This EC-Council Certified CISO (CCISO) (712-50) PDF file contains the most probable actual EC-Council Certified CISO (CCISO) (712-50) exam questions.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q578-Q583):

NEW QUESTION # 578

Which of the following are necessary to formulate responses to external audit findings?

- A. Technical Staff, Budget Authority, Management
- B. Technical Staff, Internal Audit, Budget Authority
- C. Internal Audit, Budget Authority, Management
- **D. Internal Audit, Management, and Technical Staff**

Answer: D

Explanation:

Formulating Responses to Audit Findings:

- * Internal audit provides oversight and ensures the findings are addressed effectively.
- * Management ensures alignment with organizational objectives and secures necessary resources.
- * Technical staff implements the required changes and provides technical feasibility insights.

Why This is Correct:

- * The combination of these groups ensures a comprehensive response, addressing technical and organizational aspects of the findings.

Why Other Options Are Incorrect:

- * B, C, D: Exclude critical stakeholders (e.g., internal audit or technical staff), limiting effectiveness.

References: EC-Council emphasizes collaboration among audit teams, management, and technical staff to formulate effective responses to audit findings.

NEW QUESTION # 579

Which of the following represents the BEST method for obtaining business unit acceptance of security controls within an organization?

- A. Provide the business units with control mandates and schedules of audits for compliance validation
- B. Create separate controls for the business units based on the types of business and functions they perform
- **C. Ensure business units are involved in the creation of controls and defining conditions under which they must be applied**
- D. Allow the business units to decide which controls apply to their systems, such as the encryption of sensitive data

Answer: C

NEW QUESTION # 580

When entering into a third party vendor agreement for security services, at what point in the process is it BEST to understand and validate the security posture and compliance level of the vendor?

- A. At the time the security services are being performed and the vendor needs access to the network
- B. Once the agreement has been signed and the security vendor states that they will need access to the network
- C. Once the vendor is on premise and before they perform security services
- **D. Prior to signing the agreement and before any security services are being performed**

Answer: D

Explanation:

* Evaluating a vendor's security posture and compliance level prior to signing the agreement ensures that potential risks are identified and mitigated early in the process.

* It also ensures that the vendor aligns with the organization's security policies and regulatory requirements before gaining access to sensitive systems or data.

Why Other Options Are Incorrect:

* A. At the time the security services are being performed: By this stage, risks might already have been introduced.

* B. Once the agreement has been signed: This exposes the organization to contractual obligations without ensuring proper security controls.

* C. Once the vendor is on-premise: At this point, it may be too late to address security gaps or terminate the relationship without significant disruption.

EC-Council CISO Reference: Vendor risk management processes outlined in the curriculum emphasize pre- contractual due diligence as a best practice for reducing third-party risks.

NEW QUESTION # 581

A CISO decides to analyze the IT infrastructure to ensure security solutions adhere to the concepts of how hardware and software is implemented and managed within the organization. Which of the following principles does this best demonstrate?

- **A. Effective use of existing technologies**
- B. Proper budget management
- C. Create a comprehensive security awareness program and provide success metrics to business units
- D. Leveraging existing implementations

Answer: A

Explanation:

Analyzing IT Infrastructure for Security

* Ensuring that security solutions align with existing technologies demonstrates effective resource utilization and avoids unnecessary duplication of functionality.

Why Not Other Options?

* B. Create a comprehensive security awareness program: Focuses on user behavior, not infrastructure analysis.

* C. Proper budget management: Budgeting is essential but not the focus of infrastructure alignment.

* D. Leveraging existing implementations: Overlaps with leveraging technology but lacks the broader focus of alignment and management.

EC-Council References

* Stresses the importance of optimizing current IT and security resources before new implementations.

NEW QUESTION # 582

Which of the following is the MOST effective technology to counter phishing attacks?

- A. Email antivirus solutions
- B. Vulnerability scanning software
- **C. Email anti-spam solutions**
- D. Additional monitoring of low-risk individuals

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

CCISO materials identify email anti-spam solutions as the most effective technical control against phishing.

Anti-spam solutions use reputation analysis, content inspection, and behavioral analysis to block phishing before delivery.

Antivirus solutions typically detect malware payloads, not social engineering attacks. Therefore, email anti-spam solutions are the best answer.

NEW QUESTION # 583

.....

As we mentioned above that the EC-Council Certified CISO (CCISO) (712-50) exam questions is provided to students in three different formats.
