## Scrum SAFe Product Owner/Product Manager POPM (6.0) Sample Questions (Q33-Q38):

### NEW QUESTION # 33

Which is developed by teams and rolled up to the ART level during PI Planning?

- A. Dependencies
- B. Milestones
- C. Objectives
- D. Risks

**Answer: C**

Explanation:

Objectives are developed by teams and rolled up to the ART level during PI Planning. Objectives are a summary of the business and technical goals that the teams and the ART intend to achieve in the upcoming Program Increment (PI)<sup>1</sup>. During PI Planning, each team creates their own team PI objectives, which are then presented and reviewed by the ART and the stakeholders<sup>2</sup>. The aggregated team PI objectives form the ART PI objectives, which provide a common vision and alignment for the ART<sup>3</sup>.

\* PI Planning - Scaled Agile Framework

### NEW QUESTION # 34

Communicating and refining the Vision to the Agile Release Train during PI Planning supports which SAFe Core Value?

- A. Respect for People
- B. Alignment
- C. Relentless Improvement
- D. Transparency

**Answer: B**

Explanation:

Communicating and refining the Vision to the Agile Release Train (ART) during PI Planning supports the SAFe Core Value of Alignment. Alignment is one of the four core values of SAFe that guides the behaviors and actions of the people who work under the framework<sup>1</sup>. Alignment means that everyone understands the strategic direction, the value streams, and the solution intent, and how their role and work contribute to them<sup>2</sup>.

PI Planning is a crucial event in SAFe where all the teams within the ART come together to plan their work for the upcoming Program Increment (PI)<sup>3</sup>. During PI Planning, the Product Management presents the Vision, which describes the future state of the solution and its features<sup>4</sup>. The Vision helps align the teams and stakeholders to a shared mission and goal, and provides the context and purpose for the PI objectives.

### NEW QUESTION # 35

Which of the following events shows how well the ART is progressing toward meeting the PI Objectives?

- A. PO Sync
- B. Backlog Refinement
- C. Inspect and Adapt
- D. PI Planning

**Answer: C**

Explanation:

The event that shows how well the Agile Release Train (ART) is progressing toward meeting the Program Increment (PI) objectives is the Inspect and Adapt (I and A) event. The Inspect and Adapt event occurs at the end of each PI and provides an opportunity for the entire ART to reflect on the progress made during the PI, identify and address the root causes of any impediments, and plan for improvement actions in the next PI.

\* Inspect and Adapt - Scaled Agile Framework

#### NEW QUESTION # 36

What is one responsibility of Product Management?

- A. Managing and prioritizing the Team Backlog
- B. Building the Solution
- C. Supporting the team in delivering value
- **D. Connecting with the Customer**

**Answer: D**

Explanation:

One of the key responsibilities of Product Management in SAFe is to connect with the customer and understand their needs, preferences, and feedback. Product Management is the voice of the customer for the Agile Release Train (ART) and represents their interests in defining and prioritizing the features and capabilities of the solution<sup>1</sup>. Product Management also engages with the customer throughout the product life cycle, conducting market research, validating assumptions, soliciting feedback, and ensuring customer satisfaction<sup>2</sup>.

#### NEW QUESTION # 37

What system delivers a product or service to a Customer?

- **A. Operational Value Stream**
- B. Development Value Stream
- C. Kanban System
- D. Dual Operating System

**Answer: A**

Explanation:

An Operational Value Stream (OVS) is the sequence of activities needed to deliver a product or service to a customer<sup>1</sup>. Examples include manufacturing a product, fulfilling an order, admitting and treating a medical patient, providing a loan, or delivering a professional service<sup>1</sup>. An OVS is the system that delivers value to the customer and generates revenue for the enterprise<sup>2</sup>. In SAFe, OVSs are the primary focus of the Customer Centricity competency, which aims to understand and meet the needs and expectations of the customer<sup>3</sup>.

Some additional information that might be helpful for you are:

\* The other options (A, C, and D) are not systems that deliver a product or service to a customer, but rather systems or concepts that support or enable the delivery of value.

\* A Kanban System is a method of visualizing and managing the flow of work in a value stream<sup>4</sup>. A Kanban System can be applied to any type of value stream, whether operational or developmental, to improve efficiency, quality, and predictability<sup>4</sup>.

\* A Development Value Stream (DVS) is the sequence of activities needed to convert a business hypothesis into a digitally-enabled solution that delivers customer value. A DVS is the system that develops and supports the solutions used by the OVSs. In SAFe, DVSs are the primary focus of the Agile Product Delivery competency, which aims to continuously explore, integrate, deploy, and release value.

\* A Dual Operating System is a concept proposed by John Kotter that describes the need for organizations to balance the traditional hierarchical structure with a more agile and networked structure. A Dual Operating System enables organizations to exploit their existing capabilities while exploring new opportunities for innovation and growth. In SAFe, a Dual Operating System is achieved by applying the Lean-Agile Leadership competency, which fosters a culture of learning and empowerment.

## NEW QUESTION # 38

.....

We are carrying out renovation about SAFE-POPM test engine all the time to meet the different requirements of the diversified production market. Thus we have prepared three kinds of versions on SAFE-POPM preparation materials. If you are used to study with paper-based materials you can choose the PDF version of our SAFE-POPM Study Guide. If you would like to get the mock test before the real SAFE-POPM exam you can choose the software version, and if you want to study in anywhere at any time then our online APP version is your best choice since you can download it in any electronic devices.
