CISI IFC Exam Dumps - Right Preparation Method [2026]

The learning material is open in three excellent formats; CISI IFC dumps PDF, a desktop CISI IFC dumps practice test, and a web-based CISI IFC dumps practice test. CISI IFC dumps is organized by experts while saving the furthest down-the-line plan to them for the CISI IFC Exam. The sans bug plans have been given to you all to drift through the CISI certificate exam.

CISI Investment Funds in Canada (IFC) Exam Sample Questions (Q236-Q241):

NEW QUESTION # 236

Kerry's total income this past year was \$100,000 and she claimed a tax deduction of \$2,000. When the tax return is filed, what would be the federal tax payable when applying the following federal tax rates?
(Round to the closest whole dollar for the final answer.)

- A. \$24,000
- B. \$25,480
- C. \$17,472
- D. \$18,754

Answer: D

Explanation:

Kerry's taxable income would be \$98,000 (\$100,000 - \$2,000). Using the federal tax rates provided in the image, the first \$48,535 of her income would be taxed at 15%, the next \$48,534 at 20.5%, and the remaining \$931 at 26%. This would result in a total federal tax payable of \$18,754. You can see the calculation in detail below:

Taxable Income

Marginal Tax Rate
 Federal Tax Payable
 \$0 - \$48,535
 15%
 \$7,280.25
 \$48,536 - \$97,069
 20.5%
 \$9,934.47
 \$97,070 - \$98,000
 26%
 \$539.80
 Total
 \$18,754.52

Note: The final answer is rounded to the closest whole dollar.
 Canadian Investment Funds Course, Unit 8, Section 8.2; [4]

NEW QUESTION # 237

What type of fund offers the highest expected risk and the highest expected return in terms of the risk-return trade-off between different types of mutual funds?

- A. Specialty fund
- B. Mortgage fund
- C. Real estate fund
- D. Canadian Equity fund

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Specialty funds, due to their focused and often speculative investments, carry the highest expected risk and return among mutual funds. The feedback from the document states:

"The highest risk, highest expected return mutual fund is a specialty fund." Reference: Chapter 15 - Selecting a Mutual Fund Learning Domain: Evaluating and Selecting Mutual Funds

NEW QUESTION # 238

Eleanora receives a \$500 eligible Canadian dividend from her mutual fund. Her federal marginal tax rate for the year is 29%.

Assuming the enhanced gross-up of 38% and a federal dividend tax credit of 15.02%, how much federal tax will she pay on her dividend?

- A. \$96.46
- B. \$189.16
- C. \$115.40
- D. \$69.90

Answer: A

Explanation:

The federal tax on eligible Canadian dividends is calculated as follows:

* First, the dividend amount is grossed up by 38%, which means multiplying it by 1.38. This is to account for the corporate tax that has already been paid by the company. Eleanora's grossed-up dividend is $\$500 \times 1.38 = \690 .

* Second, the grossed-up dividend is multiplied by the federal marginal tax rate to get the gross federal tax. Eleanora's gross federal tax is $\$690 \times 0.29 = \200.10 .

* Third, the grossed-up dividend is multiplied by the federal dividend tax credit rate to get the federal tax credit. This is to avoid double taxation of the dividend income. Eleanora's federal tax credit is $\$690 \times 0.1502 = \103.64 .

* Fourth, the federal tax credit is subtracted from the gross federal tax to get the net federal tax. Eleanora's net federal tax is $\$200.10 - \$103.64 = \$96.46$.

Therefore, Eleanora will pay \$96.46 in federal tax on her dividend. References: How Dividends Are Taxed and Reported on Tax Returns - Investopedia, Dividend Tax Credit in Canada - TurboTax

NEW QUESTION # 239

What does a normal yield curve look like?

- A. slopes upward to the left
- **B. slopes upward to the right**
- C. slopes down to the right
- D. is flat and has no slope

Answer: B

Explanation:

A normal yield curve is a graphical representation of the relationship between the interest rates and the maturities of different fixed income securities. It slopes upward to the right, meaning that longer-term bonds have higher yields than shorter-term bonds. This reflects the fact that investors demand higher compensation for lending money for longer periods of time and taking on more risk. A normal yield curve indicates that investors expect the economy to grow steadily and inflation to remain stable.

NEW QUESTION # 240

Which among the following plans includes a provision that places a maximum limit on the amount that can be withdrawn during a calendar year?

- **A. Life Income Fund (LIF)**
- B. Deferred Profit Sharing Plan (DPSP)
- C. Registered Retirement Income Fund (RRIF)
- D. Registered Retirement Savings Plan (RRSP)

Answer: A

Explanation:

A LIF is a type of registered retirement income fund that is used to hold and pay out locked-in pension funds.

A LIF has both a minimum and a maximum withdrawal limit for each calendar year, which are determined by the federal or provincial pension legislation, the age of the annuitant, and the value of the fund. The minimum withdrawal limit is similar to that of a RRIF, but the maximum withdrawal limit is intended to ensure that the LIF provides income for the lifetime of the annuitant¹²³

References = Canadian Investment Funds Course (CIFIC) - Module 3: Registered Plans - Section 3.4: Life Income Fund (LIF)⁴

and web search results from search_web(query="maximum withdrawal limit for LIF RRSP RRIF DPSP")¹²³
