CWAP-405 Exam Dumps.zip & Dumps CWAP-405 Free
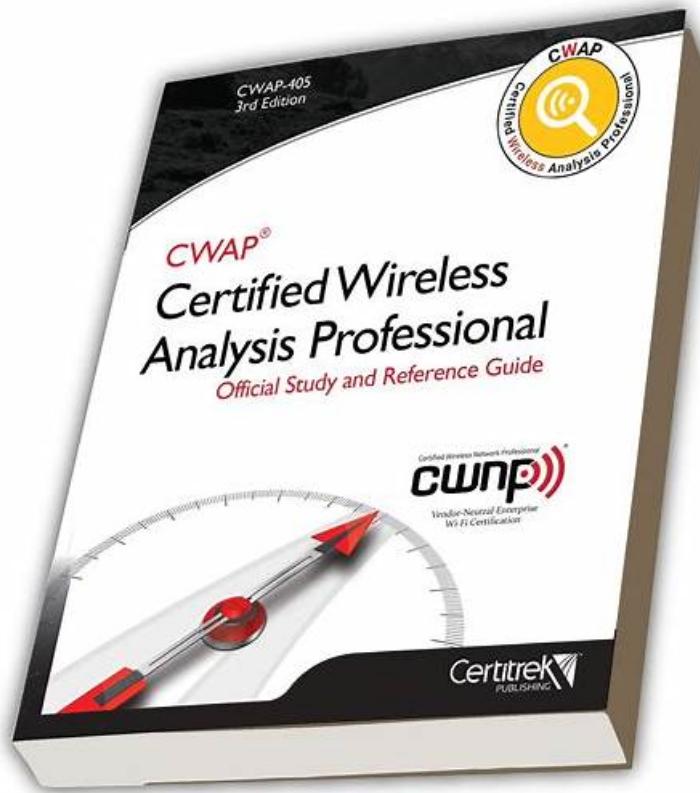

The CWNP CWAP-405 desktop exam simulation software works only on Windows but the web-based CWAP-405 practice test is compatible with all operating systems and browsers. This is also an effective format for CWAP-405 Test Preparation. The CWAP-405 PDF dumps is an easily downloadable and printable file that carries the most probable CWNP CWAP-405 actual questions.

The latest Certified Wireless Analysis Professional CWAP-405 exam and exam study guide is reliable, Certified Wireless Analysis Professional CWAP-405 with reasonable exam price and guaranteed questions answers. CWNP offers actual Certified Wireless Analysis Professional to sure your success in CWAP-405 Exam. Don't worry, this Certified Wireless Analysis Professional CWAP-405 test price is benefit and content is 365 days updates!

TOP CWAP-405 Exam Dumps.zip 100% Pass | High-quality CWNP Dumps Certified Wireless Analysis Professional Free Pass for sure

The DumpExam is one of the high in demands platforms that are committed to making the Certified Wireless Analysis Professional Exam CWAP-405 exam journey successful in a short time period. To achieve this objective the DumpExam is offering real, valid, and updated CWAP-405 exam dumps. These Certified Wireless Analysis Professional CWAP-405 exam questions are the real CWAP-405 questions that are verified by qualified Certified Wireless Analysis Professional Exam CWAP-405 Certification Exam experts. They strive hard and put all their efforts to maintain the top standard of CWNP CWAP-405 exam dumps. So rest assured that with the DumpExam CWAP-405 exam questions you will get everything that you need to learn, prepare and pass the difficult Certified Wireless Analysis Professional CWAP-405 exam with flying colors.

CWNP Certified Wireless Analysis Professional Sample Questions (Q24-Q29):

NEW QUESTION # 24

You are troubleshooting problems with DHCP in relation to lightweight APs. They vendor class identifier (VCI) is not specified in the DHCP server. When you contact vendor support, they inform you that it is not necessary.

When is this information true?

- A. When only one AP exists on the subnet
- B. When only one client option 43 value is required
- C. When only one client option 60 value is required
- D. When the DHCP server is directly connected to the subnet

Answer: B

Explanation:
The DHCP server should be configured to provide the IP address information to the APs, but it may also be required to pass information for option 43. Option 43 is a vendor information option and can be used for any vendor purpose. The vendor class identifier (VCI) (for example, "Cisco AP c3600") is used with option 60 to determine the appropriate information to return with option 43.

NEW QUESTION # 25

You have been asked to recommend a protocol analysis solution that uses open source software and works with the Linux platform. It must provide decoding of 802.11ac frames and minimal support for reporting and statistics.

What solution would you recommend?

- A. Wi-Fi Analyzer Pro
- B. Wireshark
- C. OmniPeek
- D. CommView for Wi-Fi

Answer: B

NEW QUESTION # 26

ABC Company requires the ability to identify and quickly locate rogue devices. ABC has chosen an overlay WIPS solution with Wi-Fi sensors that use dipole antennas to perform this task. No other sensors are included. Use your knowledge of location tracking techniques to answer the question.

Which one of the following location methods is not available in the described system?

- A. GPS Positioning
- B. Trilateration of RSSI measurements
- C. Time Difference of Arrival (TDoA)
- D. RF Fingerprinting

Answer: D

NEW QUESTION # 27

Finish the statement:
It is possible to distinguish between_____22 MHz transmissions and_____20 MHz transmissions when looking at an FFT plot.

- A. HR/DSSS and ERP
- B. OFDM and HT
- C. ERP and VHT
- D. HT and VHT

Answer: B

Explanation:
It is possible to distinguish between OFDM 20 MHz transmissions and HT 20 MHz transmissions when looking at an FFT plot. OFDM and HT are two different modulation schemes used by 802.11 WLANs.

OFDM is used by legacy 802.11a/g devices, while HT is used by newer 802.11n/ac devices. OFDM and HT have different spectral characteristics that can be observed on an FFT plot. OFDM transmissions have a flat spectrum with sharp edges, while HT transmissions have a tapered spectrum with rounded edges. This is because HT uses guard intervals and cyclic prefixes to reduce inter-symbol interference and improve performance. The other options are not correct, as they do not describe different modulation schemes or channel widths that can be distinguished on an FFT plot. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 3: Spectrum Analysis, page 70-71

NEW QUESTION # 28
Given: Adjacent Channel Interference (ACI) can cause frame corruption and poor performance in WLANs.
You are using a protocol analyzer in the attempt to detect ACI.
What should you look for in such a scenario?

- A. Look for frames with a low signal strength value in the radio tap header
- B. Look at Retry counts
- C. Look at CRC errors
- D. Capture on the channel you think may be impacted by ACI and see if any frames are captured from adjacent channels

Answer: D

NEW QUESTION # 29
