary query may be issued to the site to ensure CRF completion and alignment.

Conversely, if the CRF contains data but the central lab is missing results (option B), the issue is site-level, not vendor-level.

According to the GCDMP (Chapter: External Data Transfers and Reconciliation), priority for querying depends on the authoritative source - for lab data, the central lab is considered the source of record.

Therefore, option C is correct.

Reference (CCDM-Verified Sources):

SCDM GCDMP, Chapter: External Data Transfers and Reconciliation, Section 6.1 - Reconciliation of Central Lab and CRF Data
ICH E6(R2) GCP, Section 5.5.3 - Source Data Verification and Vendor Reconciliation
FDA Guidance for Industry: Computerized Systems Used in Clinical Investigations, Section 6.4 - Data Reconciliation and Traceability

NEW QUESTION # 78

Which information should be communicated by the Data Manager at regular intervals throughout a study?

- A. Planned versus actual enrollment
- B. Serious and unexpected safety events
- C. Site staffing changes
- **D. Percent data entered and clean**

Answer: D

Explanation:

The Data Manager (DM) plays a critical role in maintaining transparent communication with the clinical study team regarding data quality and study progress. One of the most essential metrics regularly reported by the DM is the percentage of data entered and cleaned.

According to the Good Clinical Data Management Practices (GCDMP, Chapter: Communication and Study Reporting), these metrics provide insight into study status, data readiness for interim analysis, and timeline predictability for database lock. Regular communication includes:

Percent of CRFs entered and verified

Percent of queries resolved

Outstanding data issues or missing pages

Other options fall outside the Data Manager's direct responsibility:

A (Enrollment) is typically reported by clinical operations.

B (Staffing changes) are handled by site management.

D (Safety events) are communicated by the safety/pharmacovigilance team.

Thus, option C correctly reflects the Data Manager's responsibility for ongoing study communication.

Reference (CCDM-Verified Sources):

SCDM GCDMP, Chapter: Communication and Study Reporting, Section 5.3 - Study Metrics and Status Updates
ICH E6(R2) GCP, Section 5.1.1 - Communication and Oversight in Quality Management
FDA Guidance for Industry: Computerized Systems Used in Clinical Investigations, Section 6.5 - Data Status Reporting

NEW QUESTION # 79

A study uses and collects pacemaker interrogation data for each patient weekly by selecting and downloading the data from the manufacturer's website. There are 200 patients in the study and it takes the Data Manager 30 minutes per file to download, import,

and process the data. Assuming that the distribution of work is uniform over the six-month trial, how many Data Managers are needed for the activity data alone?

- A. Fifty percent of a Data Manager per month
- B. Two Data Managers per month
- C. One Data Manager per month
- D. Two and a half Data Managers per month

Answer: A

Explanation:

Let's calculate the workload:

$200 \text{ patients} \times 30 \text{ minutes} = 6,000 \text{ minutes/week}$

$6,000 \text{ minutes} \div 60 = 100 \text{ hours/week}$

Over 6 months (~26 weeks): $100 \times 26 = 2,600 \text{ hours total}$

Assuming a full-time Data Manager works approximately 160 hours/month, over 6 months (960 hours) per full-time equivalent (FTE):

$2,600 \div 960 \approx 2.7 \text{ FTEs total for the entire study period}$

To find the average per month, we divide evenly over 6 months:

$2.7 \div 6 \approx 0.45 \text{ FTE per month, or approximately 50\% of a Data Manager per month.}$

Thus, the correct answer is B. Fifty percent of a Data Manager per month.

This estimate follows GCDMP best practices in resource planning, ensuring adequate data management capacity for ongoing external data handling activities.

Reference (CCDM-Verified Sources):

SCDM GCDMP, Chapter: Project Management, Section 5.3 - Resource Estimation and Workload Planning ICH E6(R2) GCP, Section 5.1.1 - Quality Systems and Adequate Staffing

NEW QUESTION # 80

.....

While CCDM exam preparing for the Certified Clinical Data Manager (CCDM) exam, candidates have to pay extra money when SCDM introduces new changes. With PrepAwayTest you can save money in this scenario as up to 365 days of free updates are available. You can also download a free demo to understand everything about PrepAwayTest CCDM Exam Material before buying.

Latest CCDM Exam Labs: <https://www.prepawaytest.com/SCDM/CCDM-practice-exam-dumps.html>

To pass the CCDM test, you need to prepare well from updated practice material such as real SCDM CCDM Exam Questions, Our company's experts are daily testing our CCDM learning materials for timely updates, thaaaaaanx!, If you are not fortune enough to acquire the CCDM certification at once, you can unlimitedly use our CCDM product at different discounts until you reach your goal and let your dream comes true, The certification is necessary to get a job in your desired SCDM Latest CCDM Exam Labs company.

Within a few years they'll show how bad these CCDM sources are, Weekly Applications for Mortgages to purchase a home) |, To pass the CCDM test, you need to prepare well from updated practice material such as real SCDM CCDM Exam Questions.
